Preface	xvi
Contributors	xvii

Section 1 Tendon Surgery

1. Management of Complications of Flexor Tendon Surgery	2		
<i>Peter C. Amadio and Duncan Angus McGrouther</i>			
1.1 Management of Flexor Tendon Adhesions	2	1.3 Rupture	9
1.1.1 Definition/Problem: Current Understanding of the Biology of Adhesion Formation	2	1.3.1 The Problem	9
1.1.2 Treatment	3	1.3.2 Management of Patient with Rupture Presenting Early after Tendon Repair	11
1.1.3 Rehabilitation	5	1.3.3 Rehabilitation	14
1.1.4 Tips and Tricks	5	1.3.4 Tips and Tricks	14
1.1.5 Conclusions	6	1.3.5 Conclusion	15
1.2 Bowstringing	6	1.4 Infection after Flexor Tendon Repair ..	15
1.2.1 Definition/Problem	6	1.4.1 The Problem	15
1.2.2 Treatment	7	1.4.2 Management	16
1.2.3 Rehabilitation	9	1.4.3 Rehabilitation	18
1.2.4 Tips and Tricks	9	1.4.4 Tips and Tricks	18
1.2.5 Conclusion	9	1.5 Take-Home Message	18
2. Management of Complications of Extensor Tendon Surgery	20		
<i>David Elliot and Thomas Giesen</i>			
2.1 Introduction	20	2.4.3 Punch Injury: Risk of Infection	26
2.2 Complications after Extensor Tendon Lesion Zone 1 and Zone 2	22	2.4.4 Sagittal Band Lesion	26
2.3 Complications after Extensor Tendon Lesion Zone 3 and Zone 4	24	2.5 Complications after Extensor Tendon Lesion Zone 7–Zone 9	27
2.4 Complications after Extensor Tendon Lesion Zone 5 and Zone 6	25	2.5.1 Zone 7	27
2.4.1 Tethering of the Tendons: Tenolysis	25	2.5.2 Zone 9	27
2.4.2 Tethering of the Nerves	26	2.6 Complication of the Thumb Extensor Tendons	27
		2.7 Take-Home Message	28

3.	Treatment of Complications after Surgical Management of Tenosynovitis	30		
	<i>Jin Bo Tang</i>			
3.1	Introduction	30	3.5	Recurrence of the Triggering 31
3.2	Nerve Injury	30	3.5.1	A1 Pulley Release 31
3.2.1	A1 Pulley Release	30	3.5.2	First Extensor Compartment Release 33
3.2.2	First Extensor Compartment Release	30	3.6	Percutaneous Trigger Finger Release 33
3.3	Bowstringing and Subluxation	31	3.7	Discussion 33
3.3.1	A1 Pulley Release	31	3.8	Take-Home Message 33
3.3.2	First Extensor Compartment Release	31		
3.4	Infection	31		

Section 2 Nerve Surgery

4.	Management of Complications in Sensory Nerve Surgery	36		
	<i>Pierluigi Tos, Alessandro Crosio, and Simona Odella</i>			
4.1	No Recovery or Incomplete Sensory Recovery	36	4.4	Cold Intolerance 38
4.1.1	Definition	36	4.5	Painful Neuropathies 38
4.1.2	Treatment	36	4.5.1	Definition 38
4.1.3	Rehabilitation	36	4.5.2	Diagnosis 38
4.2	Neuropathy	37	4.5.3	Principles of Treatment 39
4.3	Hyperalgesia/Hyperesthesia	37	4.6	Rehabilitation—Sensory Desensitization 42
4.3.1	Diagnosis	38	4.7	Take-Home Message 42
5.	Management of Complications of Surgery of the Median, Ulnar, and Radial Nerves in the Forearm	44		
	<i>Erik Walbeehm and Dominic Power</i>			
5.1	Introduction	44	5.5	Sensory Recovery 48
5.2	Optimizing the Nerve Repair	44	5.5.1	Sensory Nerve Transfer 49
5.3	Normal Recovery	44	5.6	Motor Recovery 49
5.3.1	Timing of Normal Recovery	45	5.6.1	Motor Nerve Transfer 49
5.4	Problems with Recovery	45	5.6.2	Tendon Transfers for Paralysis Reconstruction 50
5.4.1	Neuropathic Pain	45	5.7	Distal Entrapment Following Proximal Repair 50
5.4.2	Scar	46	5.8	Follow-Up after Nerve Repair and Clinical Decision-Making 50
5.4.3	Neuroma Formation	46		
5.4.4	Surgical Management of Symptomatic Neuromas	47		

