<i>Preface</i> —HENRY MAYER	v
<i>Introduction</i> —PROFESSOR R. SCHOEN	vii
<i>Foreword</i> —KARL MAN WASSERMAN	ix
<i>Preface</i>	xi
<i>Introduction</i>	3
<i>Chapter</i>	
1. THE VOLUME PULSE OF THE ARTERIOLES	6
A. Schematic Representation of Normal and Pathological Pulse Forms	8
B. The Form of Volume Pulses in Various Age Groups	16
C. Change of the Pulse Form Through Vasoconstriction	18
D. The Volume Pulses in Functional and Organic Vascular Diseases	19
1. The Pulse Form in the Spastic Vascular Syndrome	19
2. The Pulse Form in Organic Loss of Arterial Wall Elasticity	22
3. The Pulse Form with Obliteration of the Arterial Stream (Stenotic Pulse)	24
4. Stenotic Pulse in Arterial Embolism	25
5. Stenotic Pulse in Endarteritis Obliterans	29
6. Stenotic Pulse in Arteriosclerosis Obliterans	30
7. Stenotic Pulses in Disturbance of the Lumen of the Artery from Outside	32
8. Differential Diagnostic Measures for Evaluating the Dilatability of the Collateral Bed in Organic Vascular Obstruction	33
9. Stenotic Pulses in Organic Coronary Insufficiency	33

<i>Chapter</i>	<i>Page</i>
E. The Peripheral Pulsus Alternans	40
1. Alternans at Rest and After Stress—Schematic Presentation	45
2. Pulsus Alternans in Myocarditis	48
3. Pulsus Alternans in Paroxysmal Tachycardia	49
4. Pulsus Alternans in Aortic Stenosis with Paroxysmal Tachycardia	53
5. Pulsus Alternans in Coronary Insufficiency	53
6. Rest and Stress Alternans in Hypertension	56
7. Pseudoalternans in Auricular Fibrillation	61
F. The Peripheral Volume Pulses with Extrasystole	63
1. Peripheral Pulsus Alternans after Extrasystoles	66
2. Form Changes of Extrasystolic Peripheral Volume Pulses in Various Degrees of Cardiac Compensation— Schematic Presentation	68
3. Supraventricular Extrasystole—Volume Pulse with Compensated Cardiac Capacity	72
4. Supraventricular Extrasystole—Volume Pulse with Left Insufficiency	72
5. Ventricular Extrasystoles—Volume Pulses with Normal Cardiac Capacity	79
6. Ventricular Extrasystole—Volume Pulses in Hypertension in Coronary Insufficiency	80
7. Extrasystole in Cardiac Insufficiency of Various Etiologies	84
G. The Behavior of Volume Pulses of the Peripheral Arteries in Auricular Fibrillation	84
1. Auricular Fibrillation—Volume Pulses in Different Degrees of Cardiac Decompensation—Schematic Presentation	86
2. Peripheral Volume Pulses in Functional Paroxysmal Auricular Fibrillation and Compensated Cardiac Damage	93

<i>Chapter</i>	<i>Page</i>
3. Peripheral Volume Pulses in Cardiac Insufficiency	93
a) Insufficiency at Rest	93
b) Stress Insufficiency	98
4. Evaluation of Treatment of Auricular Fibrillation by Volume Pulse Recording	102
5. Equal Volume Pulses in Isolated Right Insufficiency ...	107
2. THE SIGNIFICANCE OF THE SPONTANEOUS AND REACTIVE VASO- MOTOR RESPONSES FOR THE FUNCTIONAL DIFFERENTIAL DIAG- NOSIS OF CARDIOVASCULAR DISEASES	109
A. Secondary and Tertiary Waves	112
1. Spontaneous Rhythms in Healthy People	112
2. Spontaneous Rhythm in Endarteritis Obliterans	116
B. Spontaneous Variations in the Volume Pulse Amplitude Observations of the Volume Pulse Band	122
1. The Volume Pulse Band in Healthy Persons	122
2. The Volume Pulse Band with Extrasystole	125
3. Pulse Amplitude and Volume Pulse Band in Various Forms of Neurocirculatory Disturbances	127
a) The Dilated Type of Neurocirculatory Disturbances	127
b) Spastic Forms of Neurocirculatory Disturbances ...	130
3. THE INVESTIGATION OF THE REACTIVE BEHAVIOR OF THE PE- RIPHERAL VESSELS	139
1. The Effect of Thermal Stimulation on the Blood Flow in Extremities of People with Normal Circulation	141
2. The Effect of Thermal Stimuli on the Circulation of Ex- tremities in Neurocirculatory Disorders	143
3. The Effects of Thermal Stimulation on the Circulation of Extremities in Endarteritis Obliterans	143
4. CLINICAL USE OF A COMBINATION OF ALL INVESTIGATIONAL METHODS USED SO FAR	146
1. Use of the Procedures in Endarteritis Obliterans	146

<i>Chapter</i>	<i>Page</i>
5. THE EXAMINATION OF THE PERIPHERAL CIRCULATION IN CORONARY INSUFFICIENCY	154
A. Arteriosclerosis Obliterans and Coronary Infarct	154
B. Endarteritis Obliterans in Myocardial Infarction	158
C. Endarteritis Obliterans in Angina Pectoris	159
6. CARDIAC AND CIRCULATORY FUNCTION STUDIES WITH COMBINED PHOTOELECTRIC AND GAS ANALYTICAL METHODS	164
A. The Rebreathing Test with Continuous Bloodless Recording of the Peripheral Arterial Circulation	168
1. The Rebreathing Test in a Healthy Person	169
2. The Rebreathing Test in Various Degrees of Cardiac Decompensation	170
3. Dangers with the Use of the Rebreathing Test	173
B. The Oxygen Deficiency Test	174
1. Technical Operation of the Oxygen Deficiency Test	174
2. The Compensation of Arterial Undersaturation Originating During Oxygen Deficient Respiration	175
3. About a Constant Equilibrium of the Oxygen Saturation of the Blood Circulating in the Entire Cross-section of the Peripheral Vessels	179
4. The Oxygen Deficiency Test in a Healthy Subject	183
5. The Oxygen Deficit Test in a Person with Healthy Circulation but Labile Respiration	187
6. Oxygen Deficiency Test with Variable Oxygen Tension in the Inhaled Air	187
7. Oxygen Deficit Test in Myocarditis	189
8. Oxygen Deficit Test in Mitral Stenosis	191
9. Oxygen Deficit Test in Other Forms of Heart Failure	191
10. Oxygen Deficiency Test in Heart Diseases of Different Origin	200
11. The Oxygen Deficit Test in Coronary Insufficiency. Checking the Course of the Disease and Its Therapy in Organic and Functional Coronary Diseases	202

<i>Chapter</i>	<i>Page</i>
12. The Behavior of Oxygen Saturation of the Peripheral Blood in the Oxygen Deficiency Test During the Spontaneous Fluctuations of the Peripheral Blood Content or During the Vasoconstrictive Phases of Neurocirculatory Asthenia	205
7. METHOD	207
<i>Appendix</i>	
A. Technique of the Photoelectric Examination	217
B. Recording of the Respiratory Volume and of the CO ₂ and O ₂ Content of Exhaled Air	221
C. Thermoelectric Recording of Skin Temperature	223
<i>References</i>	225
<i>Index</i>	233
