Preface — V

1 Preliminaries — 1

- 1.1 Topological preliminaries — 2
 - 1.1.1 Local fundamental groups and homology groups — 2
 - 1.1.2 Cohomology with compact supports — 3
 - 1.1.3 Duality for singular varieties — 4
 - 1.1.4 Theorem of Kaup–Narasimhan–Hamm — 5
 - 1.1.5 Ehresmann’s fibration theorem — 5
 - 1.1.6 Results of M. Nori and Xiao Gang — 6
 - 1.1.7 Some more results on the topology of an algebraic variety — 8
 - 1.1.8 Suzuki–Zaidenberg formula for the topological Euler–Poincaré characteristic — 10
 - 1.1.9 Fixed point locus of a G_α -action — 10
 - 1.1.10 An application of topological method — 10
- 1.2 Logarithmic Kodaira dimension and characterizations of affine spaces — 11
- 1.3 Topological approaches to affine surfaces — 17
 - 1.3.1 Derivations and vector fields — 17
 - 1.3.2 G_α -actions on \mathbb{A}^n — 18
 - 1.3.3 The Makar-Limanov invariant and affine lines on ML_i surfaces — 21
 - 1.3.4 Ascent and descent of ML_0 property — 22
 - 1.3.5 \mathbb{A}^1 -fibration over a complete curve — 23
 - 1.3.6 The AMS theorem — 23
 - 1.3.7 The Lin–Zaidenberg theorem — 24
 - 1.3.8 Smooth affine surfaces with an \mathbb{A}_*^1 -fibration — 24
 - 1.3.9 Theorem of Mumford — 25
 - 1.3.10 Theorem of Ramanujam — 27
 - 1.3.11 Some more applications of Mumford’s ideas — 28
 - 1.3.12 Surfaces with finite fundamental group at infinity — 29
 - 1.3.13 A topological characterization of \mathbb{A}^2/G — 31
 - 1.3.14 Cofinite subalgebras of $\mathbb{C}[x, y]$ — 32
- 1.4 Proofs of AMS and Lin–Zaidenberg theorems — 32
 - 1.4.1 Necessary results from theory of open algebraic surfaces — 32
 - 1.4.2 Proof of AMS theorem — 35
 - 1.4.3 Proof of Lin–Zaidenberg theorem — 38
- 1.5 Problems for Chapter 1 — 41

2 Algebraic surfaces with fibrations — 57

- 2.1 \mathbb{A}^1 -fibrations and \mathbb{P}^1 -fibrations — 59

2.2	G_a -actions on affine varieties and locally nilpotent derivations — 67
2.2.1	G_a -actions, quotient morphisms, and \mathbb{A}^1 -fibrations — 67
2.2.2	More results on group actions — 74
2.2.3	Liftability of G_a -actions under finite extensions — 78
2.2.4	Liftability of derivations for finite extensions and Scheja–Storch theorem — 82
2.2.5	Locally finite derivations — 85
2.3	Proper G_a -actions and Seshadri theorem — 91
2.4	G_a -actions on projective varieties — 101
2.4.1	Vector fields on projective varieties — 101
2.4.2	Unipotent varieties — 108
2.4.3	Affine varieties with abundant G_a -actions — 116
2.4.4	G_a -actions on projective varieties and orbit stratifications — 124
2.5	Fibrations on algebraic surfaces — 132
2.6	ML_0 -surfaces — 140
2.6.1	Gizatullin theorem — 140
2.6.2	Topology and structure of ML_0 -surfaces — 144
2.6.3	An analogue of Abhyankar–Moh–Suzuki theorem — 149
2.7	ML_1 -surfaces — 157
2.7.1	Boundary divisors of ML_1 -surfaces — 157
2.7.2	ML_j -property and j -ruledness — 160
2.7.3	Exhaustion of affine lines in ML_1 -surfaces — 163
2.8	Topology and geometry of ML_0 -surfaces — 164
2.8.1	Ascent and descent of the ML_0 -property — 164
2.8.2	Universal coverings of ML_0 -surfaces with $\rho = 0$ — 171
2.8.3	Derksen invariants and ML_0 -surfaces — 172
2.8.4	ML_0 -surfaces not containing \mathbb{A}^2 — 174
2.9	Deformations of \mathbb{A}^1 -fibrations — 179
2.9.1	Motivation — 179
2.9.2	Triviality of deformations of locally nilpotent derivations — 181
2.9.3	Deformations of \mathbb{A}^1 -fibrations of affine type — 184
2.9.4	Topological arguments instead of Hilbert schemes — 201
2.9.5	Deformations of ML_0 -surfaces — 202
2.9.6	Deformations of \mathbb{A}^1 -fibrations of complete type — 207
2.10	Problems for Chapter 2 — 211
3	Fibrations in higher dimension — 227
3.1	\mathbb{A}^1 -fibrations in higher dimension — 229
3.1.1	Motivation and summary of principal results — 229
3.1.2	\mathbb{A}^1 -fibrations and G_a -actions in higher dimension — 231
3.1.3	\mathbb{A}^1 -fibrations over surfaces — 238
3.1.4	Fixed point locus of G_a -actions — 247

- 3.1.5 Degenerate fibers of the quotient morphism and singularities of the quotient space — **250**
- 3.1.6 Kernel of a vector field on $k[x, y, z]$ — **256**
- 3.2 Homology and contractible spaces — **260**
- 3.2.1 A topological proof of $\mathbb{A}^3//G_a \cong \mathbb{A}^2$ — **260**
- 3.2.2 Homology 3-spaces with \mathbb{A}^1 -fibrations — **264**
- 3.3 \mathbb{A}_*^1 -fibrations in higher dimension — **270**
- 3.3.1 \mathbb{A}_*^1 -fibration — **270**
- 3.3.2 Contractible 3-spaces with \mathbb{A}_*^1 -fibrations — **285**
- 3.4 Algebraic varieties with \mathbb{A}^n -fibrations — **292**
- 3.4.1 Varieties of dimension $n + 1$ with \mathbb{A}^n -cylinders — **292**
- 3.4.2 Hypersurfaces $x^m y = f(x, z_1, \dots, z_{n-1})$ — **297**
- 3.4.3 The ML-invariant of affine pseudo-3-spaces — **302**
- 3.5 More on G_a -actions on affine threefolds — **308**
- 3.5.1 Supplements on \mathbb{P}^1 -fibrations — **308**
- 3.5.2 The quotient surface of a smooth affine threefolds by G_a -actions — **311**
- 3.5.3 Singularities of the quotient surface $X//G_a$ — **313**
- 3.5.4 Makar-Limanov invariant — **316**
- 3.5.5 Singular fibers of the G_a -quotient morphism — **317**
- 3.5.6 Locus of singular fibers — **322**
- 3.6 Problems for Chapter 3 — **322**
- 3.7 Open problems — **330**

Bibliography — 333

Index — 343
