

Contents

Acknowledgments — VII

About the Author — IX

Foreword — XI

Introduction — XVII

Part I: Deterministic Supply Chains

- 1 Inventory Policies — 3**
 - 1.1 Policy #1 – Continuous Review and Reorder Point — 3
 - 1.2 Policy #2 – Periodic Review and Order Up-to Level — 5
 - 1.3 Policy #3 – Periodic Review, Reorder Point and Fixed Order Quantity — 7
 - 1.4 Other Policies — 8
 - 1.5 Confusion Curse: Inventory Target — 9
 - 1.6 Recap — 10

- 2 How Much Should I Order? — 11**
 - 2.1 Supply Chain Costs — 11
 - 2.2 Model Optimization — 18
 - 2.3 A Brief History of the EOQ Model — 22
 - 2.4 Sensitivity Analysis — 23
 - 2.5 Extensions — 25
 - 2.6 Recap — 33

- 3 When Should I Order? — 34**
 - 3.1 Lead Time — 34
 - 3.2 Review Period — 36
 - 3.3 Confusion Curse: Long Lead Times — 41
 - 3.4 Recap — 42

Part II: Stochastic Supply Chains

- 4 Safety Stocks — 45**
 - 4.1 Service Level — 46
 - 4.2 Stochastic Demand — 48

- 4.3 Demand Variation over Multiple Periods — 58
- 4.4 Recap — 64

- 5 Inventory Policies — 65**
 - 5.1 Safety Stocks and Inventory Policies — 65
 - 5.2 Inventory Analysis — 70
 - 5.3 Simulation — 72
 - 5.4 Recap — 82

- 6 Stochastic Lead Times — 83**
 - 6.1 Lead Time: What Is It Made of? — 83
 - 6.2 Stochastic Lead Time and Fixed Demand — 86
 - 6.3 Stochastic Lead Time and Demand — 88
 - 6.4 Simulation — 91
 - 6.5 Recap — 95

Part III: Advanced Stochastic Models

- 7 Fill Rate — 99**
 - 7.1 Service Level Definition — 99
 - 7.2 Expected Unit Shorts — 103
 - 7.3 Fill Rate Model — 106
 - 7.4 Impact of Order Cycle Length — 114
 - 7.5 Simulation — 118
 - 7.6 Recap — 121

- 8 Cost and Service Level Optimization — 122**
 - 8.1 Profits and Losses — 122
 - 8.2 (R, S) Policy — 124
 - 8.3 (s, Q) Policy — 133
 - 8.4 Simulation — 137
 - 8.5 Recap — 144

- 9 Beyond Normality — 145**
 - 9.1 When Normality Fails — 145
 - 9.2 Skewness — 149
 - 9.3 Gamma Distribution — 150
 - 9.4 Distribution Selection — 155
 - 9.5 Impact on Inventory Policies — 159
 - 9.6 Simulation — 170
 - 9.7 Recap — 175

- 10 Multi-Echelon Inventory Optimization — 176**
 - 10.1 Supply Chain Network Topology — 176
 - 10.2 Local vs. Global Inventory Optimization — 178
 - 10.3 Multi-Echelon Inventory Optimization — 184
 - 10.4 Serial Supply Chains Using GSM — 186
 - 10.5 Simulation — 195
 - 10.6 Distribution Supply Chains Using GSM — 198
 - 10.7 A Brief History of the Guaranteed-Service Model — 201
 - 10.8 Recap — 203

Part IV: Discrete Inventory Optimization

- 11 Newsvendor — 207**
 - 11.1 A Question of Chocolate Muffins — 207
 - 11.2 Newsvendor Model — 211
 - 11.3 Newsvendor Model Optimization — 215
 - 11.4 Recap — 224

- 12 Discrete Probabilistic Demand — 225**
 - 12.1 Histograms — 225
 - 12.2 Kernel Density Estimation — 228
 - 12.3 From Gaussian Kernels to Discrete Distributions — 235
 - 12.4 Recap — 240

- 13 Simulation Optimization — 241**
 - 13.1 Safety Stock Optimization — 241
 - 13.2 Complex Policies Optimization — 252
 - 13.3 Stability — 257
 - 13.4 Recap — 259

Now It Is Your Turn! — 260

- A Python — 261**

- B Proofs — 268**
 - B.1 Sum of a Random Number of Random Variables — 268
 - B.2 Normal Loss function — 269
 - B.3 Loss Function Derivative — 272
 - B.4 Cost Optimization — 273
 - B.5 Discrete Newsvendor Optimization — 275

Bibliography — 279

Glossary — 283

List of Symbols — 287

Index — 291
