

Table of Contents Volume 1 – Biomedical Methods

Preface — V

Acknowledgment — VII

Contributing Authors — XV

M. Lekka, D. Navajas, A. Podestà, M. Radmacher

1 Introduction — 1

Soft Matter Mechanics

Daniel Navajas, Manfred Radmacher

2.1 Introduction to Viscoelasticity — 9

Leda Lacaria, Alessandro Podestà, Manfred Radmacher, Felix Rico

2.2 Contact Mechanics — 21

Instruments and Methods

Ignacio Casuso, Matteo Chighizola, Hatice Holuigue, Ewelina Lorenc,
Alessandro Podestà, Manfred Radmacher, Felix Rico, Jorge Rodriguez-Ramos

3.1 Atomic Force Microscope AFM — 67

Felix Rico, Ignacio Casuso, Manfred Radmacher

3.1.1 AFM Instrumentation — 69

Ewelina Lorenc, Hatice Holuigue, Felix Rico, Alessandro Podestà

3.1.2 AFM Cantilevers and Tips — 87

Matteo Chighizola, Jorge Rodriguez-Ramos, Felix Rico, Manfred Radmacher,
Alessandro Podestà

3.1.3 AFM Calibration Issues — 105

Nelda Antonovaite, Massimiliano Berardi, Kevin Bielawski, Niek Rijnveld

3.2 Fiber-Optics-Based Nanoindenters — 129

Pouria Tirgar, Allen J. Ehrlicher

3.3 Optical Tweezers and Force Spectrum Microscopy — 147

Peng Li, Anita Wdowicz, Conor Fields, Gil Lee

3.4 Magnetic Tweezers: From Molecules to Cells — 167

Jorge Otero, Daniel Navajas

3.5 Cell and Tissue Stretcher — 187

Joanna Zemła, Yara Abidine, Claude Verdier

3.6 Microrheology — 199

Chau Ly, Tae-Hyung Kim, Amy C. Rowat

3.7 Fluidic Approaches to Measure Cellular Deformability — 217

Sébastien Janel, Vincent Dupres, Lorena Redondo-Morata,
and Frank Lafont

**3.8 Progresses in Correlative Microscopy and Techniques for AFM in
Biomechanics — 239**

Subject Index (Volume 1 & Volume 2) — 259
