

VOLUME ONE

Preface	vii
List of contributors	xvii

Part I Foundations

Chapter 1	
Finite automata	3
<i>Jean-Éric Pin</i>	
Chapter 2	
Automata and rational expressions	39
<i>Jacques Sakarovitch</i>	
Chapter 3	
Finite transducers and rational transductions	79
<i>Tero Harju and Juhani Karhumäki</i>	
Chapter 4	
Weighted automata	113
<i>Manfred Droste and Dietrich Kuske</i>	
Chapter 5	
Max-plus automata	151
<i>Sylvain Lombardy and Jean Mairesse</i>	
Chapter 6	
ω-Automata	189
<i>Thomas Wilke (revised by Sven Schewe)</i>	
Chapter 7	
Automata on finite trees	235
<i>Christof Löding and Wolfgang Thomas</i>	

Chapter 8
Automata on infinite trees 265
Christof Löding

Chapter 9
Two-dimensional models 303
Stefano Crespi Reghizzi, Dora Giammarresi, and Violetta Lonati

Part II Complexity issues

Chapter 10
Minimisation of automata 337
Jean Berstel, Luc Boasson, Olivier Carton, and Isabelle Fagnot

Chapter 11
Learning algorithms 375
Henrik Björklund, Johanna Björklund, and Wim Martens

Chapter 12
Descriptive complexity of regular languages 411
Hermann Gruber, Markus Holzer, and Martin Kutrib

Chapter 13
Enumerating regular expressions and their languages 459
Hermann Gruber, Jonathan Lee, and Jeffrey Shallit

Chapter 14
Circuit complexity of regular languages 493
Michal Koucký

Chapter 15
Černý's conjecture and the road colouring problem 525
Jarkko Kari and Mikhail Volkov

Part III

Algebraic and topological theory of automata

Chapter 16	
Varieties	569
<i>Howard Straubing and Pascal Weil</i>	
Chapter 17	
Profinite topologies	615
<i>Jorge Almeida and Alfredo Costa</i>	
Chapter 18	
The factorisation forest theorem	653
<i>Thomas Colcombet</i>	
Chapter 19	
Wadge–Wagner hierarchies	695
<i>Jacques Duparc</i>	
Chapter 20	
Equational theories for automata	729
<i>Zoltán Ésik</i>	
Chapter 21	
Language equations	765
<i>Michal Kunc and Alexander Okhotin</i>	
Chapter 22	
Algebra for trees	801
<i>Mikołaj Bojańczyk</i>	
Index	xxiii
