Second International RILEM Symposium on
Adhesion between Polymers and Concrete

Organised by RILEM Technical Committee
151 – APC: Adhesion Technology in Concrete Engineering –
Physical and Chemical Aspects
and by Technische Akademie Esslingen

Dresden, Germany
September 14-17, 1999

EDITED BY
Prof. Ohama and Dr. Puterman

RILEM Publications S.A.R.L.
The Publishing Company of RILEM
Contents

Foreword XIII
Membership XV

PART 1 - SCIENTIFIC AND ENGINEERING ASPECTS

1 Some thoughts about gluing and its applications in construction 3
Y. MOUTON
Laboratoire Central des Ponts et Chaussées, France

2 How to analyse thermodynamic properties of solids and liquids in relation with adhesion? 9
L. COURARD
University of Liege, Dept. of Construction Materials, Belgium

3 The blister-test to determine the bond strength between polymer coatings and concrete 21
M. GÜNTER
Institute of Concrete Structures and Building Materials, University of Karlsruhe, Germany

4 Fracture behaviour of PCC 35
H. SCHORN
Lehrstuhl für Baustoffe, TU Dresden, Germany

PART 2 - MATERIALS AND ADHESION

5 Adhesion between fresh polymethyl methacrylate mortar and fresh cement mortar or concrete 47
Y. OHAMA¹, K. DEMURA¹, M. A. R. BHUTTA², T. KOBAYASHI² and T. KAWANO²
¹. Dept. of Architecture, College of Engineering, Nihon University, Koriyama, Fukushima-ken, Japan
². Maeta Techno-Research Inc., Sakata, Yamagata-ken, Japan
6 The influence of coupling agent on the properties of vinylester mortar
L. CZARNECKI and B. CHMIELEWSKA
Warsaw University of Technology, Poland

7 Thermally-induced interface stresses in polymer concrete – Portland cement concrete composite beams
D. U. CHOI, D. W. FOWLER and D. L. WHEAT
1. Hankyong National University, Korea
2. The University of Texas, Austin

8 Characteristics of bond between concrete layers
J. ŠUŠTERŠI, A. ŠAJNA, V. UKRAINCZYK and A. ZAJC
1. IRMA Institute for Research in Materials and Applications, Slovenia
2. University of Zagreb, Faculty of Civil Engineering, Croatia

9 Paste-aggregate adhesion in polymer-cement porous concrete
A. BEELDENS and D. VAN GEMERT
Katholieke Universiteit Leuven, Belgium

10 Effect of redispersible polymer powder addition to ultra rapid hardening cement mortar on strength development
M. WAKASUGI, T. YAMAMOTO, A. SUGIURA and H. SAKAKIBARA
Sumitomo Osaka Cement Co., Ltd., Japan

11 The influence of curing and surface preparation on the adhesion of protective coatings on concrete
Y. BALLIM and BT. BENN
1. University of the Witwatersrand, South Africa
2. Alpha Readymix, Alpha (Pty) Ltd, South Africa

PART 3 - SURFACE COATINGS

12 Theoretical analysis of suppressive effects of polymeric surface finishing materials on corrosion of reinforcing steel in neutralized concrete
T. FUKUSHIMA
Building Research Institute, Ministry of Construction, Japan
13 Concrete microscopy applied to the study of surface coatings: case studies
J. A. LARBI
TNO Building and Construction Research, Division of Building Technology, Delft, The Netherlands

14 Study on the stresses and deformations of concrete members due to setting shrinkage of polymer mortar
M. KAWAKAMI¹, H. TOKUSHIGE¹, H. TODATE¹, F. OMATA² and K. DOIUCHI³
1. Akita University, Japan
2. Sho-Bond Corporation, Japan
3. NOF Corporation, Japan

15 Aspects related to the adhesion property of a polymer used for protection of concrete in nuclear power plants
C. SENI
Mattec Engineering Ltd., Canada

16 An usability approach to technical evaluation of the polymer coatings for concrete substrate
L. CZARNECKI and P. LUKOWSKI
Warsaw University of Technology, Poland

17 2-component coatings on concrete: some physical and chemical aspects of adhesion
F. J. BUNDIES
Isernhagen/Hannover, Germany

