

Contents

Part I. Biological Background	1
1. Origins of Sociophysiology	3
<i>William M. Waid</i>	
Psychotherapy as Social and Physiological Interaction	4
Origins of Physiological Response to Social Stimuli	14
2. Methods in Sociophysiology	21
<i>Robert M. Stern and William J. Ray</i>	
Introduction: All Psychophysiology as Sociophysiology	21
Recording Bodily Responses	22
Concepts Related to the Interpretation of Recordings	35
New Vistas	39
3. An Evolutionary Perspective on Human Social Behavior	47
<i>Arne Öhman and Ulf Dimberg</i>	
Some Basic Evolutionary Biology	49
Implications for Human Social Behavior	66
Concluding Discussion	75
4. The Sociophysiology of Infants and Their Caregivers	87
<i>Ross A. Thompson and Ann M. Frodi</i>	
The Meaning of the Cardiac Response	88
The Cardiac Response and Socioemotional Responsiveness in Infants ..	91
The Cardiac Response and Adult Reactions to Infant Smiles and Cries	99
Conclusion	108

Part II. Physiology of Social Cognition, Perception, Learning, and Memory	115
5. Autonomic Self-Perception and Emotion	117
<i>Edward S. Katkin, Jim Blascovich, and Marlon R. Koenigsberg</i>	
Introduction and Background	117
Visceral Perception and Emotion	120
Visceral Perception: Methods and Procedures.....	124
Conclusions	135
6. The Physiological Bases of Nonverbal Communication	139
<i>Ross Buck</i>	
Spontaneous versus Symbolic Communication.....	139
Primary Motivational/Emotional Systems	142
Motor Systems of Emotional Expression.....	146
Mechanisms of Excitation and Inhibition in Emotional Expression	150
The Physiological Bases of Nonverbal Communication	156
Summary	157
7. Physiological Mediation of Attitude Maintenance, Formation, and Change	163
<i>Mark P. Zanna, Richard A. Detweiler, and James M. Olson</i>	
Attitudes and Psychophysiology	163
Attitude Formation and Psychophysiology	168
Attitude Change and Psychophysiology	173
Part III. Physiology and Social Behavior	197
8. Social Interaction and Psychophysiology	199
<i>John B. Gormly</i>	
Introduction	199
Psychophysiological Activity and Psychotherapy	199
Psychophysiological Activity, Coronary-Prone Personality, and Social Interactions	204
Psychophysiological Activity and Interpersonal Disagreement	205
The Experimental Approach: Conformity as a Deceptive Act.....	207
The Correlational Approach: A Study on Psychophysiological Traits and Social Behavior Patterns.....	211
9. Cognition, Arousal, and Aggression	225
<i>Brendan Gail Rule and Andrew R. Nesdale</i>	
Constructs of Arousal, Frustration, Cognition, and Aggression	226
Arousal, Cognition, and Anger	229
Anger and Aggression	231

Effects of Additional Arousal Sources on Anger and Aggression	235
Aggression Catharsis	240
Conclusions	242
10. Social Processes, Biology, and Disease	249
<i>Lawrence F. Van Egeren</i>	
Introduction	249
Levels of Organization	254
Explanation of Social-Biological Relations	272
Conclusions	277
 Author Index	 283
 Subject Index	 295
