

Contents

<i>G. D. Lang, G. D. O. Lowe, J. J. Walker, C. D. Forbes, C. R. M. Prentice, A. A. Calder</i>	
Blood Rheology in Pre-Eclampsia and Intrauterine Growth Retardation. Effects of Blood Pressure Reduction with Labetalol	1
<i>P. C. Buchan</i>	
Fetal Intrauterine Growth Retardation and Hyperviscosity	7
<i>U. Siekmann, H. Oggolter-Siekmann, L. Heilmann</i>	
The Rheological Behavior of Red Blood Cells in the Course of Pregnancy-Induced Hypertension	21
<i>U. Siekmann, L. Heilmann, H. Ludwig</i>	
The Therapeutic Value of Plasma Volume Expansion in Pregnancies with Disturbed Microcirculation	29
<i>C. S. Kurz, L. Heilmann</i>	
The Effect of Low Molecular Dextran on Maternal Micro-rheological Parameters and Transcutaneous Fetal Oxygen Tension	40
<i>R. Schroeck</i>	
Hemodilution in Obstetrics: Significance and Monitoring of Hyperoncotic Dilution Procedures with 20% Human Serum Albumin	54
<i>P. Kopecky, H. Schmid-Schönbein, W. J. Derichs, W. Wenner, U. Postulka</i>	
Hemorheological Therapy of Placental Insufficiency	63
<i>L. Heilmann, U. Siekmann</i>	
Effects of Betamimetics on the Erythrocyte Deformability: Results in Pregnancy	69
<i>O. Linderkamp, H. C. Sengespeik, C. B. McKay, H. J. Meiselman</i>	
Rheological Properties of Blood in Preterm and Full-Term Neonates	83
<i>M. E. Foley, R. Collins, D. Mac Donald:</i>	
Whole Blood Viscosity in Umbilical Cord Blood, Adult Pregnant and Adult Non Pregnant Blood: The Influence of Plasma Factors	92
<i>P. C. Buchan</i>	
Impaired Erythrocyte Deformability and Raised Blood Viscosity and Perinatal Hypoxic Brain Damage – an In Vitro and In Vivo Study	98
<i>M. W. Rampling, M. S. Lovell, J. A. Sirs, T. Lissauer, R. P. A. Rivers</i>	
Rheology and Intravascular Coagulation in the Neonate	104

J. N. Oats, J. H. Drew, J. B. Hobbs, A. A. Palmer, G. M. Mitchell, M. A. McIver

Neonatal Hyperviscosity 110

C. B. McKay, O. Linderkamp, H. J. Meiselman

Viscosity and Hematocrit of Neonate versus Adult Blood in Narrow
Tubes 116

L. Heilmann

Concluding Remarks 119
