Bibliographic Description	iii
Summary	1
Zusammenfassung	7
1 The importance of life history and population regulation for the evolution of social learning	15
1.1 Introduction	15
1.2 Method	18
1.2.1 Population regulation	18
1.2.2 Model definitions	18
Fertility regulation	18
Mortality regulation	19
1.2.3 Derivation of principled parameter values	19
1.2.4 Social learning simulations	20
Birth and mutation	20
Learning	20
Survival and aging	20
Environmental stochasticity	21
1.3 Results	21
1.3.1 Demographics and adaptation dynamics	21
1.3.2 Life Span	21
1.3.3 Population regulation	22
1.4 Discussion	24
2 When does selection favor learning from the old? Social learning in age-structured populations	29
2.1 Introduction	29
2.2 The model	31
2.2.1 Recursions	31
2.2.2 Learning	32
2.3 Analysis	33
2.3.1 Does adding age structure resolve Rogers' paradox?	33
2.3.2 Demographic filtering and its interplay with social learning	34
2.3.3 When are older individuals better adapted?	35
2.3.4 The evolution of age-biased social learning in temporally and spatially varying environments	38
2.4 Discussion	40

3	Dynamic social learning in temporally and spatially variable environments	45
3.1	Introduction	45
3.2	Methods	48
3.2.1	Participants	48
3.2.2	Setup	48
3.2.3	Design	48
3.2.4	Decision Environment	49
3.2.5	Mouse Tracking	50
3.2.6	Individual Learning Control	50
3.2.7	Data Analysis	51
	Experience-weighted attraction (EWA) models	51
	Time-varying learning parameters	52
	Pre- and post-experimental simulations	53
3.3	Results	54
3.3.1	Behavioral Results	54
	Learning	54
	Social Information Boxes	55
3.3.2	Computational Modeling	56
	Baseline Model	56
	Temporal vs. Spatial Changes	56
	Time Dynamics of Strategic Social Learning	58
	Post-hoc simulations	58
3.4	Discussion	60
A	Supplementary material for chapter 1	65
B	Supplementary material for chapter 2	73
C	Supplementary material for chapter 3	77
	Bibliography	101
	Acknowledgements	109
	Selbstständigkeitserklärung	111
	Curriculum Vitae and List of Publications	113
	Author Contributions	117
