

Contents

1	Introduction	1
2	Carbon Nanotubes	5
2.1	Crystal structure of CNTs	5
2.2	CNT growth mechanisms	7
2.3	Electronic properties	8
2.4	Optoelectronic properties of CNTs	12
2.5	Charge carrier relaxation in CNTs	14
2.5.1	Exciton recombination dynamics	14
2.5.2	Intersubband and intrasubband relaxation	16
2.6	Photocurrent mechanisms in CNTs	17
2.6.1	Thermoelectric effect	19
2.6.2	Photovoltaic currents	19
2.6.3	Bolometric effect and photodesorption	20
2.6.4	Displacement currents	22
2.7	Transport properties of CNTs	24
2.7.1	Drift and diffusion currents	24
2.7.2	Ballistic transport regime	25
2.7.3	Conductance of a CNT network	26
3	Metallic Nanoscale Devices	31
3.1	Metal-semiconductor interface	31
3.1.1	Schottky barrier formation	32
3.1.2	Interface states and Fermi level pinning	33
3.2	Thermionic emission	35
3.3	The Schottky effect	37
3.4	Fowler-Nordheim tunneling	39
3.5	Photoemission	41
3.6	Multiphoton absorption	43
3.7	Strong-field photoemission	44

4	Ultrafast ballistic and resonant negative photocurrents in CNTs	49
4.1	Introduction	50
4.2	THz-stripline circuits	51
4.3	CNT dielectrophoresis	52
4.4	Scanning photocurrent microscopy	54
4.5	Non-linear photocurrent spectroscopy	56
4.6	Photocurrent and transport modeling	57
	4.6.1 Thermionic emission	58
	4.6.2 Schottky emission	60
	4.6.3 Fowler-Nordheim tunneling model	60
4.7	Resonant negative photocurrents	61
4.8	Ultrafast photocurrent spectroscopy	64
4.9	Ballistic photocurrents	65
4.10	Conclusion	69
5	Femtosecond on-chip electronics based on plasmonic nano-emitters	71
5.1	Introduction	72
5.2	Asymmetric nanojunctions in THz-stripline circuits	73
5.3	Photoemission processes in the nanojunctions	75
5.4	Ultrafast coherent on-chip THz pulses	78
5.5	Near-field coupling of NIR pulses into stripline circuits	80
5.6	Conclusion	84
6	Conclusion and Outlook	87
A	CNTs: Sample fabrication and further experimental results	93
A.1	Optical lithography parameters	93
A.2	Dielectrophoresis procedure	94
A.3	Characteristics of the CNT samples	96
A.4	Time-averaged photocurrent of CNTs for an excitation of E_{11}	97
A.5	Fit comparison for the time-resolved photocurrent	98
A.6	Time-resolved photocurrent of CNTs for an excitation of E_{11}	99

B Characteristics of the photoemission experiments	101
B.1 Characterization of the pump laser pulses	101
B.2 Electric field distribution within the Auston switch	102
B.3 Spatially resolved photocurrent spectroscopy	103
B.4 Simulation of the field enhancement within the nanojunctions	104
B.5 Time-resolved photoemission in carbon nanotube devices	105
B.6 Time resolution of the time-resolved photocurrent spectroscopy	107
