

## TABLE OF CONTENTS

CHAPTER 1: Introduction and Background .....	1
1. Introduction .....	1
2. Basic Notation and Definitions .....	8
3. Automata Theory Background .....	11
4. Using Reducibilities to Prove Upper and Lower Bounds .....	16
5. Logic Background and Notation .....	20
6. Practical Relevance of the Theoretical Results .....	25
CHAPTER 2: Ehrenfeucht Games and Decision Procedures .....	28
1. Ehrenfeucht Games .....	28
2. Complexity of Ehrenfeucht Games .....	43
CHAPTER 3: Integer Addition - An Example of an Ehrenfeucht Game Decision Procedure .....	47
1. An Upper Bound for Integer Addition .....	47
CHAPTER 4: Some Additional Upper Bounds .....	55
1. Introduction .....	55
2. Upper Bounds for the Theory of a 1-1 Unary Function .....	60
3. Upper Bounds for the Theory of a 1-1 Unary Function with a Monadic Predicate .....	81
4. Upper Bounds for the Theory of Two Successors and Equal Length .....	102
5. Upper Bounds for the Theories of $\langle \mathbb{N}, \langle, \rangle \rangle$ , Lexicographical Order, and Well-order .....	112
6. Historical Remarks .....	127
CHAPTER 5: Direct Products of Theories .....	128
1. Weak Direct Powers and Ehrenfeucht Games .....	128
2. Upper Bounds for the Theories of Integer Multiplication and Abelian Groups .....	135

## TABLE OF CONTENTS (cont'd)

3. The Complexity of Theories of Weak Direct Powers .....	141
4. Results about Other Kinds of Direct Products .....	144
CHAPTER 6: Lower Bound Preliminaries .....	148
1. Simple Turing Machines .....	148
2. Regular-like Expressions .....	152
CHAPTER 7: A Technique for Writing Short Formulas Defining Complicated Properties .....	153
CHAPTER 8: A Lower Bound on the Theories of Pairing Functions ...	162
1. Introduction .....	162
2. Some Undecidability Results .....	165
3. Construction of Formulas which Talk About Large Sets .....	170
4. Using Formulas to Simulate Turing Machines .....	185
CHAPTER 9: Some Additional Lower Bounds .....	187
1. Lower Bounds for the Theory of One Successor .....	187
2. Lower Bounds for the Theory of One Successor with a Monadic Predicate .....	201
3. Lower Bounds for the Theory of Two Successors .....	219
4. Lower Bounds for the Theory of a 1-1 Unary Function .....	223
REFERENCES .....	234
Subject and Notation Index .....	239
TABLE 1: A Summary of Results .....	3
