

Contents

1	Introduction	2
2	The Singlet Model	4
2.1	Scaling of physical quantities	6
2.2	Vector boson fusion	7
3	Single production	8
3.1	Decay channel $\phi \rightarrow hh$	9
3.2	Decay channels $\phi \rightarrow VV$	11
3.3	Discussion and comparison with hadron colliders	12
3.4	Muon colliders	14
4	Single Production & Beyond the Standard Model Scenarios	15
4.1	NMSSM	15
4.2	Twin Higgs	16
4.3	Comments on heavy electroweak ALPs	18
5	Double production & first order Electroweak Phase Transition	19
5.1	Electroweak phase transition	22
6	Outlook and conclusions	24
A	Details on the $hh(4b)$ analysis	25
B	Details on the sensitivities at higher energies	25
