Acknowledgments — V

Foreword — VII

Introduction — XV

Part 1: Utilities at Risk

- 1 Twin Challenges: Risk Management and Decarbonization — 5**
 - Black Sky Risk — 6**
 - The First Objective: Managing Black Sky Risk — 8**
 - System Hardening — 9**
 - Operational Response — 9**
 - Resilient Design — 10**
 - System Decentralization — 10**
 - Transmission Infrastructure — 11**
 - The Second Objective: Designing for Decarbonization — 11**
 - The Good News: Resilience and Decarbonization Compatibility — 12**
 - System Decentralization — 13**
 - Transmission Infrastructure — 15**
 - The Constraint of the Business Model — 16**
 - Impediment to Investment in System Decentralization — 16**
 - Impediment to Investment in Transmission Infrastructure — 17**
- 2 The Business Model — 18**
 - What Is a Business Model? — 18**
 - The Elements of a Business Model — 19**
 - The Impact of a Dominant Business Model — 21**
 - Innovation of a Business Model — 23**
 - Technological Path Dependence — 24**
 - Embedded Process, Relationships, and Values — 24**
 - Shared Strategic Frames — 25**
 - Financial Returns — 25**
 - Multisided Business Models — 26**

Part 2: Utility Business Model Transformation – A History

- 3 Before the Electric Grid — 33**
 - In the Beginning — 33
 - Dominance of the Private Power Plant — 34
 - Customer Identification — 35
 - Value Chain — 35
 - Value Offering — 36
 - Revenue Model — 36
 - Stretching the Private Plant Business Model — 37
 - Unique Conditions of the Electric Utility Industry — 42
 - A Primer on the Structure of the Electric Utility Industry — 43

- 4 The First Utility Model – The Central Station Grid — 46**
 - The First Central Station Grid — 46
 - Innovation in Value Offering — 47
 - Innovation in Customer Identification — 48
 - Innovation in Value Chain — 50
 - Innovation in Value Capture — 51
 - A Business Model Constrained by Distance — 51
 - A New Dominant Model – Central Station Grid — 53
 - Value Offering — 54
 - Customer Identification — 54
 - Value Chain — 55
 - Value Capture — 55
 - Expansion of the Business Model — 56

- 5 The Second Utility Model – Centralized with Competition — 59**
 - The Emergence of AC Technology — 59
 - A Challenge to the DC-Based Business Model — 65
 - Consolidation and Investment in New Technology — 66
 - Diversification and Growth of the Customer Base — 68
 - Reduction in Costs and Prices — 69
 - Improved Volumetric Pricing — 70
 - Early Regulatory Oversight of Prices — 72
 - A New Dominant Model – Centralized Production, Fragmented Distribution — 73
 - Value Chain — 73
 - Customer Identification — 74
 - Value Offering — 74
 - Value Capture — 75

Transition to the New Dominant Business Model — 75
 An Update on Transmission — 77
 On Crediting Technological Innovation — 78

6 The Third Utility Model – Regulated Monopoly — 80
 The Mess of Competition — 80
 Technological Change — 80
 Nonexclusive Franchise — 81
 The State of Early Regulation — 84
 Franchise Risk — 84
 Political Influence and Corruption — 85
 A Proposal for Change — 87
 Sam Insull Seeks a Monopoly — 90
 Benefits of the New Business Model: From the Utility Perspective — 92
 Benefits of the New Business Model: From the Legislator’s
 Perspective — 93
 The Regulatory “New Deal” — 95
 Monopoly Franchise — 96
 Obligation to Serve — 97
 Tests of “Prudence” and “Used and Useful” — 98
 Cost of Service Regulation and Rate of Return — 100
 A New Dominant Model – Centralized Production, Regulated
 Distribution — 105
 Value Capture — 106
 Value Offering — 106
 Customer Identification — 106
 Value Chain — 107
 Key Variants of the Dominant Business Model – 1970s to Present — 108
 1970s and 1980s: Third-Party Generation — 108
 The 1980s and 1990s: Separation of Transmission and
 Generation — 108
 1990s and 2000s: Market Restructuring — 109
 Effect of Deregulation on the Business Model — 110
 A Final Note Regarding Sam — 111

Part 3: Emergence of a New Business Model

7 A Business Model Under Strain: Market Disruptions — 117
 Decentralization — 117
 Decarbonization — 121

Digitization	123
Declining Load Growth	125
Implications of Declining Load Growth	128
8 The New Business Model: Decarbonizing the Value Chain	130
Intermittency of Supply	131
The “Duck”	132
The Challenge	133
Addressing the Challenge	133
Dispersion of Resource	135
The Challenge	137
The Opportunity	137
Integration of Electric Vehicles	138
The Challenge	139
Mitigation and Opportunity	140
Value of Integrating Distributed Resources in the Value Chain	142
Connecting Multiple Sources of Demand	143
Connecting Multiple Sources of Supply	143
Summary	144
9 The New Business Model: Redefining the Customer	146
The Customer as Prosumer	148
The Customer as Competitor	149
Interacting with the Customer Beyond the Meter	150
Using the Customer to Optimize the Grid	150
Delivery of New Services to the Customer	151
Summary	152
10 The New Business Model: Struggling with Value Capture	153
Limits of Cost of Service Regulation	154
A Problem	154
A Potential Remedy	156
The Paradox of Volumetric Rates	157
A Problem	157
A Potential Remedy	158
The Mismatch of Fixed Costs and Variable Rates	159
A Problem	159
Net Metering	159
Volumetric Rates and Social Financial Equity	160
A Potential Remedy	161

The Value of Time and Place —	162
The Problem —	162
A Potential Remedy —	162
Summary —	163
11 The New Business Model: Redefining the Value Offering —	165
The Supplier of Grid Services —	166
The Enabler of Clean Energy —	168
The Utility’s Position in the Ecosystem —	169
Summary —	171
12 The New Business Model – Centralized and Decentralized Coexistence —	173
Key Influences on the Business Model —	173
Decentralization —	173
Decarbonization —	174
Digitization —	174
Declining Load Growth —	174
The Business Model in Transition —	175
The Range of Options for Business Model Elements —	176
The Future of the Value Chain and Value Offering —	178
The Future of Value Capture —	179
The Future of Customer Identification —	180
Future Utility Business Models —	180
The Energy Services Utility —	180
The Integrating Utility —	181
The Platform Model —	181
Patterns for the Future —	182
Transition Between Business Models Can Take Time —	182
First Mover Advantage Can Impede Business Model Change —	183
Changes in Business Models May be Regional —	184
Business Models Based on an Integrated System – From Edison to Musk —	186
The Business Model Will Evolve – Even for Entrenched Monopolies —	187
List of Abbreviations —	193
Glossary —	195
References —	199
