

CONTENTS

I. Introduction	2
II. Axion-like curvaton Model	2
A. Potential	2
B. Dynamics	3
C. Curvature perturbation	4
D. Non-Gaussianity	6
III. PBH formation	7
IV. Gravitational waves from second-order effects	9
A. Transfer Function	10
B. Suppression via Non-Gaussianity	11
V. Result	13
A. Mass Spectrum for the LIGO events	13
B. GWs and PTA Experiments	14
C. Curvaton decay	16
VI. Conclusion	16
Acknowledgements	16
A. GWs induced by scalar perturbations	17
1. Equation of motion of GWs	17
2. Source Term	18
3. Power Spectrum	19
4. Energy Density	20
B. Power Spectrum with Non-Gaussianity	20
References	22
