New Developments in Psychometrics

Proceedings of the International Meeting of the Psychometric Society IMPS2001

Osaka, Japan, July 15-19, 2001

With 128 Figures
Contents

Preface v
Greetings vii
Reviewers viii
Conference Committee ix

Part 1 Key Note Speeches and Invited Lectures

Psychometric Engineering as Art: Variations on a Theme 3
David Thissen

Vectors and Matrices in Psychometrics with Special Emphasis on Generalized Inverse and Projection Matrices 19
Haruo Yanai

Early Statistical Modelling of Latent Quantities: The History of Distance Measurement by Triangulation 33
Willem J. Heiser

Relationships among Various Kinds of Eigenvalue and Singular Value Decompositions 45
Yoshio Takane

Power of $\chi^2$ Goodness-of-fit Tests in Structural Equation Models: the Case of Non-Normal Data 57
Albert Satorra

The Respondent-Generated Intervals Approach to Sample Surveys: From Theory to Experiment 69
S. James Press and Judith M. Tanur

Student Profile Scoring Methods for Informative Assessment 81
Louis V. DiBello and William Stout

Part 2 Structural Equation Modeling and Factor Analysis

The Determinants of the Bias in Minimum Rank Factor Analysis (MRFA) 95
Gregor Sočan and Jos M.F. ten Berge

A Note on the Approximate Distributions of Fit Indexes for Misspecified Structural Equation Models 103
Haruhiko Ogasawara
Longitudinal Study of Early Chinese Linguistics Growth: Revealing Sequential Relations of Linguistic Antecedents and Consequences ........................................ 109  
Chih-Chien Yang and Chih-Chiang Yang

Some Cautionary Notes on Factor Loadings Estimated by Principal Component Analysis ........................................................................................................ 117  
Manabu Sato and Masaaki Ito

Simultaneous Mean and Covariance Structure Analysis for Two Level Structural Equation Models on EQS ................................................................. 123  
Peter M. Bentler and Jiajuan Liang

On Analysis of Nonlinear Structural Equation Models ................................ 133  
Sik Yum Lee and Hong Tu Zhu

Use of SEM Programs to Precisely Measure Scale Reliability ..................... 141  
Yutaka Kano and Yukari Azuma

Estimating the Statistical Power in Small Samples by Empirical Distributions .................................................................................................................. 149  
Ab Mooijaart

Language Selection and Social Structure Transition in Ukraine from 1959 to 1989 ................................................................. 157  
Masayuki Kuwata, Makoto Hayasaka and Masanori Nakagawa

Identifying Influential Observations for Loadings in Factor Analysis ............ 165  
Wing K. Fung and Chi Wai Kwan

Effects of Self-disclosure and Self-preoccupation on Depression .................. 173  
Aiko Moriwaki, Shinji Sakamoto and Yoshihiko Tanno

Part 3 Item Response Theory (IRT) and Adaptive Testing

Developments in Practical Nonparametric IRT Scale Analysis ..................... 183  
Klaas Sijtsma

Groups of Persons and Groups of Items in Nonparametric Item Response Theory .............................................................................................................. 191  
Ivo W. Molenaar

Bias of Ability Estimates Using Warm’s Weighted Likelihood Estimator (WLE) in the Generalized Partial Credit Model (GPCM) ................................. 199  
Chung Park and Eiji Muraki

Item Selection in Polytomous CAT .................................................................. 207  
Bernard P. Veldkamp

Bayesian Checks on Outlying Response Times in Computerized Adaptive Testing ............................................................................................................ 215  
Wim J. van der Linden

