List of Figures	xiii
Abbreviations	xvii
Symbols	xix
1 Introduction	1
1.1 Motivation	2
1.2 Related Work	3
1.3 Contribution and Structure of this Work	10
2 Pore Space Imaging	13
2.1 Confocal Microscopy	13
2.2 Serial Sectioning	20
2.3 X-Ray Computed Tomography	27
2.4 Stochastic Reconstruction	34
3 Characterization of Porous Material	39
3.1 Statistical Probability Functions	40
3.1.1 n-Point Probability Function	43

3.1.2	Lineal-Path Function	47
3.1.3	Pore Size Distribution	50
3.2	Minkowski Functionals	52
3.2.1	Volume	54
3.2.2	Surface Area	55
3.2.3	Integral of Mean Curvature	56
3.2.4	Integral of Total Curvature	57
4	Hybrid Reconstruction	59
4.1	Data Acquisition	60
4.2	Noise Reduction	62
4.3	Three-dimensional Registration	65
4.3.1	Phase Correlation	66
4.3.2	Sub-Voxel Phase Correlation	68
4.4	Pore Space Segmentation	74
4.4.1	Thresholding based on the Material Ratio Curve	75
4.4.2	Adaptive Local Thresholding	77
4.5	Stochastic Reconstruction based on Simulated Annealing	77
4.5.1	Annealing Schedules	81
4.5.2	Pixel Swapping	85
4.5.3	Hierarchical Reconstruction	89
4.5.4	Post-Processing	93
5	Results	95
5.1	Sample Materials	95
5.1.1	Confocal Laser Scanning Microscopy Data	96
5.1.2	Computed Tomography Data	97
5.2	Three-dimensional Registration	101
5.2.1	Evaluation Methods	102
5.2.2	Simulation Results	103
5.2.3	Experimental Results	111
5.2.4	Discussion	113

5.3	Stochastic Reconstruction	116
5.3.1	Evaluation Methods	117
5.3.2	Simulation Results	119
5.3.3	Experimental Results	129
5.3.4	Further Studies	135
5.3.5	Discussion	140
6	Conclusion and Outlook	143
	Bibliography	147
	Appendix	171
A.1	Parameter Study for Three-Dimensional Reconstruction	173
A.2	Supplementary Data: Registration Results	174
A.3	Supplementary Data: Stochastic Reconstruction Results	178
