

# Contents

## Chapter 1: Introduction

1.1	Definitions	1
1.2	Anthropological, Historical, and Institutional Aspects of Land Use	3
1.3	Resources-Aspects of Land Use	7
1.4	Present and Potential Land Use	15

## Chapter 2: Land Use Surveys

2.1	Principles of Land Use Surveys	17
2.2	Various Kinds of Land Use Surveys	18
2.3	Modern Survey Techniques	26

## Chapter 3: Land Utilization Types

3.1	General	35
3.2	Agricultural Land Utilization Types	44
3.3	Typology of Agricultural Land Utilization	53
3.4	Non-Agricultural Land Utilization Types	58

## Chapter 4: Land Resources

4.1	General Introduction	66
4.2	Climate, Geology, Relief	70
4.2.1	Climate	70
4.2.2	Geology and Relief	84
4.3	Soil and Water Resources	91
4.3.1	Soils	91
4.3.2	Water Conditions	110
4.4	Other Land Resources	122
4.4.1	Artificial Resources	122
4.4.2	Vegetation Resources	128

## Chapter 5: Landscape Ecology and Land Conditions

5.1	General	131
5.2	Landscape Ecology	133
5.3	Land Resources Surveys	136
5.4	Land Use Requirements	145
5.4.1	Cultural Ecosystems as Dynamic Complexes	145
5.4.2	Crop Requirements	146

5.4.3	Land Management Requirements	152
5.4.4	Crop Responses to Management: Land Productivity	155
5.4.5	Land Degradation	168
5.4.6	Requirements of Non-Agricultural Land Utilization Types	177
5.5	Land Conditions	196
5.5.1	Land Qualities	196
5.5.2	Land Limitations	209
5.5.3	Land Improvement	211
5.5.4	Irrigation	220

## Chapter 6: Land Evaluation

6.1	General	234
6.2	Actual Land Suitability and Soil Suitability	238
6.3	Potential Land Suitability	254
6.4	Land Evaluation Classifications	280
6.5	Land Evaluation Procedures	295
6.5.1	General	295
6.5.2	Land Resources Interpretation	298
6.5.3	The Intersector Approach	318

## Chapter 7: Development of Land Use in Advancing Agriculture

7.1	General	327
7.2	Land Use Improvement and Land Improvement	332
7.3	New Land Utilization Types	353
7.4	Economic and Ecological Considerations	358
