

Table of Contents

1	Introduction	1
2	Literature Review	3
2.1	Microstructure of 7XXX Alloys	3
2.2	Environmentally Assisted Cracking in Humidity	9
2.2.1	Definition of Environmentally Assisted Cracking	10
2.2.2	State of the Art Testing of EAC in humid environments.....	11
2.2.3	Definition of Crack initiation and crack propagation for this study.....	15
2.2.4	EAC mechanism of Aluminium Alloys in Humidity	15
3	Scope of Testing and Experimental Procedure	33
3.1	7XXX Alloys used for the Experimental Part	33
3.2	Test Setup	38
4	Results and Discussion	43
4.1	EAC _{wv} Tests According to AITM	43
4.2	Effect of Humidity on the Time to Failure	55
4.3	Effect of Temperature on Time to Failure	66
4.4	Crack Initiation.....	71
4.4.1	Effect of Load.....	78
4.4.2	Effect of Humidity.....	81
4.4.3	Effect of Temperature	95
5	Proposal of EAC_{wv} mechanism in 7XXX Alloys	101
5.1	Susceptible Alloy B.....	104
5.2	Non-sensitive Alloy A.....	106
5.3	Similarities and Key Differences of Alloys.....	108
6	Conclusions and Future Work	113
7	Bibliography	119
8	List of Figures and Tables	134
9	Appendix	141
9.1	EAC mechanisms proposed in literature.....	141
9.2	Effect of Condensation on the EAC lifetime	145
9.3	Chemical Composition and Mechanical Properties of Tested Material.....	146
9.4	Stressing Procedure for Constant Load and Constant Displacement Setup	147
9.5	Raw Data of EAC Lifetime	149
9.6	Calculation of Time for EAC _{wv} propagation in Smooth Samples.....	150
9.7	EDX Analysis of Constituent Phases in Alloy A and Alloy B	151
9.8	XPS Depth Profiles on the Surface of Alloy A and Alloy B	153
