

Contents

Chapter – 1: Luminaire Technology

1.1. Terminology and Geometry	02
1.2 The spectral sensitivity of the eye	10
1.3 Lamps: LED	12
1.4. Luminaires	20
1.5 Performance requirements, measurement and calculation methods	25
1.6 Light Pollution	32

Chapter – 2: Dynamic light

2.1. Light Characteristics for Dynamic Light Control	36
2.2. Lighting Management	41
2.3. Control Strategies	44

Chapter – 3: Dynamic Light and Energy efficiency

3.1. Influence of Different Dimming Strategies on Energy Efficiency	46
3.2. Influence of Various Electrical Equipment Including LEDs and Their Effects on Energy Consumption.	50
3.3. Energy Management and Monitoring	52
3.4 Case Study: Test Implementation Rostock	71
