

CONTENTS

| | |
|--|-----|
| Preface | xi |
| Note to the Reader | xix |
| Chapter I. Quaternions | |
| Introduction | 1 |
| 1. Generalities | 2 |
| 2. Algebraic Operations for Quaternions | 6 |
| 3. 4×4 Matrix Representations | 9 |
| 4. Quaternions and Rotation Groups | 10 |
| Chapter II. Generalized Quaternion Algebras | |
| Introduction | 18 |
| 1. Quartic Extensions of a Division Ring | 18 |
| 2. Iterated Extensions of Division Rings | 23 |
| 3. Proof that D is a Division Ring | 24 |
| Chapter III. Centrally Finite Division Algebras | |
| Introduction | 30 |
| 1. Cyclic Algebras | 32 |
| 2. Crossed Products | 58 |
| 3. Maximal Subfields | 75 |
| 4. Simple Algebras | 92 |
| 5. Normal Splitting Fields | 99 |
| 6. Tensor Products of Division Rings | 106 |
| 7. The Exponent. | 116 |
| 8. Noncyclic Crossed Product Division Algebras | 123 |
| 9. Finite Groups and Division Rings | 132 |
| 10. Universal Division Algebras | 153 |
| 11. Division Rings over Laurent Series Fields | 173 |
| Chapter IV. Skew Polynomials and Division Rings | |
| Introduction | 183 |
| 1. Right Ore Condition | 185 |

| | | |
|----|--|-----|
| 2. | Noetherian and Principal Right Ideal Domains . . . | 186 |
| 3. | Skew Polynomial Rings | 189 |
| 4. | Power Series Division Rings | 200 |
| 5. | Extensions of Maps | 208 |
| 6. | Examples | 211 |
| 7. | Applications | 217 |
| 8. | Change of Indeterminate | 219 |
| 9. | Special Properties of $K[x;\theta,\delta]$ | 223 |

Chapter V. Algebraic Extensions of Skew Fields

| | |
|---|-----|
| Introduction | 240 |
| 1. Pseudo Linear Extensions | 242 |
| 2. Leibniz Rule. | 245 |
| 3. Commutation Rules | 251 |
| 4. Binomial Extensions | 256 |
| 5. Commutation Polynomials | 268 |
| 6. Division Subrings of Skew Fields | 270 |

Chapter VI. Nilpotent Derivations

| | |
|---|-----|
| Introduction | 275 |
| 1. Basic Definitions and Properties | 276 |
| 2. Nilpotence and Extensions | 279 |
| 3. Constructive Methods. | 285 |
| 4. Differential Bases | 289 |

Chapter VII. Semigroup Power Series Rings

| | |
|--|-----|
| Introduction | 294 |
| 1. Preliminaries | 295 |
| 2. Construction of the Rings | 299 |
| 3. Inverses | 305 |
| 4. Orders on Division Rings | 314 |

Appendix AI Division Rings Containing Generalized Quaternion Algebras

| | |
|---|-----|
| Introduction | 320 |
| 1. Four Dimensional Division Algebras | 321 |
| 2. An Elementary Proof of the Frobenius Theorem | 325 |

| | | |
|---------------|--|-----|
| Appendix AII | Quartic Cyclic Fields | 327 |
| Appendix AIII | Nonassociative Division Rings | 333 |
| Appendix AIV | Factorization in Domains and Noncommutative Polynomials | |
| | Introduction | 344 |
| | 1. Integral Domains | 345 |
| | 2. Weak Bezout Domains | 356 |
| | 3. Skew Polynomial Rings | 357 |
| | 4. Polynomial Rings over a Skew Field | 362 |
| | 5. Algebraically Closed Division Rings | 366 |
| | List of Symbols and Notation | 371 |
| | Bibliography | 379 |
| | Author index | 405 |
| | Subject index | 409 |