5.9	Management of Nerve Specific Problems	51	5.9.4	Combined Nerve Injury	54
5.9.1	Median Nerve	51	5.10	Failed Salvage Surgery	54
5.9.2	Ulnar Nerve	51	5.11	Take-Home Message	54
5.9.3	Radial Nerve.....	53			
6.	Management of Complications of Nerve Decompression Surgery	56			
6.1	Part A: Complications of Carpal Tunnel Release	56	6.2.1	Introduction	60
	<i>Daniel J. Nagle</i>		6.2.2	Surgery for Ulnar Neuropathy: Different Procedures and Potential Complications	61
6.1.1	Introduction.....	56	6.2.3	Persistence or Recurrence of CuTS despite Previous Surgery	63
6.1.2	Intraoperative Complications	56	6.2.4	Prevention and Management of Complications; Tips and Tricks	64
6.1.3	Postoperative Complications.....	57	6.2.5	Conclusions	65
6.2	Part B: Complications and Failure of Cubital Tunnel Surgery	60			
	<i>Godard C.W. de Ruyter</i>				
Section 3 Bone Surgery: Fracture					
7.	Management of Finger Fracture Complications	68			
	<i>Mick Kreulen</i>				
7.1	Finger Stiffness	68	7.3	Nonunion	75
7.1.1	Evaluation of the Stiff Finger.....	69	7.3.1	Treatment of Nonunions	77
7.1.2	Treatment of the Stiff Finger.....	70	7.4	Take-Home Message	78
7.2	Malunion	73			
7.2.1	Treatment of Malunions.....	73			
8.	Management of Complications in Carpal Fractures (Malunion, Nonunion)	79			
	<i>Florian M.D. Lampert, Ayla Hohenstein, and Max Haerle</i>				
8.1	Introduction	79	8.3.4	Types of Bone Grafts	82
8.2	Uncommon Carpal Fractures	79	8.3.5	Other Options for Proximal Pole Replacement	85
8.3	Scaphoid Fractures	80	8.3.6	Treatment Algorithm for Scaphoid Nonunion	86
8.3.1	(Patho-)Physiology of Fracture Healing in the Scaphoid.....	80	8.4	Osteosynthesis Devices	86
8.3.2	Complications in Fracture Healing	80	8.5	The Role of Arthroscopic Techniques	86
8.3.3	Surgical Interventions for Complication in the Healing Process	81	8.6	Take-Home Messages	87

