List of authors — XI

Joschka Haltaufderheide, Johanna Hovemann and Jochen Vollmann
1 The challenge ahead — 1
1.1 Introduction — 1
1.2 The promise of socially assistive technologies — 2
1.3 About this volume — 4
1.4 Acknowledgment and funding information — 7

Part I: Foundations of discussion – The value of caring relationships

Claudia Dinand, Margareta Halek
2 Challenges in interacting with people with dementia — 13
2.1 Introduction — 13
2.2 What is exactly *this* behavior that challenges? — 14
2.3 The nursing perspective — 18
2.4 The AMEO-FTD project — 22
2.5 Case description – Mealtime at Mister and Misses B's — 23
2.5.1 Background — 23
2.5.2 Intro: The table is set – starting with a "still" – time code: 00:00:01 — 23
2.5.3 Sequence: Coming into the room – timecode: 00:00:01–00:00:16 — 25
2.5.4 Sequence: Starting the meal – timecode 00:00:16–00:00:40 — 25
2.5.5 Sequence: Diverse interests – eating and keeping contact – timecode 00:00:40 – 00:02:10 — 27
2.5.6 Concluding considerations — 29
2.6 Conclusion — 30

Andrea Bertolini, Shabahang Arian
3 Do robots care? — 35
3.1 Introduction — 35
3.2 Care vs. cure — 36
3.2.1 Care is relational — 37
3.2.2 Care is a deeply engaging emotion — 38
3.2.3 Care is a virtue — 39
3.2.4 Care for the elderly — 39

Bibliografische Informationen
http://d-nb.info/1196649766

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

3.3 The need for robot carers — 40
3.4 Care robotics and assistive technologies: An overview — 40
3.5 The functions of care robots — 41
3.6 The ethical admissibility of caring through technology — 44
3.6.1 Does technology care? — 44
3.6.2 Dehumanization through isolation: A potential risk — 45
3.7 Human dignity as an ethical and legal concept — 46
3.8 Discussion and conclusions — 47

Svenja Wiertz
4 Trusting robots? — 53
4.1 Types of care robots and the possibility of replacement — 53
4.2 Trust — 54
4.3 Reliance — 57
4.4 Trust, reliance and valuable life options — 58
4.5 Broken trust and disappointed reliance — 58
4.6 Intermediary conclusion: On the possibility of replacement — 60
4.7 Trust, vulnerability and dependence — 61
4.8 Vulnerability and types of risks — 62
4.9 Potential and limitations of assistive technology devices — 64

Part II: Practical insights

Anna Haupeltshofer, Pascal Meier
5 Promoting eHealth literacy — 71
5.1 Introduction — 71
5.2 Background: eHealth literacy and socio-technical systems — 73
5.3 Multi-perspective research approach — 74
5.3.1 Perspective nursing science — 75
5.3.2 Perspective information systems — 77
5.4 Integration of the concepts *Digital Nurse* and *FeelFit* — 79
5.5 Discussion — 81
5.6 Conclusion — 83
5.7 Acknowledgments and funding information — 83

Amelie Altenbuchner, Karsten Weber
6 Geriatric trauma patients as research subjects in a technology-driven research project — 87
6.1 Introduction — 87
6.2 The research project: Motion monitoring of geriatric trauma patients – explorative study on the rehabilitation process after hip fracture using sensor-based data — 89
6.3 The Patients — 92
6.3.1 Geriatric trauma patients as research subjects — 92
6.3.2 Recruitment — 94
6.3.3 Process of obtaining informed consent — 95
6.3.4 Rejection and cancellation of participation — 96
6.4 Summary — 97
6.5 Lessons learned for future research — 98
6.6 Acknowledgments and funding information — 100

Angelika Schley, Katrin Balzer
7 Using MEESTAR for early evaluation of ethical, legal and social implications of a socio-technical support system for mechanically ventilated patients — 105
7.1 Introduction — 105
7.2 Methods — 110
7.3 Results — 114
7.4 Discussion — 117
7.5 Conclusion — 119
7.6 Ethical Statement — 120
7.7 Acknowledgment and funding information — 120

Part III: Users' expectations and needs-based development

Sarah Palmdorf, Christoph Dockweiler
8 Challenges arising from the use of assistive technologies by people with dementia in home care arrangements — 125
8.1 Introduction — 125
8.2 Formation and expression of an informed consent — 127
8.3 Effects and side effects of assistive technologies — 128
8.3.1 Resource access and equal opportunities — 129
8.3.2 Ethical problems in using global positioning systems (GPS) — 130
8.3.3 Challenges in user orientation and participation — 131
8.4 Demands on the technologies and users — 133
8.5 Practical implications of ethical discourse — 134

