

Contents

1	Introduction	7
1.1	Earlier research	7
1.2	Nature and scope of the present work	15
2	System	21
2.1	The grammatical cycle: analysis and synthesis	22
2.1.1	Why grammar?	25
2.2	Grammatical synthesis	32
2.2.1	Form and content of a component	32
2.3	The derivational process	44
2.3.1	Guiding principles of synthesis	44
2.3.2	Intention of the speaker	45
2.3.3	Consistency of the derivational state	45
2.3.4	Saturation of the derivational state	46
2.3.5	Completion of the derivational state	47
2.3.6	Conditions	48
3	Frameworks	49
3.1	Salient features of the Pāṇinian formulation	50
3.1.1	Methodology of Pāṇinian formulation	52
3.2	Formalization of the Pāṇinian corpus: challenges and possibilities	57
3.2.1	Possibility of formalization of the grammatical system .	62
3.3	Specification of the formal framework	66
3.3.1	Representing a component	68
3.3.2	Comprehending the dynamics of the derivational process	74

4	Representations	79
4.1	Operational statements	79
4.1.1	Characterizing the components	79
4.1.2	Combining the components	95
4.2	Structure of a statement	98
4.2.1	Types of operations	99
4.2.2	Complexity of a statement	100
4.3	Relation between statements	104
5	Implementation	107
5.1	Data-structures	108
5.1.1	Elements	108
5.1.2	Sound-sets	109
5.1.3	Language-components	111
5.1.4	Sentences	113
5.1.5	Derivational states	113
5.1.6	Slices	114
5.1.7	Process-strips	114
5.1.8	Statements	115
5.1.9	Statement groups	116
5.2	Processes of grammar	117
5.2.1	Initialisation	118
5.2.2	Saturation	120
5.2.3	Completion	124
A	The Systematic Approach	131
A.1	Analysis and synthesis	132
A.1.1	Syllables (<i>Akṣaras</i>)	132
A.1.2	The falcon shaped fire altar (<i>Śyenacit</i>)	134
A.1.3	Samhitā-pāṭha and Pada-pāṭha	136
A.2	Components and units	139
A.2.1	Characterization	141
A.2.2	Combination of units and components	142
A.2.3	Constructs	142
A.3	Structures, variations and change	143