18 Influences on the adhesion quality of epoxy coatings on concrete
K. LITTMANN¹ and B. SCHWAMBORN²
1. Bauchemieberatung, Geilenkirchen, Germany
2. Sozietät Sasse & Fiebrich, Aachen, Germany

19 Adhesion versus impregnation – binding to concrete
J. BORDADO
ICTPOL-IST, Lisboa, Portugal

20 Durability of polymer coatings as protection against carbonation and chloride penetration
M. FIEBRICH
Bauingenieur Sozietät Sasse & Fiebrich, Germany
PART 4 - PRACTICAL BONDING ASPECTS

21 Enhancement of adhesion of cementitious-rendering to concrete by polymeric additives
M. PUTERMAN
*National Building Research Institute, Technion, Haifa, Israel*

22 Evaluation method for adhesion test results of bonded wet concrete to epoxies
J. B. AGUIAR
*University of Minho, Portugal*

23 Adhesion and integrity of joints between construction materials
D. J. CLELAND and P. A. M. BASHEER
*The Queen's University of Belfast, United Kingdom*

24 Effects of the increased fibre surface wettability on the polypropylene fibre-concrete interfacial bonding and the properties of the polypropylene fibre reinforced concrete
L. TU, D. KRUGER and P. A. B. CARSTENS
1. Rand Afrikaans University
2. Atomic Energy Corporation of South Africa Limited, South Africa

25 Evaluation de l'adhérence sur béton d'un système de préparation des sols avant pose d'un revêtement
G. COLIN, M. CRESPEL and M. CURT
*Weber et Broutin, France*

26 Modelling of effects of shrinkage on the performance of adhesives
J. BIJEN, E. SCHLANGEN and T. SALET
1. Delft University of Technology
2. INTRON VB, the quality assessment institute for the building industry
3. Witteveen en Bos, The Netherlands

27 Sanations of reinforced concrete bridges with the polymer based materials
K. ŠLOPKOVÁ
*University of Zilina, Slovakia*
28 Paving blocks as composite elements of polymer bound surface-concrete and cement bound core-concrete
M. SCHMITZ¹ and T. KOHLMeyer²
1. UNI-International, Iffezheim
2. Baustoffwerke Neetze, Neetze

PART 5 - REPAIR METHODS

29 The problems with the bond strength of repair mortar
R. DROCHYTka¹ and P. ŠT PÁNEK²
1. Institute of Building Materials Technology and Components
2. Institute of Concrete and Masonry Structures
Faculty of Civil Engineering, TU Brno, Czech Republic

30 Adhesion properties of polymer composite materials for concrete repair
K. s. YEO¹, Y. s. LEE¹, K. Y. Ji¹ and Y. s. Shin²
1. Dept. of Agricultural Engineering, Kangwon National University, Chunchon, Korea
2. Dept. of Architecture, Ewha Women's University, Seoul, Korea

31 The temperature distribution in repair concrete due to the application of welding sheets and asphaltic layers on concrete bridge decks
F. Grossmann
Bundesanstalt für Straßenwesen, Germany

32 Effect of externally bonded fibre reinforced polymers on the tension stiffening behaviour of concrete prisms
S. Matthys, L. TAERWE and P. DE MEYER
Magnel Laboratory for Concrete Research, Dept. of Structural Engineering, University of Ghent, Belgium

33 Shear strengthening of concrete beams with frp laminates
C. Modena, C. Pellegrino and G. Golfetto
University of Padua, Italy

34 Epoxy injection - the effects and myths of pressure
M. a. Murray
Restruction Corporation, USA
35 An assessment of usability of injection materials for crack repairs in concrete structures
L. CZARNECKI¹, W. GLODKOWSKA² and Z. PIATEK²
1. Warsaw University of Technology, Poland
2. Koszalin Technical University, Poland

36 The renovation of cement-concrete road surface based on polymer-concrete
D. DURCANSKÁ
University of Zilina, Faculty of Civil Engineering, Slovakia

37 Humboldt bay nuclear power plant caisson inleakage repair project – Eureka, USA
M. M. ROURKE
BBZ USA, Inc., USA

PART 6 - TESTING METHODS

38 In-situ testing of adhesion between polymer-modified bituminous waterproofing membranes and concrete
K. OBA, M. N. PARTL and S. HEAN
Swiss Federal Laboratories for Materials Testing and Research (EMPA), Switzerland

