

Table of Contents

SESSION 1: FUNDAMENTALS

Oxygen Evolution as a Side Reaction – Useless and Mysterious?11

Lohrengel, M. M.

Investigation of the oxide film formed on solid state silicon carbide ceramics at high anodic potentials16

Schneider, M.; Simunkova, L.; Michaelis, A.; Noeske, M.; Aniol, J.; Thiel, K.

ECM flow-channel cell experiments of molybdenum in NaNO₃ electrolyte.....24

Hoogsteen, W.

An insight into anodic dissolution processes of carbides obtained by product analysis30

Simunkova, L.; Schneider, M.; Michaelis, A.

SESSION 2: PROCESSING/PROCESS MONITORING I

The State of the Art in Electrochemical Machining Process Applications in Micro-Manufacturing37

Ruszaj, A.; Cygnar, M.

Hole widening by a static cathode arrangement by means of ECM with several equally or differently powered cathodes44

Schulze, H.-P.; Herzig, M.; Schätzing, W.; Kröning, O.

Safety Adaptations of the ECM Process and Associated Processes for Industrial Application 50

Wilhelm, L.; Leese, R.

Visualization of ECM phenomena in stationary electrolyte using stamp flushing method 55

Nakamura, M.; Kunieda, M.

Influence of initial geometric deviations on the shaping accuracy during electrochemical machining 61

Bergs, T.; Rommes, B.; Harst, S.; Herrig, T.; Klink, T.

SESSION 3: NEW METHODS I

Surface finish of AM copper parts by Plasma electrolytic Polishing 68

Zeidler, H.; Helm, A.

Investigation on material removal characteristics of a novel hybrid laser-electrochemical micromachining process 75

Kumar Saxena, K.; Qian, J.; Reynaerts, D.

Ultrasonic-assisted Plasma-electrolytic Polishing 83

Zeidler, H.; Böttger-Hiller, F.

Improving surface integrity of small holes in nickel-based superalloy by electrochemical discharge drilling 89

Zhang, C.; Xu, Z.

SESSION 4: MATERIALS

Electrochemical dressing of hard tools for abrasive precision machining96

Ernst, A.; Klein, S.; Hall, T.; Avila, L.; Bähre, D.

Investigating characteristics of tungsten cemented carbide machining by desktop micro-ECM with NaOH Solution..... 104

Wu, Y.; Dong-Yea, S.

Study on the electrochemical dissolution behavior of Ti-45Al-2Mn-2Nb+0.8 vol% TiB₂ XD alloy in different solutions..... 110

Wang, Y.; Xu, Z.; Zhang, A.

Microstructuring of Inconel 718 via Pulse Electrochemical Machining 116

Ernst, A.; Hall, T.; Frank, A.; Derouach, H.; Bähre, D.

SESSION 5: NEW METHODS II

Process Design for Jet Plasma electrolytic Polishing of Stainless Steel 125

Quitze, S.; Martin, A.; Hackert-Oschätzchen, M.; Zeidler, H.; Schubert, A.

Enhancing dimensional accuracy of electrochemical microtexturing process using triangular pulsed voltage..... 133

Patel, D.; Sharma, V.; Jain, V. K.; Ramkumar, J.

Removal rate and surface roughness in plasma-electrolytic polishing of 1.4441 stainless steel..... 140

Schröder, S.; Martin, A.; Kahle, V.; Hackert-Oschätzchen, M.; Schubert, A.

Wire Electrochemical Turning: A novel approach for the machining of cylindrical surfaces 147

Sharma, V.; Patel, D.; Ramkumar, J.

Classification and evaluation of optical phenomena in Jet-PeP with respect to the characteristic of plasma electrolytic polishing 153

Kranhold, C.; Schulze, H.-P.; Kröning, O.; Zeidler, H.

SESSION 6: PROCESSING/PROCESS MONITORING II

Investigation of the electrolyte behaviour in the working gap of Mechano-Electrochemical Milling 160

Van Camp, D.; Qian, J.; Vetrano, M. R.; Vleugels, J.; Lauwers, B.

Mechanism-based classification of electrochemical machining processes. 166

Klink, A.; Rommes, B.; Zander, D.; Schupp, A.; Vollertsen, F.; Eckert, S.

Deburring and Edge Shaping by Electrochemical Machining with Differentially Switched Currents 172

Petzold, T.; Hackert-Oschätzchen, M.; Martin, A.; Schubert, A.

Fabrication and Application of Micro Structured Tools for Pulsed Electrochemical Machining 180

Mankeekar, T.; Bähre, D.; Durmeata D.; Engelmann, E.; Hall, T.; Natter, H.; Saumer, M.

SESSION 7: SIMULATION AND MODELLING

**Masked jet electrochemical micromachining (Jet- μ ECM) of micro-slit array:
Numerical simulation and experiments 186**

Chen, X.; Kumar Saxena, K.; Qian, J.; Reynaerts, D.

**Modelling of Precise Electrochemical Machining for Nickel-based Centrifugal
Impellers..... 193**

*Loebel, S.; Hackert-Oschätzchen, M.; Meichsner, G.; Petzold, T.; Zinecker, M.;
Schubert, A.*
