Supramolecular Liquid Crystals

Isabel M. Saez · John W. Goodby (✉)

The Department of Chemistry, The University of York, York YO10 5DD, UK
iss500@york.ac.uk

1	Introduction	1
1.1	Defining the Structures of Supramolecules	2
1.2	The Self-Organization Process	12
2	Liquid-Crystalline Polypedes – Dendrimers	15
2.1	Effect of Density of Mesogens and Number Generation	17
2.2	Effect of Spacer Length	19
2.3	Effect of Incompletion of Outer Shell or Generation	22
2.4	Effect of Chirality on Physical Properties	26
2.5	Effect of Hard Core Scaffolds – Silsesquioxanes	27
2.6	Effect of Hard Core Scaffolds – Fullerene	44
2.7	Effect of Hard Core Scaffolds – Molecular “Boojums”	45
3	Multipedes	48
3.1	“Janus” Liquid-Crystalline Multipedes	50
3.2	Functional Liquid-Crystalline Supramolecules	53
3.3	Complex Functional Multipedes	58
4	Summary	58
	References	59

Liquid Crystalline Assembly of Rod–Coil Molecules

Ja-Hyoung Ryu · Myongsoo Lee (✉)

Center for Supramolecular Nano-Assembly and Department of Chemistry, Yonsei University, 120-749 Seoul, Korea
mslee@yonsei.ac.kr

1	Introduction	64
2	Diblock Rod–Coil Systems	65
2.1	Rod–Coil Diblock Copolymers Based on Perfectly Monodisperse Rods	65
2.2	Rod–Coil Diblock Copolymers Based on Polydisperse Rods	71
2.3	Rod–Coil Diblock Copolymers Based on Peptide Rods	73
3	Triblock Rod–Coil System	75
3.1	ABC Coil–Rod–Coil Triblock Copolymers	75
3.2	ABA Coil–Rod–Coil Triblock Copolymers	79
3.3	BAB Rod–Coil–Rod Triblock Copolymers	86
3.4	Novel Rod–Coil Triblock Copolymers	87
4	Multiblock Rod–Coil System	90
4.1	Main-Chain Rod–Coil Copolymers	90
4.2	Side-Chain Rod–Coil Copolymers	92
5	Conclusions	94
	References	95

Liquid Crystalline Blue Phases

Hirotsugu Kikuchi

Institute for Materials Chemistry and Engineering, Kyushu University,
6-1 Kasuga-Koen, 816-8580 Kasuga, Fukuoka, Japan
kikuchi@cm.kyushu-u.ac.jp

1	Introduction	99
2	What are Blue Phases?	100
3	Discovery of Blue Phases	100
4	Simple and Double Twists	102
5	Structure of Blue Phases	105
6	New Materials Exhibiting Blue Phases	108
7	Expanding the Stable Temperature Range of Blue Phases	109
8	Smectic Blue Phase	111
9	Photonics of Blue Phases	114
10	Electro-optics of Blue Phases	114
11	Conclusions	116
	References	116

Supramolecular Interactions in the Formation of Thermotropic Liquid Crystalline Polymers

Stuart J. Rowan (✉) · Patrick T. Mather (✉)

Department of Macromolecular Science and Engineering,
Case Western Reserve University,
2100 Adelbert Road, Cleveland, OH 44106-7202, USA
stuart.rowan@case.edu, ptmather@syr.edu

1	Introduction	119
1.1	Background on Combining Supramolecular Chemistry and Liquid Crystallinity	122
2	Recent Developments (2000–)	125
2.1	Main-Chain SLCs	125
2.2	Supramolecular Columnar Structures	131
2.3	Side-Chain and Network SLCs	136
3	Perspectives and Outlook	144
	References	146

Functional Liquid-Crystalline Polymers for Ionic and Electronic Conduction

Masahiro Funahashi · Harutoki Shimura · Masafumi Yoshio ·
Takashi Kato (✉)

Department of Chemistry and Biotechnology, School of Engineering,
The University of Tokyo, 7-3-1 Hongo, Bunkyo-ku, 113-8656 Tokyo, Japan
kato@chiral.t.u-tokyo.ac.jp

1	Introduction	151
2	Ion-Conductive Liquid-Crystalline Polymers	153
2.1	Organic Ion-Conductive Polymers	153
2.2	Low Molecular Weight Nanostructured Liquid-Crystalline Compounds	154
2.3	Nanostructured Liquid-Crystalline Polymers	156
3	Electron-Conductive Side-Chain Liquid-Crystalline Polymers	163
3.1	Side-Chain Polymers and Low Molecular Weight Liquid Crystals	163
3.2	Pioneering Works for Liquid-Crystalline Polymers	166
3.3	Semiconductive Polymers with Nematic Phases	169
3.4	Photopolymerization in Smectic Phases	172
3.5	Miscellaneous Systems and Related Compounds	174
4	Conclusion	175
	References	176

Functional Lyotropic Liquid Crystal Materials

Douglas L. Gin^{1,2} (✉) · Cory S. Pecinovsky¹ · Jason E. Bara² · Robert L. Kerr¹