39 Integrated non-destructive testing diagnosis of concrete structures
X. PENG¹, A. T. MOCZKO², P. STROEVEN³ and Y. CHENG¹
1. Northern Jiaotong University, Beijing, P. R. China
2. Wroclaw University of Technology, Wroclaw, Poland
3. Delft University of Technology, Delft, The Netherlands

40 Application of ultrasonic wave propagation to the cure monitoring of epoxy adhesives for restoration of concrete
M. FRIGIONE¹, V. A. M. LUPRANO² and A. MAFFEZZOLI¹
1. Dept. Materials Science, University of Lecce, Italy
2. PASTIS-CNRS, Brindisi, Italy
41 Non-destructive methods to assess adhesion between polymer composites and portland cement concrete 467
A. GARBACZ\textsuperscript{1}, L. CZARNECKI\textsuperscript{1} and J. R. CLIFTON\textsuperscript{2}
\textsuperscript{1}. Warsaw University of Technology, Poland
\textsuperscript{2}. National Institute of Standards and Technology, MD, USA

42 Dimensional changes of polymer cement mortars based on latices and redispersible polymer powders due to moisture transport 475
H. JUSTNES\textsuperscript{1}, T. REYNAERS\textsuperscript{2} and W. VAN ZUNDERT\textsuperscript{2}
\textsuperscript{1}. SINTEF Civil and Environmental Engineering, Cement and Concrete, Trondheim, Norway
\textsuperscript{2}. Katholieke Universiteit Leuven, Civil Engineering Everlee, Belgium

43 Adhesion and the new series of European standards on protection and repair of concrete structures 485
H. R. SASSE\textsuperscript{1} and R. STENNER\textsuperscript{2}
\textsuperscript{1}. Institute for Building Research IBAC, RWTH Aachen, Germany
\textsuperscript{2}. Polymer Institut, Germany

PART 7 - DURABILITY & AGEING

44 A repair system of concrete corroded by bacteria using HDPE sheets and mortar admixed with inhibitor 497
A. NEGISHI and T. MAEDA
Hazama Co, Ltd, Technical Institute, Japan

45 Effects of sunshine/rain cycles on the behaviour of repairing systems 511
L. COURARD\textsuperscript{1}, R. DEGEIMBRE\textsuperscript{1}, A. DARIMONT\textsuperscript{1} and J. WIERTZ\textsuperscript{2}
\textsuperscript{1}. University of Liege, Dept. of Construction Materials, Belgium
\textsuperscript{2}. Ministry of Equipment and Transport, Liege, Belgium

46 The effect of environmental factors on the adhesion of epoxy adhesives to concrete 523
A. ÇOLAK and B. SAYIL
Faculty of Architecture, Istanbul Technical University, Turkey
47 Effect of remainder SO$_4^{2-}$ ions on durability of concrete protectice coating
K. FUJISAWA$^1$, W. JANG$^2$ and T. NONAKA$^3$
1. Nippon Jikkou, Japan
2. United Graduate School of Agricultural Sciences, Tottori University, Japan
3. Faculty of Life and Environmental Science, Shimane University, Japan

48 Influence of mechanical characteristics and surface configurations of substrate concrete on separation resistance of synthetic resin floor coatings against dynamic load of caster traffic
E. SAKAI and T. MIKAMI
Tokyo Institute of Technology, Japan

49 Polymeric adhesives for the restoration of concrete structures: environmental effects
M. A. AIELLO$^1$, M. FRIGIONE$^1$ and D. ACIERNO$^2$
1. Dept. Materials Science, University of Lecce, Italy
2. Dept. Engineering of Materials and Production, University of Naples, Italy

50 FRP lining adhering to secondary concrete of shield tunnel and analysis of peeling by backwater pressure
Y. URAKAMI
Hyogo Public Enterprise Agency, Harima Science Park City Construction Bureau, Japan

51 Application of recycled polyester resin for segmental precast concrete beams jointers
D. SURAATMDJA, D. R. MUNAF, B. LATIONO, H. RIYANTO and A. KARJANTO
Laboratory of Structures and Materials, Department of Civil Engineering, Institute Teknologi Bandung, Indonesia
