Preface ............................................................... vii
Contributors ......................................................... xix

1 Introduction ...................................................... 1
   P. J. Gramann, T. A. Osswald
   1.1 Historical Background ........................................ 1
   1.2 The Reciprocating Screw Injection Molding Machine ......... 9
      1.2.1 The Plasctication and Injection Unit .................. 9
      1.2.2 The Clamping Unit ..................................... 10
      1.2.3 The Mold Cavity ...................................... 11
   1.3 The Injection Molding Cycle ................................ 13
   1.4 Related Injection Molding Processes ......................... 17
   References ................................................... 18

2 Injection Molding Materials .................................... 19
   T. A. Osswald
   2.1 Historical Background ........................................ 19
   2.2 Macromolecular Structure of Polymers ....................... 23
   2.3 Molecular Weight .......................................... 27
   2.4 Conformation and Configuration of Polymer Molecules ....... 30
   2.5 Thermoplastic Polymers ..................................... 34
      2.5.1 Amorphous Thermoplastics ............................. 34
      2.5.2 Semi-Crystalline Thermoplastics ...................... 36
      2.5.3 Examples of Common Thermoplastics ................... 43
   2.6 Thermosetting Polymers .................................... 46
      2.6.1 Cross-Linking Reaction ................................. 46
      2.6.2 Examples of Common Thermosets ....................... 48
   2.7 Copolymers and Polymer Blends ............................. 49
   2.8 Elastomers ................................................. 51
      M. DeGreiff
      2.9 Efficient Vulcanizing Systems ...................52
   2.10 Thermoplastic Elastomers ................................ 53
      G. Holden
      2.10.1 Service Temperatures ................................. 54
      2.10.2 Examples of Common Thermoplastic Elastomers ......... 55
   References ................................................... 61
3 Processing Fundamentals

T. A. Osswald

3.1 Processing Data
3.1.1 Temperature Settings
3.1.2 Injection and Pack-Hold Pressure Settings
3.1.3 Drying
3.1.4 Processing Data for Thermoplastic Elastomers
3.1.5 Processing Data for Thermosets
3.1.6 Processing Data for Elastomers

G. Holden

3.2 Rheology of Polymer Melts
3.2.1 Shear Thinning Behavior of Polymers
3.2.2 Simplified Flows Common in Injection Molding
3.2.3 Estimating Injection Pressure and Clamping Force (Stevenson Model)
3.2.4 Nonisothermal Flows in Polymer Processing
3.2.5 Normal Stresses in Shear Flow
3.2.6 Deborah Number
3.2.7 Rheology of Curing Thermosets
3.2.8 Suspension Rheology

3.3 Rheometry
3.3.1 The Melt Flow Indexer
3.3.2 The Capillary Viscometer
3.3.3 Viscosity from the Capillary Viscometer

3.4 Anisotropy Development During Processing
3.4.1 Orientation in the Final Part
3.4.2 Fiber Damage

3.5 Solidification and Curing Processes
3.5.1 Solidification of Thermoplastics
3.5.2 Solidification of Thermosets
3.5.3 Residual Stresses, Shrinkage, and Warpage

References

4 Plasticating

C. Rauwendaal, P. J. Gramann

4.1 The Plasticating Unit
4.1.1 The Ram Extruder
4.1.2 The Reciprocating Screw

4.2 Functions of the Plasticating Unit
4.2.1 Solids Conveying
4.2.2 Melting or Plasticating
4.2.3 Melt Conveying
4.2.4 Degassing or Devolatilization
4.2.5 Mixing

4.3 Conclusion

References
5 Clamping Unit

R. Farrell

5.1 Metal Fatigue and Its Importance in Clamp Design
5.1.1 Importance in Clamp Design
5.1.2 A Brief History of Metal Fatigue
5.1.3 The Three Phases of Metal Fatigue
5.1.4 Determination of Design Stress for Metal Fatigue
5.1.5 Determination of Survival Factor (SF)
5.1.6 Conclusion of Discussion of Metal Fatigue

5.2 Functions of the Clamping System

5.3 The Three Types of Clamping Systems
5.3.1 Hydraulic
5.3.2 Hydromechanical
5.3.3 Mechanical
5.3.4 Types of Toggle Systems

5.4 Key Elements of a Clamp
5.4.1 Platens
5.4.2 Tie Rods and Nuts
5.4.3 Toggle Pins and Bushings
5.4.4 Tie-Rod Bushings
5.4.5 Moving Platen Support
5.4.6 Shut Height Adjustment
5.4.7 Ejector Systems

5.5 A Special Discussion of Tie-Rod Design
5.5.1 Why This Element Is So Important
5.5.2 Thread Load Distribution
5.5.3 Thread Bending Stress
5.5.4 Thread Axial Stress
5.5.5 Combined Stresses
5.5.6 Mitigating Factors
5.5.7 Ways to Improve the Design

5.6 Understanding Clamp Spring Rate (Stiffness)
5.6.1 How to Determine Clamp Spring Rate
5.6.2 The Importance of Clamp Spring Rate
5.7 Math Model for a Toggle Clamp
5.8 The Farrell Square Root Rule
5.8.1 Relationships That Follow from the Farrell Square Root Rule
5.8.2 The Whole Machine Can Follow the Square Root Rule

References

6 Mold Design

J. Beaumont

6.1 Standard Mold Assembly
6.2 Cold Runner Molds
6.2.1 Two-Plate Cold Runner Mold
6.2.2 Three-Plate Cold Runner Mold
6.3 Hot Runner Molds
6.3.1 Externally Heated Manifold and Drops
8 Statistical Process Control

C. Rauwendael

8.1 Statistical Process Control
8.1.1 Implementing Statistical Process Control
8.1.2 Basic Statistical Concepts
8.2 Control Charts
8.2.1 Introduction
8.2.2 Control Charts for Variables Data
8.2.3 Control Charts for Attributes Data
8.3 Process Capability and Special SPC Tools for Molding
8.3.1 Introduction
8.3.2 Capability Indexes
8.3.3 Use of Computers
8.3.4 Special SPC Techniques for Injection Molding

References

9 Special Injection Molding Processes

L.-S. Turng

9.1 Coinjection (Sandwich) Molding
9.1.1 Process Description
9.1.2 Process Advantages
9.1.3 Process Disadvantages
9.1.4 Applicable Materials
9.1.5 Typical Applications
9.2 Fusible (Lost, Soluble) Core Injection Molding
9.2.1 Process Description
9.2.2 Process Advantages
9.2.3 Process Disadvantages
9.2.4 Applicable Materials
9.2.5 Typical Applications
9.3 Gas-Assisted Injection Molding
9.3.1 Process Description
9.3.2 Process Advantages
9.3.3 Process Disadvantages
9.3.4 Applicable Materials
9.3.5 Typical Applications
9.4 Injection-Compression Molding
9.4.1 Process Description
9.4.2 Process Advantages
9.4.3 Process Disadvantages
9.4.4 Applicable Materials
9.4.5 Typical Applications
9.4.6 Computer Simulation for Injection-Compression Molding
9.5 In-Mold Decoration and In-Mold Lamination
9.5.1 Process Description
9.5.2 Process Advantages
9.5.3 Process Disadvantages
9.5.4 Mold Design and Processing Considerations