Construct Comparability in International Assessments: Comparability of English and French Versions of TIMSS ......................................................... 223  
Kadriye Ercikan and Kim Koh
Are the Japanese More Depressed than the U.S. Individuals?  
- An IRT-DIF Study - ................................................................. 231  
  Noboru Iwata  
General and Specific Misfit of Nonparametric IRT-models ................. 239  
  Marieke J.H. van Onna  
Application of IRT in Assessment of Chewing Ability ...................... 247  
  Kazuo Takeuchi  
The Effects of the Temporal Structure and the Presentation Modality on English  
Listening Comprehension Test ..................................................... 255  
  Teruhisa Uchida, Naoko Nakaune, Kenichi Kikuchi, Shin-ichi Mayekawa, and  
  Tomoichi Ishizuka

Part 4 Testing in General
Estimating Testing Time Extension Ratios for Students with Disabilities from  
Item Cumulative Curves .................................................................. 265  
  Mamoru Fujiyoshi and Akio Fujiyoshi  
The Effect of Clustered Objective Probability Scoring with Truncation (T-COPS)  
on Reliability .................................................................................. 273  
  Tetsuhito Shizuka  
A Framework for Reusing Assessment Components ........................... 281  
  Russell G. Almond, Linda S. Steinberg and Robert J. Mislevy  
Investigating the Local Fit of Item-score Vectors ............................... 289  
  Wilco H.M. Emons  
Developing a Domain-referenced Test Given a Selection Ratio and a Cut-off  
Score: An Application of Item Response Theory ............................... 297  
  Soonmook Lee, Cheongtag Kim and Myoung-So Kim  
Investigating Cross-cultural Differences in Crying Using Manifest Invariant  
Item Ordering .................................................................................. 305  
  L. Andries van der Ark and Mark H. P. van Diem  
Bayesian Regressions for Cross-validation: An Application ................ 313  
  Aye Aye Myint, Hidetoki Ishii and Hiroshi Watanabe  
Validity and Truth .......................................................................... 321  
  Denny Borsboom, Jaap van Heerden and Gideon J. Mellenbergh

Part 5 Multivariate Statistical Methods
The Hierarchical Theory of Justification and Statistical Model Selection ...... 331  
  Maarten Speekenbrink  
Robust Designs for Longitudinal Mixed Effects Models ....................... 339  
  Martijn P.F. Berger, Mario J.N.M. Ouwens and Frans E.S. Tan  
On Conditional Distribution of Sliced Inverse Regression Model ........... 347  
  Masahiro Mizuta
Uniqueness Properties of Three-way Component Models with Offset Terms ...
Henk A.L. Kiers

An Assessment of Non-monotonicity of Missing-data Patterns for Incomplete Multivariate Data
Manabu Iwasaki and Reiko Abe

A Unified Approach to Oblique Procrustes Problems
John Gower

Automatic Generation of Intervention Effect Estimation Formula
Tatsuo Otsu

An Investigation of Bayes Estimation Procedures for the Two-parameter Logistic Model
Seock-Ho Kim

Coping Strategies as Predictors of Psychological Distress among Employees in Japan
Akihito Shimazu and Shoutaroh Kosugi

Estimating Mediated Effects with Survival Data
Jenn-Yun Tein and David P. MacKinnon

A Backward Induction Computational Procedure to Sequential Mastery Testing
Hans J. Vos

Bayes and Generalized Bayes Tests for Tree Ordered Normal Means
Nariaki Sugiura

Model Selection Criteria for Growth Curve Model with Hierarchical Within-Individual Design Matrices
Yasunori Fujikoshi

Pooling Component Means: Making Sense or Folly
S. E. Ahmed

Part 6 Scaling

Geometric Perspectives of Dual Scaling for Assessment of Information in Data
Shizuhiko Nishisato

Factors which Influence Disclosure about Human Resources. An International Comparison Based on Disclosure Issued in Form 20-F and Annual Reports
José G. Clavel, Esther Ortiz and Isabel Martínez

An Application of Rotation in Correspondence Analysis
Michel van de Velden and Henk A.L. Kiers