9.	Management of Complications of Scaphoid Fracture Fixation	89		
	<i>Geert Alexander Buijze, Anne Eva J. Bulstra, and Pak Cheong Ho</i>			
9.1	Introduction	89	9.4.1	Tips and Tricks..... 102
9.2	Hardware Complications	89	9.5	Scaphoid Malunion
9.2.1	Tips and Tricks.....	90	9.5.1	Tips and Tricks..... 103
9.3	Scaphoid Nonunion	91	9.6	Miscellaneous Complications
9.3.1	Risk Factors	91	9.6.1	Nerve/Tendon Lesions/Infection
9.3.2	Treatment.....	94	9.7	Take-Home Message
9.3.3	Tips and Tricks.....	99		
9.4	Recalcitrant Scaphoid Nonunion ...	102		
10.	Management of Complications in Lunate Facet Fracture Fixation	105		
	<i>Simon B.M. MacLean and Greg I. Bain</i>			
10.1	Definition and Problem	105	10.5	Lunate Facet Fractures: The Tip of the Iceberg
10.2	Anatomy of the Fracture	105	10.6	Rehabilitation
10.3	Treatment: Management of Volar Rim Fractures	106	10.7	Salvage
10.3.1	Surgical Approach	106	10.8	Tips and Tricks
10.3.2	Fixation Techniques.....	107	10.9	Take-Home Message
10.4	Arthroscopy	110		
11.	Management of Complications Following Open Reduction and Plate Fixation of Distal Radius Fractures	114		
	<i>Niels W.L. Schep</i>			
11.1	Complications Related to the Surgical Approach	114	11.2.2	Lateral View..... 116
11.1.1	Neuromas due to the Volar Approach. .	114	11.3	Complications due to Plate and Screw Position
11.1.2	Posterior Interosseous Nerve and Tendon Problems due to the Dorsal Approach .	115	11.3.1	Volar Plating..... 117
11.2	Complications Related to the Quality of Reduction	115	11.4	Complications due to Infections ...
11.2.1	Posterior Anterior View	115	11.5	Take-Home Message

12. Management of Distal Radius Malunion	122
12.1 Part A: Planning: From Educated Guess toward Computer-Assisted Correction Osteotomies; Pitfalls and Complications.	122
<i>S.D. Strackee and J.G.G. Dobbe</i>	
12.1.1 Introduction.....	122
12.1.2 Diagnostics.....	122
12.1.3 Treatment.....	124
12.1.4 Navigation and Fixation	126
12.1.5 Take-Home Message	128
12.2 Part B: Practical Guideline: Malunion of Distal Radius	128
<i>Thomas Verschueren and Frederik Verstreken</i>	
12.2.1 Timing: Early versus Late	128
12.2.2 How to Do It.....	128
12.2.3 How to Deal with the Gap?.....	129
12.2.4 Ulna Shortening Osteotomy	131
12.2.5 Outcome	132
12.2.6 Complications	133
12.2.7 Rehabilitation	134
12.2.8 Tips and Tricks.....	134
12.2.9 Take-Home Message	134

Section 4 Bone Surgery: Arthritis

13. Treatment of Complications after Surgery for Finger Joint Arthritis	138
<i>Daniel B. Herren</i>	
13.1 Introduction	138
13.2 Complications in PIP and DIP Arthroplasty: Review of the Literature	138
13.3 Indication for Revision Surgery of Finger Arthroplasty	140
13.3.1 Implant Fracture or Loosening	140
13.3.2 Implant Malalignment	141
13.3.3 Other Causes of Revision	141
13.4 Solutions for Failed Finger Arthroplasty	141
13.4.1 Soft Tissue Revisions	142
13.5 Implant-Related Revisions	143
13.5.1 Silicone Implants	143
13.5.2 Two-Component Implants.....	143
13.6 Joint Fusion for Failed Implant Arthroplasty	144
13.7 Complications of PIP and DIP Fusion	144
13.8 Indication for Revision Surgery for Failed Finger Joint Fusion	145
13.9 Solutions for Failed Finger Joint Fusion	145
13.10 Take-Home Message	145
14. Management of Complications of Thumb CMC Surgery: Trapeziectomy, Arthrodesis, and Total Joint Arthroplasty	146
<i>Filip Stockmans</i>	
14.1 Introduction	146
14.2 Injury to Sensory Nerve Branches ..	146
14.3 Trapeziectomy with and without Ligamentoplasty	147
14.3.1 Incomplete Trapeziectomy.....	147
14.3.2 Scaphotrapezoid Arthritis	147
14.3.3 Problematic Subsidence of the Thumb Metacarpal	147
14.4 Trapeziometacarpal Arthrodesis ...	147
14.4.1 Nonunion	147
14.4.2 Hardware-Related Problems	148

