

## Contents

Symbols .....	VIII
1 Introduction .....	1
2 State of the art .....	3
2.1 Properties and uses of aluminum .....	3
2.2 Process classification of aluminum die casting .....	4
2.3 Types of aluminum melting furnaces used in die casting .....	5
2.3.1 Crucible furnace .....	6
2.3.2 Reverberatory furnace .....	7
2.3.3 Gas stack furnace .....	8
2.4 Development of the modern melting furnace .....	9
2.5 Measurement methods for spatial shape detection .....	11
2.5.1 Time-of-flight (TOF) principle .....	12
2.5.2 Interferometry principle .....	13
2.5.3 Triangulation principle .....	14
2.6 3D light-field camera .....	17
2.6.1 Development of light-field function .....	17
2.6.2 Concept of light-field camera .....	18
2.6.3 Image reconstruction with light-field camera .....	22
2.7 Statistical method for outlier detection .....	25
2.8 Mathematical foundations of geometric modeling .....	26
2.8.1 Surface modeling .....	27
2.8.2 Uncertainty analysis .....	29
3 Problem statement, research hypothesis, and objectives .....	34
4 Test setup .....	36
4.1 Melting furnace .....	38
4.2 Selection of optical systems for monitoring melting process .....	40
4.3 3D light-field camera .....	41
4.4 3D light-field camera calibration .....	42
4.4.1 Microlens array (MLA) calibration .....	43
4.4.2 Metric calibration .....	44
4.4.3 Checking camera calibration .....	46

---

4.4.4	Eliminating outlier data .....	47
4.5	Developing programmable logic controller (PLC) interface for automatic image acquisition.....	48
5	Methods, techniques, and results.....	53
5.1	Developing analysis software for continuous real-time monitoring of aluminum state in furnace .....	53
5.1.1	Initial checking of captured data .....	58
5.1.2	Height analysis results.....	60
5.1.3	Volume analysis results .....	60
6	Modeling and prediction of an aluminum melting process*.....	64
6.1	Different methods of approximation and interpolation .....	66
6.2	Curve modeling and error calculation across aluminum surface with cubic spline interpolation .....	67
6.3	Surface modeling of aluminum with cubic spline interpolation .....	68
6.4	Curve modeling across aluminum surface with Newton polynomial interpolation ..	70
6.5	Curve modeling across aluminum surface with least squares approximation .....	72
6.6	Error calculation for Newton interpolation and least squares approximation.....	73
6.7	Surface modeling of aluminum with least squares approximation .....	77
6.8	Analyzing and assessing model .....	79
6.8.1	Results of distribution fitting .....	81
6.8.2	Results of Monte Carlo method .....	85
6.8.3	Results of model validation .....	86
7	Conclusion and outlook.....	90
8	References .....	94
9	Appendix.....	104
	Lebenslauf.....	107
