Executive Summary	1
1 Introduction	3
2 Challenges and importance of water resources in light of global sustainability	4
2.1 Local and regional aspects of sustainable water use	5
2.2 Global challenges of sustainable water use	6
2.3 Freshwater resources as a global commons?	7
3 Global water governance: Taking stock of a fragmented architecture	10
3.1 International norms	11
3.1.1 Regimes on transboundary waters	12
3.1.2 Norm-based global water institutions	14
3.2 International targets	15
3.2.1 The Sustainable Development Goals	15
3.2.2 A planetary boundary as a limit to global water use	17
3.3 Paradigms: River basin management and Integrated Water Resources Management (IWRM)	18
3.4 Central actors: Roles and responsibilities	19
3.4.1 UN-Water	20
3.4.2 High-level political bodies	21
3.4.3 International platforms and conferences	22
3.4.4 Private sector initiatives	23
3.5 Gaps and demand for regulation	24
4 The role and contribution of Germany	26
4.1 Contributions by Germany	27
4.2. Contributions with Germany	29
5 Transformation processes	30
5.1 Short-term options	31
5.2 Medium-term options	32
5.3 Long-term options	33
6 Conclusion	34