Complex Difference System Models for the Analysis of Asymmetry
Naohito Chino

A Distance Representation of the Quasi-symmetry Model and Related Distance Models
Mark de Rooij and Willem J. Heiser
Two-mode Three-way Nonmetric Multidimensional Scaling with Different Directions of Asymmetry for Different Sources .............................................. 495
Akinori Okada and Tadashi Imaizumi

A Latent Variable Model for Multidimensional Unfolding .......................... 503
Kohei Adachi

Monte Carlo Simulation in Three-way Unfolding: Assessing the Combined Effect of Sparseness and Variation of the Cell Frequencies ......................... 511
Laurence E. Frank, Mark de Rooij and Willem J. Heiser

On Thurstone's Model for Paired Comparisons and Ranking Data ............. 519
Albert Maydeu-Olivares

Two Kinds of Space in Psychophysics ...................................................... 527
Tarow Indow

A Variable Variance Model: A Critical Formulation of Fechner's Problem .... 535
Yasuharu Okamoto

An Application of a Multiplicative Utility for Non-commutative Joint Receipts to Portfolio Choice ................................................................. 543
Yutaka Matsushita

Multidimensional Scaling of Computer-generated Abstract Forms ................ 551
Tadasu Oyama, Hisao Miyano and Hiroshi Yamada

Part 7 Classification Method

Time Allocation Modeling for Weekend Travel in Tokyo, Using Combined Utility Maximization and Activity Choice Approaches ............................... 561
Irwan Prasetyo, Hirosato Yoshino, Daisuke Fukuda and Tetsuo Yai

Cluster Instability as a Result of Data Input Order .................................. 569
Willem A. van der Kloot, Samantha Bouwmeester and Willem J. Heiser

A Connectionist Model of Phonological Working Memory .......................... 577
Shogo Makioka

Brain Mapping Data: Classification, Principal Components and Multidimensional Scaling ................................................................. 585
Keith J. Worsley

Human Decision Making Model by Boolean Approach and Fuzzy Reasoning ................................................................. 593
Yasunari Kono and Toshiyuki Yamashita

A New Model of Rating Scale Method Considering Context Effects Based on Fuzzy Logic and its Application for a Psychological Response to the Acoustic Noise ............................................................... 601
Y uichi K a t o , T a k a h i r o I m a o k a a n d Shizuma Yamaguchi

Subtype Classification of Social Anxiety in Japanese Undergraduates .......... 609
Ibuki Mohri and Yoshihiko Tanno

Another Aspect of Psychometrics; Survey Meta-data Description by XML .... 617
Daisuke Saito and Tatsuo Otsu
Some Alternative Clustering Methods for Mokken Scale Analysis .......................... 623
   Alexandra A.H. van Abswoude and Jeroen K. Vermunt
Knowledge-based Cascade-correlation: Varying the Size and Shape of Relevant Prior Knowledge ................................................................. 631
   Thomas R. Shultz and Francois Rivest

Part 8 Independent Component Analysis and Principal Component Analysis
A PCA for Interval-valued Data Based on Midpoints and Radii .......................... 641
   Francesco Palumbo and Carlo N. Lauro
Independent Component Analysis for Non-normal Factor Analysis .................. 649
   Aapo Hyvärinen and Yutaka Kano
Self-Organizing Method for Robust Blind Source Separation by β-Divergence ................................................................. 657
   Mihoko Minami
Examination of Independence in Independent Component Analysis .................. 665
   Shohei Shimizu and Yutaka Kano
Neural Coding by Temporal and Spatial Correlations .................................... 673
   Allan Kardec Barros, Andrzej Cichocki and Noboru Ohnishi
Asymptotic Distributions and Confidence Intervals of Component Loading in Principal Component Analysis ......................................................... 681
   Shin-ichi Tsukada and Takakazu Sugiyama
Text Segmentation by Latent Semantic Indexing .......................................... 689
   Tsunenori Ishioka

Contributors ....................................................................................................... 697
Keyword Index ................................................................................................... 699