14.4.3	Malpositioning and Reduced Mobility ..	148	14.5.2	Pyrocarbon Interposition Arthroplasty	149
14.4.4	STT Arthritis.....	148	14.6	Arthroscopy.....	149
14.5	Thumb Carpometacarpal Joint Arthroplasty	148	14.7	Take-Home Message.....	150
14.5.1	Total Joint Arthroplasty	148			
15.	Treatment of Complications of Midcarpal Joints Arthritis	152			
	<i>Eva-Maria Baur and Riccardo Luchetti</i>				
15.1	Introduction	152	15.2.6	Prosthesis/Spacer	154
15.2	Complications.....	152	15.2.7	Pain/CRPS	154
15.2.1	Infection	152	15.3	Stiffness.....	154
15.2.2	Hardware-Associated Problems	152	15.3.1	Causes of Stiffness	154
15.2.3	Malalignment	153	15.3.2	Treatment of Stiffness	155
15.2.4	Nonunion	153	15.4	Take-Home Message.....	157
15.2.5	Secondary OA	154			
16.	Management of Complications after Salvage Procedures of the Radiocarpal and Distal Radioulnar Joint	158			
	<i>Michel E. H. Boeckstyns, Peter Axelsson, Marion Burnier, Guillaume Herzberg, and Marjolaine Walle</i>				
16.1	Radiocarpal and Total Wrist Arthrodesis	158	16.2.2	Treatment of Complications	161
16.1.1	Definition of the Problem	158	16.2.3	Rehabilitation	162
16.1.2	Treatment of Complications: Nonunion and Hardware Problems.....	160	16.2.4	Tips and Tricks.....	163
16.1.3	Rehabilitation	160	16.3	The Distal Radioulnar Joint.....	163
16.1.4	Tips and Tricks.....	160	16.3.1	Definition of the Problem	163
16.2	Total and Interpositional Wrist Replacement.....	160	16.3.2	Treatment of Complications	164
16.2.1	Definition of the Problem	160	16.3.3	Tips and Tricks.....	165
			16.4	Take-Home Message.....	165
Section 5 Ligament Surgery					
17.	Management of Complications of Ligament Repair of Thumb and Finger Joints... ..	170			
	<i>Mike Ruettermann</i>				
17.1	Introduction	170	17.2.3	Long-Term Complications and Their Treatment.....	172
17.2	Indications for Surgery.....	170	17.3	Operative Technique.....	172
17.2.1	Short-Term Complications and Their Treatment.....	171	17.3.1	Preferred Method of Secondary Ligament Reconstruction of the Radial/Ulnar Collateral Ligament of the Thumb MCP Joint	172
17.2.2	Mid-Term Complications and Their Treatment.....	171			

17.4	Foreign Body Material	174	17.7	Diagnostic Pearls	175
17.5	Joint Specific Issues	174	17.8	Technical Tips	175
17.6	Take-Home Message	175			
18.	Treatment of Complications after Scapholunate Ligament Repair	176			
	<i>Marc Garcia-Elias, Mireia Esplugas, and Alex Lluch</i>				
18.1	Complication versus Mistake	176	18.2.3	Stiffness	179
18.2	Treatment of Complications after Scapholunate Ligament Repair	176	18.2.4	Tendon Complications	180
18.2.1	Loss of Scapholunate Reduction	176	18.2.5	Bony Problems	181
18.2.2	Loss of Carpal Reduction	179	18.2.6	Nerve Complications	182
			18.2.7	Infection	183
			18.3	Take-Home Message	183
19.	Management of Complications Following Surgery to the Triangular Fibrocartilage Complex	185			
	<i>Simon MacLean, Greg Bain, and Andrea Atzei</i>				
19.1	Introduction	185			
19.1.1	Definition and Causes of Complications Following TFCC Repair and Reconstruction	185	19.4	Addressing Bony Morphology	192
19.2	Clinical Assessment	186	19.4.1	Acute- on Chronic- with Positive Ulnar Variance	192
19.2.1	History and Examination	186	19.5	Avoiding Problems with TFCC Tears: Challenging Scenarios	192
19.2.2	Investigations	186	19.5.1	Missed TFCC Tear with Distal Radius Fixation	192
19.2.3	Arthroscopy	187	19.5.2	The Chronic TFCC Tear with DRUJ Instability	192
19.3	General Overview of Complications Following TFCC Repair and Reconstruction	188	19.5.3	The Chronic TFCC Tear with DRUJ Arthritis	194
19.3.1	Complications Following Repair of Superficial Tears	188	19.6	Algorithm	194
19.3.2	Complications Following Repair of Foveal Fibers	190	19.7	Take-Home Message	195
Section 6 Soft-Tissue Surgery					
20.	Complications Following Treatment of Dupuytren's Disease and Their Management	198			
	<i>Paul M.N. Werker and Ilse Degreef</i>				
20.1	Introduction	198	20.2	General Overview of Complications of Fasciectomy	199

