

Table of Contents

Page:

1.	Introduction	9
2.	The calibration task.....	10
2.1	The DAIS-7915 calibration hardware requirements	11
2.2	Overview of the Universal Calibration Facility for VIS-TIR wide-angle videospectrometric airborne sensors	17
3.	The hardware parts of the Universal Calibration Facility	18
3.1	The hardware for laboratory and hangar calibration	18
3.2	The equipment for absolute radiometric calibration in the 0.4 - 2.5 μm region	20
4.	On-ground calibration algorithms.....	22
4.1	A model of the instrument effects of imaging and videospectrometric sensors.....	22
4.2.	Procedures of the systematic correction and requirements to the instrument calibration	25
4.3	Measurement of noise characteristics	29
4.4	Dark-signal calibration	30
4.5	Spectral response calibration	31
4.6	Absolute calibration	32
4.7	Calibration of the point-spread function and of the inter-channel displacements.....	34
4.8	Calibration of the instrument response to polarization	37
4.9	Calibration of the stray-light sensitivity	38
5.	References.....	40
