|--------------|--|-----|
| INTRODUCTION | A. Forti | xv |
| Part I. | METHODOLOGICAL PROBLEMS | |
| | A basic needs approach to impact analysis and evaluation for longterm policy-making. H. Bossel, B. Hornung and K.F. Müller-Reissmann (Federal Republic of Germany) | 3 |
| | A critical review of the systems analysis approach to scientific prospectives and human needs. A. Danzin (France) | 17 |
| | Methodological problems of science and the evolution of human needs. J.M. Gvishiani (USSR) | 27 |
| | Methodological problems in forecasting fundamental research related to human needs. I. Malecki (Poland) | 41 |
| | Characteristics of a useful forecasting effort: lessons from the analysis of past projects. D.L. Meadows (USA) | 49 |
| Part II. | EXPERIENCES OF NATIONAL AND INTERNATIONAL PROJECTS | |
| | The USSR Comprehensive Programme of Scientific and Technological Progress and its social implications for a 20-year period. V. Kotelnikov (USSR) | 61 |
| | Interfutures: an assessment of the project's development. J. Lesourne (France) | 65 |
| | The Interfutures study: some reflections on methodology. J. Lesourne and D. Malkin (France) | 75 |
| | FAST: Forecasting and Assessment in the field of Science and Technology. P.C. Roberts (United Kingdom) | 103 |

| | |
|--|-----|
| Part III. MODERN TRENDS IN SCIENTIFIC AND TECHNOLOGICAL DEVELOPMENT AND ITS IMPACT ON MAN AND SOCIETY | |
| The future of robotics: a meta-review. R.U. Ayres (USA) | 119 |
| Scientific and technological forecasting and higher education. O.M. Bielotserkovski (USSR) | 151 |
| Science as human need and the role of the mass media. S. Kapitza (USSR) | 161 |
| Microelectronics and society: report to the Club of Rome. A. King (IFIAS Sweden) | 165 |
| The Global 2000 Report: a study in the scientific forecasting of human needs. P.M. O'Brien (USA) | 173 |
| SUMMARY DISCUSSION. O. Zakharova (USSR) | 179 |
| APPENDICES | |
| Appendix I. Final Document | 193 |
| Appendix II. Members of the Symposium Committees | 198 |
