

# Contents

<b>1</b>	<b>Introduction</b>	<b>3</b>
<b>2</b>	<b>The <math>BC_N</math> Calogero-Sutherland problem</b>	<b>5</b>
2.1	The Pöschl-Teller Hamiltonian . . . . .	5
2.2	The Calogero-Sutherland potential . . . . .	7
2.3	Affine Weyl group and the domain $D_N$ . . . . .	9
2.4	Coordinates in the CS problem . . . . .	13

<b>3</b>	<b>Wave functions of the Calogero-Sutherland model</b>	<b>14</b>
3.1	Wave functions of the Pöschl-Teller problem . . . . .	14
3.2	Harish-Chandra series expansions . . . . .	18
3.3	Poles and residues of Harish-Chandra functions . . . . .	21
3.4	Monodromy group and representation . . . . .	25
<b>4</b>	<b>Wave functions and conformal blocks</b>	<b>31</b>
4.1	Conformal blocks and the Casimir equation . . . . .	31
4.2	Blocks and the Pöschl-Teller problem . . . . .	32
4.3	Blocks from Harish-Chandra wave functions . . . . .	33
<b>5</b>	<b>Some applications of scattering theory to conformal blocks</b>	<b>35</b>
5.1	Poles and residues of blocks . . . . .	35
5.2	On the derivation of a Gribov-Froissart formula for CFT . . . . .	41
<b>6</b>	<b>Conclusions</b>	<b>45</b>
<b>7</b>	<b>Acknowledgements</b>	<b>48</b>
<b>A</b>	<b><math>z</math>- and <math>x</math>-expansions for <math>BC_2</math> Harish-Chandra function</b>	<b>48</b>
<b>B</b>	<b>Alternative expansions for integer spin</b>	<b>55</b>