20.2.1	Specific Complications of Limited Fasciectomy (LF).....	200	20.4	Complications of Treatment with Collagenase (CCH)	203
20.2.2	Specific Complications of Segmental Fasciectomy (SF).....	201	20.5	Complications after Treatment with Radiotherapy (RTX)	204
20.2.3	Specific Complications of Dermofasciectomy (DF)	202	20.6	Complications of Local Treatment ...	204
20.3	General Complications of Fasciotomy.....	202	20.7	Complications of Systemic Treatment.....	205
20.3.1	Specific Complications of Percutaneous Needle Fasciotomy (PNF)	202	20.8	Take-Home Message.....	205
20.3.2	Specific Complications of Open Fasciotomy (OF)	203			
21.	Management of Complications in the Treatment of Fingertip Injuries	207			
	<i>Florian S. Frueh and Maurizio Calcagni</i>				
21.1	Introduction	207	21.6	Authors' Own Experience and Preferred Technique	208
21.2	Nail Deformities	207	21.6.1	Nail Deformities	208
21.3	Painful Neuroma	207	21.6.2	Painful Neuroma.....	209
21.4	Infection	208	21.6.3	Infection	209
21.5	Cold Intolerance and Fingertip Hypotrophy.....	208	21.6.4	Fingertip Hypotrophy	209
			21.7	Take-Home Message.....	209
Section 7 Rehabilitation: How to Prevent and Manage Complications by Hand Therapy					
22.	Flexor Tendon Repair in Zone 2: Prevention and Management of Complications by Hand Therapy	214			
	<i>Gwendolyn van Strien</i>				
22.1	Wound Healing—A Paradigm Shift.	214	22.4.1	Move from the DIP and Not from the PIP.....	215
22.2	Complications.....	214	22.4.2	Make Sure the “Right” Tendon Is Moving	216
22.2.1	Adhesions versus Ruptures	214	22.4.3	Postoperative Exercise—Keep It Simple, Functional, and Relatable	216
22.2.2	Bowstringing.....	214	22.4.4	Patient-Centered versus Protocol-Driven Care	217
22.3	Prevention of Complications.....	214	22.5	Take-Home Message.....	217
22.3.1	Early Active Motion	214			
22.4	Effective Exercising—Tips and Tricks to Improve Outcomes.....	215			