Julia A. Hoppe, Rose-Marie Johansson-Pajala, Christine Gustafsson, Helinä Melkas, Outi Tuisku, Satu Pekkarinen, Lea Hennala, Kirsten Thommes
9 Assistive robots in care: Expectations and perceptions of older people — 139
9.1 Introduction — 139
9.2 Contemporary demographic and technological development — 141
9.2.1 Robots in elderly care – a brief review — 142
9.2.2 Meeting problems, needs and challenges of robots in elderly care — 143
9.3 Method — 145
9.3.1 Design — 145
9.3.2 Participants, procedure and data analysis — 145
9.4 Results — 147
9.4.1 Independence and safety — 148
9.4.2 Physical and mental assistance — 148
9.4.3 Communication and socialization — 148
9.4.4 Relief to nursing staff — 149
9.4.5 Individual's right to decide — 149
9.4.6 Data protection — 150
9.4.7 Liability — 150
9.5 Discussion — 150
9.6 Conclusion — 151
9.7 Acknowledgment and funding information — 153

Part IV: Challenging classical concepts

Iris Loosman
10 Rethinking consent in mHealth: (A) Moment to process — 159
10.1 Introduction — 159
10.2 Background — 160
10.3 Rethinking consent in mHealth: Why, what and how? — 161
10.3.1 mHealth's functions — 162
10.3.2 Improved autonomous authorization — 164
10.3.3 Meaningful consent: Temporal distribution — 165
10.4 Towards design — 167
10.5 Concluding reflections — 168
10.6 Acknowledgment and funding information — 168

Bettina Schmietow
11 Reconfigurations of autonomy in digital health and the ethics of (socially) assistive technologies — 171
11.1 Introduction — **171**
11.2 Autonomy in existing evaluative frameworks — **173**
11.3 Reconfigurations of autonomy in digital health and assistance — **176**
11.3.1 A multi-stage model of enhanced autonomy — **177**
11.3.2 Consumer autonomy, empowered care, and democratized medicine — **178**
11.3.3 Ambivalences and limitations — **179**
11.4 Conclusion — **181**
11.5 Acknowledgment and funding information — **182**

Ricardo Morte, Mario Toboso, Manuel Aparicio, Txetxu Ausín, Aníbal Monasterio, Daniel López
12 Personal autonomy in elderly and disabled: How assistive technologies impact on it — 185
12.1 Introduction — **185**
12.2 Technological mediation and the capability approach — **187**
12.3 Current frameworks on the rights of the elderly and persons with disabilities — **188**
12.4 Rethinking autonomy in technological functionings environments — **189**
12.4.1 Privacy and data protection — **191**
12.4.2 Data protection targets — **191**
12.4.3 Data protection impact assessment — **192**
12.5 On the recognition of new human rights: 'Neurorights' and cognitive liberty — **194**
12.5.1 The right to mental privacy — **194**
12.5.2 The right to mental integrity — **194**
12.5.3 The right to psychological continuity — **195**
12.6 Conclusions — **195**
12.7 Acknowledgments and funding information — **196**

Part V: Broadening the perspective

Hartmut Remmers
13 Technical utopias – political illusions? — 201
13.1 Introduction — **201**
13.2 Starting Position — **202**
13.3 Path Dependency of Technology Development — **203**
13.3.1 Political Preferences: Technology Promotion Versus Nursing Promotion — **205**
13.3.2 Premises of Different Rationalization Logics — **206**
13.4 Conditions for Technological Innovation in Support of Older people — **207**
13.4.1 Phenomena of ageing and old age — **207**
13.4.2 Some typological characteristics of nursing work processes — **210**
13.5 On the State of Development of Autonomous Assistance Systems — **211**
13.5.1 AAL-Technologies — **212**
13.5.2 Robotic — **212**
13.6 The Needs and Expectations of Older People in Need of Care — **213**
13.7 Paradigm Shift in Health Policy Innovations — **214**
13.8 Quintessence — **217**

Björn Lundgren
14 Against AI-improved Personal Memory — 223
14.1 Introduction — **223**
14.2 Background — **223**
14.3 The challenge of analyzing future technology — **225**
14.4 Assessing the APM — **226**
14.5 Summation and concluding discussion — **231**
14.6 Acknowledgment and funding information — **232**
