1	Introduction	1
1.1	Context of this study	2
1.2	Research Objectives	4
1.3	Integration into the concept of the research project ENHANCE	6
2	A social perspective on coastal risks management	9
2.1	Risk: a social, collective and cultural construction	9
2.2	A need for enhanced social processes in (disaster) risk management	13
3	Governing coastal risks from a social process perspective: Premises and challenges	17
3.1	Conceptual premises from risk governance	18
3.2	Conceptual premises for participatory structures	19
3.3	Emphasizing stakeholder participation	20
3.4	Increased attention to a multi-stakeholder perspective in practice and policy . .	22
3.5	The Integrative Risk Management Approach – A conceptual contribution to anchor the social process perspective in coastal risk management	25
4	The trilateral Wadden Sea Region - A coastal multi-risk case study	31
4.1	The historical context – A striking feature of the Wadden Sea Region	34
4.2	The Wadden Sea Region as a multi-risk area	36
4.3	The challenge of integrative risk management	38
4.4	The cross-national perspective in the WSR — Emphasizing the issue of spatial scale in coastal risk management processes	41
5	Enhancing multi-stakeholder participation in practice: structural improvement via an MSP	45
5.1	The concept of partnerships	45
5.2	A cross-national MSP in the Wadden Sea Region	46
6	A participatory mixed-methods framework and its realization in the WSR	49
6.1	Research design to realize the participatory mixed-methods framework within a transnational MSP	55
6.2	Making risk perceptions and stakeholder concerns accessible to the risk management process	57
6.3	Adjusting coastal risk management objectives with societal needs: Enhanced societal understanding of cause-and-effect relationships in risk management . .	60

6.4	Align risk management activities with the societal needs and visions in short- and long-term perspectives	64
7	A social process perspective in practice – Insights from the trilateral Wadden Sea Region	71
7.1	Environmental changes, with special focus on storm surge management	73
7.2	Demographic change	77
7.3	Imbalanced development	80
8	Recommendations for the trilateral Wadden Sea Region: Benefits of cross-national activities and the role of an MSP	83
8.1	A trilateral dimension in the Wadden Sea Region's risk management scheme .	83
8.2	Role of the MSP in the Wadden Sea Region's risk management scheme	85
9	The social process perspective: serving improved coastal risk management	89
9.1	Discussing the methodological framework	91
9.2	Discussing an advice-giving Multi-Sector Partnership to improve coastal risk management	95
10	Conclusion and Outlook	99
11	List of publications	105