23.	Peripheral Nerve Surgery: Prevention and Management of Complications by Hand Therapy	219		
	<i>Ton A. R. Schreuders</i>			
23.1	Introduction	219	23.2.5	Sensory Loss
			23.2.6	Autonomic Nerve Function Loss
23.2	Complications	219	23.2.7	Psychological Stress
			23.3	Future
23.2.1	Edema	219	23.4	Take-Home Message
23.2.2	Pain	219		
23.2.3	Muscle Strength Loss	220		
23.2.4	Contractures and Shortening (E.g., Muscle Tightness)	220		
24.	Bone and Joint Surgery: Prevention and Management of Complications by Hand Therapy	223		
24.1	Part A: Hand Therapy: Prevention and Management of Complications in Bone and Joint Fractures	223	24.2	Part B: Rehabilitation after Joint Arthroplasties in the Hand
	<i>Gertjan Kroon and Elske Bonhof-Jansen</i>			<i>Paul De Buck</i>
24.1.1	General Principles	223	24.2.1	General principles
24.1.2	Complications	223	24.2.2	Complications
24.1.3	Conclusions	225	24.2.3	Conclusions
24.1.4	Take-Home Message	226	24.2.4	Take-Home Message
Section 8 CRPS				
25.	Debunking Complex Regional Pain Syndrome/Sudeck/Reflex Sympathetic Dystrophy	232		
	<i>Francisco del Piñal</i>			
25.1	Introduction	232	25.3.4	Misdiagnosis–Bad Doctoring
25.2	The Weakness of the CRPS Concept	232	25.3.5	Irritative Carpal Tunnel Syndrome (ICTS)
25.3	The Series	233	25.4	Discussion
25.3.1	Flare Reaction	234	25.5	Take-Home Message
25.3.2	Causalgia	234		
25.3.3	Dystonic-Psychogenic Hand	234		
Section 9 Social Issues				
26.	Managing Expectations/Factitious Disorders	240		
	<i>Randy Bindra and Luke McCarron</i>			
26.1	How to Set the Right Patient Expectations before Surgery	240		

26.2	Importance of Patient Expectations with Relationship to Outcome and Unhappiness/Litigation	240	26.4.1	Self-Mutilation	242
			26.4.2	Factitious Edema	242
			26.4.3	Dystonic Posturing.....	243
			26.4.4	Diagnosis of FD	243
			26.4.5	Management of FD.....	243
26.3	Role of the Therapist in Preoperative Counseling	240	26.5	Take-Home Message	244
26.4	Factitious Disorders: Definition and Classification	241			
27.	Informed Consent/How to Prevent Medicolegal Issues	245			
	<i>Ridzwan Namazie and Randipsingh Bindra</i>				
27.1	Informed Consent	245	27.1.6	Refusing Consent for Treatment.....	247
			27.1.7	Documentation.....	249
27.1.1	Background	245	27.2	How to Prevent Medicolegal Issues	249
27.1.2	Elements of Informed Consent.....	245	27.2.1	Nature of Malpractice Claims	249
27.1.3	Consent in Children	247	27.2.2	Preventing Medicolegal Issues	249
27.1.4	Financial Consent.....	247			
27.1.5	Exceptions to Informed Consent	247			
28.	Complications: What They Do to the Surgeon	251			
	<i>David Warwick</i>				
28.1	Introduction	251	28.4.2	Tell the Patient That a Complication Has Happened	253
28.2	Complications and Errors	251	28.4.3	How to Deal with a Natural Complication	253
28.2.1	What Is a Complication?	251	28.4.4	How to Deal with an Error.....	254
28.2.2	The Chance of a Complication.....	251	28.5	Effects of Complications on the Surgeon	254
28.2.3	When Is a Complication a Non-negligent Error and When Is It Negligence?	251	28.5.1	The Second Victim.....	254
28.3	Avoiding Complications and Consequences	252	28.5.2	Emotional Toil	254
28.3.1	The Competence of a Surgeon.....	252	28.5.3	Risk of Depression and Burnout.....	255
28.3.2	How Can a Surgeon Avoid Complications?	252	28.6	Coping Strategies	255
28.3.3	Consent.....	252	28.6.1	Emotional Strategies	255
28.4	What to Do If a Complication Happens	253	28.6.2	Risk Aversion	255
28.4.1	Admit to Yourself a Complication Has Happened.....	253	28.6.3	Institutional Culture	255
			28.6.4	Recovery	255
			28.6.5	Resilience	256
			28.6.6	Summary	256
29.	Complications: What They Do to the Patient	257			
	<i>Terry L. Whipple</i>				
29.1	Introduction	257	29.2	Trust	257

29.3	Inconvenience.....	258	29.5	Functionality.....	258
29.4	Expense.....	258			
	Index				260
