3rd International Cokemaking Congress

Gent, Belgium
September 16–18, 1996

Proceedings

Organization
Centre de Recherches Métallurgiques (CRM)
Verein Deutscher Eisenhüttenleute (VDEh)

Co-Sponsored by
International Metallurgical Associations

Supported by
Sidmar N.V.
European Commission
Contents

Session 1

Coke quality: Points of view of the ironmaker and of the cokemaker

Coke quality requirements of European blast furnace engineers (Joint EBFC paper)

D C. Leonard (British Steel plc., U.K.)
L. Bonte (Sidmar, Belgium)
A. Dufour (Sollac Fos, France)
A. Ferstl (Voest-Alpine Stahl Linz, Austria)
K. Raipala (Fundia Koverhar, Finland)
P. Schmole (Krupp Hoesch Stahl AG, Germany)
E. E. Schoone (Koninklijke Hoogovens, The Netherlands)
J. L. Verduras (CSI Pianos, Spain)
R. Willmers (British Steel plc., U.K.)

Study on the behaviour of coke in the blast furnace with oxygen-rich coal injection

Shiyong Zhou, Jing Ye, Jiping Guo, Jun Xu, Shuyi Zhou (Anshan Institute of Iron and Steel Technology, China)
Xinci Wu, Desheng Hu, Lijqi Zhou, Shengfen Xie (Bao Steel Group Corporation, China)

Assessment of coke degradation in the blast furnace from tuyere probing investigations

P. Negro, J. M. Steiler (IRSID, France)
E. Beppler, U. Jahnsen (Thyssen Stahl AG, Germany)
C. ft. Bennington, ft ft. Willmers (British Steel Technical, U.K.)

Coke quality improvement - possibilities and limitations (Joint ECC paper)

T. Vander, B. van der Velden (Koninklijke Hoogovens, The Netherlands)
R. Alvarez (INCAR-CSIC, Spain)
M. Ferraro (Acc. di Cornigliano, Italy)
J. Fohl (Voest-Alpine Stahl Linz, Austria)
K. Hotheir (Thyssen Stahl AG, Germany)
J. M. Huart (Sollac Dunkerque, France)
E. Mattila (Rautaruukki Raahse, Finland)
R. Propson (Cockerill Sambre, Belgium)
R. Willmers (British Steel plc. T.T.C., U.K.)

Coke quality inspection and control at the Nova Hut' Ostrava based on the Al-Neuron expert system

V. Machek (Nova Hut', Ostrava, Czech Republic)
V. Roubiček, J. Kret, J. Bilik (Technical University of Ostrava, Czech Republic)
Quality of metallurgical coke produced in respect to properties of polish coking coals
M. Sciazko (Institute for Chemical Processing, Poland)
A. Karcz (University of Mining and Metallurgy, Poland)
R. Cieslar (Consulting and Engineering Company, Poland)
T. Wenecki (Coking Works, Poland)

Coke quality control in Kwangyang steel works
J. S. Soo, S. Y. Kim, J. Y. Park, J. H. Kim,
J. W. Park (Pohang Iron and Steel Co., Korea)

Coke size degradation function of screening-transporting system of coke oven plant and discussion of evaluation
Chen Shi-Du, Wang Tai-Yan (Anshan Iron Steel Complex, China)

Session 3
Coke plant instrumentation and automation

The new coke oven battery heating control system at the Rautaruukki Raaha Steel
P. Palmu, J. Swanljung (Rautaruukki Raaha Steel, Finland)

Application of the thermal state diagnosis for coke oven battery
C. W. Chen, J. F. Shen, M. T. Hong,
K. A. Chung, H. J. Yen (China Steel, Taiwan)

Results of heating technology investigations for the coke oven batteries at Voest-Alpine Stahl Linz GmbH
J. Sacher, H. Panzer, W. Kandler
(Voest-Alpine Stahl Linz, Austria)

Automation of gas treatment plants by process simulation
P. Liszio (Thyssen Stahl AG, Germany)
H. Thielert (Thyssen Stil Otto Anlagentechnik, Germany)
G. Wozny (TU Berlin, Germany)

Session 5
Coke plant operation

Operation aspects of stamp charging technology at Tata Steel
T. Mukherjee, A. S. Dhillon, L. M. Chatterjee
(The Tata Iron and Steel Company Ltd, India)
Coal blend selection for cokemaking
M. te Lindert, B. Van der Velden, T. Vander, R. A. Vos (Koninklijke Hoogovens, The Netherlands)

Co-carbonization of coal blends with bituminous additives
K. H. Kim (POSCO, Korea)

The coke industry in Russia - status and outlook
M. Yu. Posokhov, V. I. Sukhorukov, V. G. Nazarov, E. I. Andreikov (NCA, Russia)

Development of coking pressure estimation model
T. Arima, K. Kato, S. Nomura, A. Nishimura, T. Nakagawa, I. Kornaki (Nippon Steel Corp., Japan)

Study on the transfer of internal gas pressure as swelling pressure onto the walls of coke ovens
Y. Nojima (The Kansai Coke and Chemicals Co., Japan)
F. Huhn, W. Rohde, K. H. van Heek (DMT, Germany)

Environmental control in coking plants: Water
State of the art in biological waste water treatment in European coking plants (Joint ECC paper)
D. Bamelis (Sidmar N.V., Belgium)
V. Löhr (Ruhrkohle Bergbau AG, Germany)
G. Neubert (Lorfonte, France)
Ch. Thomas (ACZC U.A., The Netherlands)

