Matthias T. Kromann

Projective Geometry and Modern Algebra

Birkhäuser
Boston • Basel • Berlin

Contents

Preface	ix
Historical Foreword	xiii
1 Affine Geometry	1
1.1 Affine Planes	2
1.2 Transformations of the Affine Plane	5
2 Projective Planes	13
2.1 Completion of the Affine Plane	14
2.2 Homogeneous Coordinates for the Real Projective Plane	16
3 Desargues' Theorem and the Principle of Duality	23
3.1 The Axiom P5 of Desargues	23
3.2 Moulton's Example	26
3.3 Axioms for Projective Space	27
3.4 Principle of Duality	29
4 A Brief Introduction to Groups	35
4.1 Elements of Group Theory	35
4.2 Automorphisms of the Projective Plane of 7 Points	39
5 Elementary Synthetic Projective Geometry	45
5.1 Fano's Axiom P6	45
5.2 Harmonic Points	47
5.3 Perspectivities and Projectivities	52
6 The Fundamental Theorem for Projectivities on a Line	61
6.1 The Fundamental Theorem: Axiom P7	61
6.2 Geometry of Complex Numbers	64
6.3 Pappus' Theorem	67

7	A Brief Introduction to Division Rings	75
7.1	Division Rings	75
7.2	The Quaternions \mathbf{H}	78
7.3	A Noncommutative Division Ring with Characteristic p	81
8	Projective Planes over Division Rings	87
8.1	$\mathbf{P}^2(R)$	87
8.2	The Automorphism Group of $\mathbf{P}^2(R)$	89
8.3	The Algebraic Meaning of Axioms P6 and P7	101
8.4	Independence of Axioms	102
9	Introduction of Coordinates in a Projective Plane	105
9.1	The Major and Minor Desargues' Axioms	106
9.2	Division Ring Number Lines	113
9.3	Introducing Coordinates in \mathbf{A}	116
10	Möbius Transformations and Cross Ratio	123
10.1	Assessment	123
10.2	Möbius Transformations of the Extended Field	124
10.3	$\text{PJ}(\ell) \cong \text{PGL}(1, \mathbf{F})$	126
10.4	Cross Ratio: a Projective Invariant	129
11	Projective Collineations	135
11.1	Projective Collineations	135
11.2	Elations and Homologies	136
11.3	The Fundamental Theorem of Projective Collineation	139
11.4	$\text{PC}(\pi) \cong \text{PGL}(2, \mathbf{F})$	141
11.5	Ceva's Theorem	143
A	Conics	151
A.1	Conics	151
B	Algebraic Curves and Bezout's Theorem	159
B.1	Algebraic Curves	159
B.2	Intersection Theory of Algebraic Curves	162
C	Elliptic Geometry	167
C.1	The Laws of Sines and of Cosines	167
C.2	The Incidence Geometry of the Hyperbolic Plane	171

D Ternary Rings	175
D.1 Coordinatization	176
D.2 Addition	179
D.3 Multiplication	179
E The Lattice of Subspaces	183
E.1 Posets and Lattices	184
E.2 Axioms for General Projective Geometry	187
E.3 The Fundamental Theorem of Projective Geometry	190
Solutions to Selected Exercises	195
Annotated Bibliography	198
Index of Notation	202
Index	205
