

# TABLE OF CONTENTS

ACKNOWLEDGEMENTS .....	I
ABBREVIATIONS AND SYMBOLS .....	II
ABSTRACT .....	V
1 INTRODUCTION .....	1
1.1 DNA damage response in plants and mammals .....	1
1.1.1 DNA damage response in mammals.....	1
1.1.2 DNA damage response in plants .....	2
1.2 Che-1/AATF .....	5
1.2.1 Che-1/AATF is involved in cell cycle regulation and apoptosis .....	5
1.2.2 Che-1 plays roles in DNA damage response .....	6
1.2.3 Che-1/AATF participates in ribosome biogenesis .....	8
1.3 The regulatory Framework for root apical meristem maintenance .....	11
1.3.1 Transcription factors: WOX5, PLT, SCR and SHR .....	11
1.3.2 Phytohormones.....	14
1.3.3 Other factors .....	15
1.4 Cell cycle control in plants.....	16
1.4.1 G1-to-S phase.....	17
1.4.2 G2-to-M phase .....	18
1.4.3 Endoreduplication .....	20
1.5 Aims of this study.....	21
2 MATERIALS AND METHODS .....	22
2.1 Materials .....	22
2.1.1 Plants.....	22
2.1.2 Bacteria.....	22
2.1.3 Vectors and plasmids.....	22
2.1.4 Primers used in this thesis .....	23
2.1.4.1 Primers for genotyping .....	23
2.1.4.2 Primers for quantitative RT-PCR (qRT-PCR) .....	23
2.1.4.3 Primers for vector construction.....	25
2.1.5 Enzymes .....	25
2.1.6 Chemicals .....	25
2.1.7 Mediums .....	26
2.1.7.1 Plant medium .....	26
2.1.7.2 Bacteria medium.....	26
2.1.8 Microscopes.....	26
2.1.9 Software.....	27
2.1.10 Databases.....	27
2.2 Methods .....	27
2.2.1 Methods for cultivation and transformation of <i>Arabidopsis</i> .....	27
2.2.1.1 Arabidopsis seed sterilization .....	27
2.2.1.2 Arabidopsis seeds germination and growth condition.....	28

2.2.1.3 Arabidopsis growth in soil.....	28
2.2.1.4 Arabidopsis thaliana plant transformation.....	28
2.2.1.5 In vitro selection of transformed plants.....	28
2.2.1.6 Crosses .....	29
2.2.2 Methods for construction of vectors .....	29
2.2.2.1 Polymerase chain reaction (PCR) .....	30
2.2.2.2 Separation of DNA fragments on agarose gel electrophoresis.....	30
2.2.2.3 Purification of DNA fragments from agarose gels.....	31
2.2.2.4 Restriction endonuclease digest reaction .....	31
2.2.2.5 Recombination of DNA fragments .....	31
2.2.2.6 Preparation of electrocompetent Escherichia coli cells.....	31
2.2.2.7 Electroporation of Escherichia coli cells .....	32
2.2.2.8 Small scale plasmid isolation from Escherichia coli and Agrobacterium tumefaciens.....	32
2.2.2.9 Heat shock transformation of Agrobacterium tumefaciens cells .....	32
2.2.3 Methods for Genotyping.....	32
2.2.3.1 Isolation of genomic DNA from Arabidopsis by CTAB method .....	32
2.2.3.2 PCR.....	33
2.2.3.3 Separation of DNA fragments on agarose gel electrophoresis.....	33
2.2.3.4 Sequencing of PCR product.....	33
2.2.4 Methods for qRT-PCR.....	33
2.2.4.1 Isolation of total RNA from Arabidopsis .....	33
2.2.4.2 RNA quantification.....	34
2.2.4.3 Reverse transcription polymerase chain reaction (RT-PCR) .....	34
2.2.4.4 qRT-PCR.....	34
2.2.5 Methods for DNA damage reagents treatments and quantitative evaluation ...	35
2.2.5.1 Growth condition and chemical treatment .....	35
2.2.5.2 PI (Propidium Iodide) staining .....	35
2.2.5.3 Quantitative evaluation of cell death area.....	36
2.2.5.4 Measurement of primary root length, root meristem length and meristem cell number.....	36
2.2.6 Methods for histochemistry assays .....	36
2.2.6.1 GUS staining .....	36
2.2.6.2 Lugol staining .....	36
2.2.7 Methods for EdU incorporation .....	37
2.2.8 Methods for comet assay.....	39
2.2.9 Methods for flow cell cytometry.....	41
2.2.10 Methods for Immunofluorescence staining.....	41
2.2.11 EMS mutagenesis and Map-Based cloning of <i>FAN</i> .....	42
3 RESULTS .....	44
3.1 Functional characterization of <i>AtCHE-1/AATF</i> in <i>fan</i> mutant .....	44
3.1.1 Defective RAM and SCN in <i>fan</i> mutant.....	44
3.1.2 Identification of <i>FAN</i> gene.....	48
3.2 <i>FAN</i> expression pattern and subcellular localization.....	52

3.3 Alteration of auxin distribution and expression of root pattern genes in <i>fan</i> .....	54
3.3.1 Altered auxin distribution and expression of the root pattern genes in <i>fan</i> mutant .....	54
3.3.2 FAN affects PIN expression level.....	55
3.4 <i>fan</i> mutant shows cell death at root meristem and is hypersensitive to DNA damage stress .....	57
3.4.1 <i>fan</i> mutant is hypersensitive to DNA damage stress.....	57
3.4.2 Overexpression of FAN reduces cell death level under HU treatment.....	59
3.5 Genetic relationship with <i>WEE1</i> , <i>ATR</i> and <i>SOG1</i> .....	62
3.5.1 Root phenotype of double mutants under DNA damage stress .....	62
3.5.2 Cell death in RAM of double mutants under DNA damage stress.....	65
3.6 DNA damage reduces FAN expression at translational level.....	68
3.7 <i>FAN</i> loss-of-function causes cell cycle arrest.....	70
4 DISCUSSION.....	75
4.1 Loss-of- <i>FAN</i> affects RAM patterning .....	75
4.2 <i>FAN</i> has an anti-apoptotic and cell cycle regulator function in <i>Arabidopsis</i> .....	76
5 CONCLUSION.....	80
APPENDIX.....	81