Environmental protection at Kaiserstuhl
H. Stoppa (Ruhrkohle Bergbau AG, Germany)

Methodology for the program for prevention against exposure to environmental risks - PPER - of Companhia Siderurgica Nacional
B. Oliveira (Companhia Siderurgica Nacional, Brazil)

Suspended solids below 20 mg/l in waste water
E. Sandström, J. Stigsäter (SSAB Tunnplåt AB, Sweden)

Environmental control in coking plants: Air and by-products
Performance of environmental protection for surroundings of coke plant
H. Ito, I. Minamisawa, H. Nishiaka (Sumitomo Metals Wakayama, Japan)
Control the stripping efficiency of pollutants from coke plant effluent 166
Jui-Fu Shen, Yu-Hsiung Lin, Jow-Rong Yeh, Ben Nan Chang (China Steel, Taiwan)

Benzol recovery: a plant preserving ecology and saving resources 170
M. Vetoniemi (Rautaruukki Raahe, Finland)
R. Genin (Befs Prokem, France)

Negative pressure within the collecting main - a new way to reduce coke oven emissions - by means of a novel chamber pressure regulation 173
J. Spitz, K. Hofherr (Thyssen Stahl AG, Germany)
J. Giertz, F. Huhn (DMT, Germany)

New methods for the reduction of SO2 in waste gas of sulphuric acid plants 180
W. Huber, W. Kandler, E. Krainer, J. Wegerer (Voest-Alpine Stahl Linz, Austria)

Studies on the ways to use the tar sludge derived from cokemaking process by caking 184
Y. D. Park, S. M. Han (RIST, Korea)

Session 11

New equipment in conventional cokemaking - prolonging coke oven life

Operation of coke oven machines with hydraulic motors 191
G. Louis, G. Buchardt, P. Greiwe (Ruhr Kohle Bergbau AG, Germany)

Coke oven repair assisted by endoscopy 196
J. P. Gaillet (Centre de Pyrolyse, France)
A. Giraud (Sollac Fos, France)
G. Greff (HBL, France)
F. Nass (Lorfonte, France)

Development of an advanced coke oven gunning machine 201
T. Nakada, K. Matsuda, T. Takahasi (Kawasaki Steel, Japan)
K. Matsumoto (NIKK, Japan)
M. Numazawa (Sumitomo Metal Industries, Japan)
H. Ohira (The Kansai Coke and Chemicals, Japan)
S. Yamada (Sumitomo Heavy Industries, Japan)

Prolonged coke oven life (Joint ECC paper) 210
M. Depoux (Sollac Fos, France)
T. Canon (Cockerill Sambre, Belgium)
J. Jansbeken (Koninklijke Hoogovens, The Netherlands)
R. Pens (ILP Tarento, Italy)
J. Spitz (Thyssen Stahl AG, Germany)
Long life plan for BHP coke oven batteries
K. Hockings, P. Ryan, D. Gilroy (BHP, Australia)

Prolonging coke oven life at British Steel’s Teesside works
D. Hunter (British Steel plc, U.K.)

Control of the ageing of the metallic structure of coke oven batteries by continuous measurement of stresses and surface temperatures
F. Hanrot (Centre de Pyrolyse de Marienau, France)
R. Bovi (Sollac Fos, France)

Session 13
Cokemaking practice

The Kaiserstuhl coke dry quenching plant
J. Strunk (Ruhrkohle Bergbau AG, Germany)

Experiences on mixed gas heating of 7m tall coke oven batteries in Indian steel plant
M. Prasad, L. V. Gandhi, M. S. Pillai
(Metallurgical & Engineering Consultants, India)
M. K. Bandopadhyay (Visakhapatnam Steel Plant, India)

Prediction of coke-fissure formation during carbonization
S. Hasebe, S. Itagaki, I. Shimoyama, K. Fukada, K. Nemoto (NKK, Japan)

Mechanical treatment of coke produced from high ash coal blends
L. Parthasarathy, M. K. Sharma, A. K. Das, S. S. Bandyopadhyay (Steel Authority of India Ltd, India)

Coal blending design practice, using a new mathematical fluidity prediction model
K. Hashimoto, M. Honma (Kawasaki Steel Mizushima, Japan)
K. Hanaoka, K. Igawa, K. Sorimachi (Kawasaki Steel Tech. Research Lab., Japan)
Session 14

New cokemaking technologies and alternative ironmaking processes

Jumbo coking reactor (JCR) and two product coking process 273
H. Bertling, W. Rohde (European Cokemaking Technology Center, Germany)

Recent trends in the Japanese steel and coke industries and the concepts of a new cokemaking process 279
S. Kubo (The Japan Iron and Steel Federation, Japan)

Challenge for innovative cokemaking process in Japan 285
K. Nishioka (The Japan Iron and Steel Federation, Japan)

CTC Continuous cokemaking process 291
R. A. Wolfe (Coal Technology Corporation, USA)

The engineering of a cyclone converter furnace (CCF) plant 299
H. K. A. Meijer, J. van Laar, W. van der Knoop, R. van der Nederveen (Koninklijke Hoogovens, The Netherlands)

Fine iron ore injection into Corex® C-2000 of POSCO 304
S. Joo, I. O. Lee (RIST, Korea)
Y. M. Shin (Pohang Iron and Steel Company, Korea)

Development of a new scrap melting process based on massive coal and plastic injection 314
