Contents

I Foundations 1

1 Introduction 2
1.1 Outline of this Thesis . . . 4

2 Previous Work and Motivation 6
2.1 Model-Based Object Detection . . . 6
2.2 Appearance-Based Object Detection . . . 8
2.2.1 Face Detection . . . 8
2.2.2 Vehicle Detection . . . 9
2.3 Tracking and State Estimation . . . 12
2.4 Motivation . . . 14
2.4.1 Model-Based versus Appearance-Based Object Detection . . . 15
2.4.2 Limitations of Previous Approaches . . . 16
2.4.3 The Ideal Unified Framework . . . 16
2.4.4 Contribution of this Thesis . . . 18

3 Boosting 20
3.1 AdaBoost . . . 20
3.2 RealBoost . . . 22
3.3 GentleBoost . . . 23
3.4 Boosting and Logistic Regression . . . 24
3.4.1 Additive Regression . . . 25
3.4.2 Additive Logistic Regression for Classification . . . 26
3.4.3 Boosting Algorithms in the Logistic Regression Framework . . . 26
3.5 Convergence of Boosting Algorithms . . . 30

4 Cascaded Object Detection 31
4.1 Boosting for Object Detection . . . 31
4.1.1 Feature Set . . . 32
4.1.2 Integral Image . . . 32
4.1.3 Stage Training Algorithm . . . 33
4.1.4 Cascade Training Algorithm . . . 34

4.2 Motivation of the Features . . . 36
4.3 Improvements and Modifications . . . 37
4.3.1 Feature Set . . . 38
4.3.2 Training Algorithm . . . 39
4.3.3 Automatic Parameter Choice . . . 42
4.3.4 Soft Cascade . . . 43
4.3.5 Sharing Features for Multi-Class Object Detection . . . 44

5 Object State Filtering **46**
5.1 The Bayesian Filtering Framework . . . 46
5.2 Kalman Filter . . . 47
5.2.1 Non-linear Kalman filtering . . . 49
5.3 Particle Filters . . . 50
5.3.1 Algorithms . . . 50
5.4 Multi-Object Tracking . . . 55
5.4.1 Mixture Tracking . . . 55
5.4.2 Mixture Tracking with Particle Filters . . . 56
5.4.3 Joint Probabilistic Data Association Filter . . . 58

6 Assessing the Performance of Object Detection Systems **60**
6.1 Measures for Single Frame Detections . . . 60
6.1.1 Receiver Operator Characteristic (ROC-)Curve . . . 61
6.2 Measures for Multi-Frame Object Tracks . . . 61
6.3 Summary . . . 63

II Own Contributions **65**

7 Object Detection **66**
7.1 Introduction . . . 66
7.2 Cascade Training Implementation . . . 67
7.2.1 Feature Evaluation . . . 67
7.2.2 Training and Test Set . . . 68
7.2.3 Stump Learner Training . . . 69
7.3 Improved Cascade Stage Training . . . 70
7.3.1 Disadvantages of the Stump Learner . . . 70
7.3.2 Weak Learners Based on Kernel Density Estimation . . . 71
7.3.3 Decision Trees as Weak Learners . . . 74
7.3.4 Weak Learner Comparison . . . 74
7.3.5 FloatBoost . . . 78
7.4 Faster Training of a Probabilistic Learner . . . 79
7.5 Improved Cascade Training . . . 80

7.5.1 Improvement Opportunities . . . 81
7.5.2 Modified Training and Classification Algorithm . . . 82
7.5.3 Empirical Results . . . 83
7.5.4 Classifier Structure . . . 88
7.5.5 Summary . . . 88
7.6 Optimisation of Training Parameters . . . 89
7.6.1 Classifier Comparison . . . 89
7.6.2 Border Around the Objects . . . 89
7.6.3 Multi-Class Approach . . . 90
7.7 Classifier Analysis . . . 93
7.7.1 False-Positives After Each Stage . . . 93
7.7.2 Run-Time . . . 93
7.8 Summary . . . 95

8 Object Tracking **98**
8.1 Tracking and Detection . . . 98
8.2 Object Tracking with a Classification Algorithm . . . 99
8.2.1 Modified Features . . . 100
8.2.2 Training Algorithm . . . 100
8.3 Comparison with Other Trackers . . . 101
8.3.1 Tracking by Fusion of Detection Results . . . 102
8.3.2 Tracking with Difference of Edge Features . . . 102
8.3.3 Tracking with the Trained Object Tracker . . . 103
8.4 Empirical Results . . . 104
8.4.1 Search Strategy . . . 104
8.4.2 Long-Term tracking . . . 104
8.4.3 Short-Term tracking . . . 106
8.4.4 Large Test Set . . . 106
8.5 Features Used in a Tracking Classifier . . . 108
8.6 Summary . . . 109

9 Object Detector and Object Tracker Properties **111**
9.1 Preface . . . 111
9.2 Introduction . . . 111
9.3 Object Detector Properties . . . 112
9.3.1 Error Model for Elementary Detections . . . 113
9.3.2 Merging of Elementary Detections . . . 115
9.3.3 Error Model for Merged Detections . . . 117
9.3.4 Translation and Scale Invariance . . . 118
9.4 Object Tracker Properties . . . 119
9.4.1 Error Model for Elementary Detections . . . 119
9.4.2 Error Model for Merged Detections . . . 119

9.4.3 Accuracy and Translation and Scale Invariance 122
9.5 Summary 122

10 Object Detection and Tracking Framework **124**
10.1 Generic Algorithm 124
10.2 Initial Detection 124
10.3 Predicting Old Detections 126
10.4 Re-Detection 126
10.5 Clustering and Merging of Elementary Detections 127
10.6 Association over Time 128
10.6.1 Tracker 128
10.7 Removing Overlapping Detections 129
10.8 Summary 130

11 Estimating Reliable Existence Probabilities **131**
11.1 Bayesian Kernel Density Estimate of the Object Probabilities 131
11.1.1 Local Linear Kernel Density Estimation 133
11.2 Analytical Results for the Object Probability 134
11.3 Estimating Object Probabilities for Single (Elementary) Detections . 136
11.3.1 Separate Estimation for each Stage 136
11.3.2 Integrated Estimation for all Cascade Stages 142
11.4 Estimating Object Probabilities for Merged Detections 145
11.4.1 Marginalised Estimation 145
11.4.2 Joint Probability Estimation 148
11.5 Summary 148

12 Likelihood Tracking **150**
12.1 Likelihood Tracking Framework 151
12.2 Designing a Likelihood Tracker for Vehicle Detection 153
12.2.1 Computation of Observation Probability 153
12.2.2 Likelihood Kalman tracker 157
12.2.3 Likelihood Particle Filter Tracker 159
12.2.4 Kalman vs. Particle Filter Likelihood Tracker 161
12.3 Summary 162

13 Experimental Results **164**
13.1 Quantitative Results 164
13.1.1 Training and Test Set 165
13.1.2 Raw Classifier 165
13.1.3 Searching Near Old Detections 166
13.1.4 Tracking 166
13.1.5 Particle Filter 166

13.1.6 Full Likelihood Tracking 167
13.2 Run-Time 167
13.3 Examples on Real-World Sequences 167
13.3.1 Detection of Frontal Vehicles 168
13.3.2 Small Detections 168
13.3.3 Results on Inner-City Sequences 168
13.3.4 False-Positives 170
13.3.5 Night Classifier 170
13.4 Summary 170

14 Conclusions **172**

Bibliography **176**
