Preface

Introduction

Clinical characteristics of cystic fibrosis

Clinical care guideline index

Chapter 1: General information on hygienic practices

- Hand hygiene and hand disinfection
- General hygiene measures for cystic fibrosis patients
- Hygiene measures for infectious microorganisms
- Hygiene measures for *Pseudomonas aeruginosa*
- Hygiene measures for *Burkholderia cepacia*
- Hygiene measures for MRSA
- Smoking and passive smoking are a health risk
- Literature

Chapter 2: Diet

- Tasks and potential impact of the nursing staff on the diet in cystic fibrosis
- General tips about everything related to eating and suggestions for establishing good dietary habits
- Outpatient enteral nutritional therapy, checklist for nursing staff, patients and family members
- Clinical care guideline: Placement of a nasogastric tube for tube feeding
- Clinical care guideline: Setup protocol for pump-controlled tube feeding
- Clinical care guideline: Dressing change for PEG (percutaneous endoscopic gastrostomy)
- Schematic illustration of the Freka[®]PEG Gastric Set system
- Clinical care guideline: Balloon button function test
- Clinical care guideline: Button replacement
- Literature

Chapter 3: Inhalation therapy

- Clinical care guideline: Inpatient inhalation therapy using an aerosol device/wall mounted automatic dispenser
- Clinical care guideline: Domestic inhalation therapy using an aerosol device
- Miscibility of inhalation solutions in the nebuliser
- Clinical care guideline: Inhalation therapy using a metered-dose inhaler
- General information on using powder inhalers
- Literature

Chapter 4: Outpatient intravenous antibiotic therapy

- Outpatient intravenous antibiotic therapy for venous indwelling cannula and port, checklist for the nursing staff
- Allergic reactions during intravenous antibiotic therapy
- Clinical care guideline: Outpatient intravenous antibiotic therapy using an infusion system and venous indwelling cannula
- Clinical care guideline: Outpatient intravenous antibiotic therapy using an infusion system and an implanted PORT catheter
- Clinical care guideline: Heparin lock for an implanted port in the off-therapy period
- Schematic design of an implanted port

Chapter 5: Inpatient intravenous antibiotic therapy

- Clinical care guideline: Preparation of short-term infusion of antibiotics without laminar air flow
- Clinical care guideline: Preparation of short-term infusion of antibiotics with laminar air flow
- Clinical care guideline: Placement of a venous indwelling cannula
- Clinical care guideline: Inpatient intravenous antibiotic therapy using an infusion system and venous indwelling cannula
- Clinical care guideline: Central venous catheter (CVC) in inpatient intravenous antibiotic therapy
- Clinical care guideline: Placement of a central venous catheter
- Clinical care guideline: Dressing change for central venous catheters
- Clinical care guideline: Central venous catheter infusions
- Clinical care guideline: PICC line for inpatient intravenous antibiotic therapy
- Clinical care guideline: PICC line placement
- Clinical care guideline: Dressing change for PICC line
- Literature

Chapter 6: Long-term oxygen therapy

- Clinical care guideline: Inpatient oxygen therapy in cystic fibrosis
- Clinical care guideline: Outpatient long-term oxygen therapy in cystic fibrosis
- Long-term oxygen therapy: Checklist for patients, family members and nursing staff
- Literature

Chapter 7: Non-invasive ventilation

- Clinical care guideline: Inpatient non-invasive ventilation
- Clinical care guideline: Outpatient non-invasive ventilation
- Ventilation protocol for non-invasive ventilation
- Literature
