# Contents

Chapter 1  The Diagnostic Approach to Malignant Type Calcifications on the Mammogram  

Overview of the Diagnostic and Management Problems Encountered When Malignant Type Calcifications Are Detected on the Mammogram  
Relative Frequency of Calcification Occurrence  
Distribution of All Histologically Verified Malignant Type Calcifications  
Malignancy Ratio of Casting Type Calcification Cases  
Malignancy Ratio of Crushed Stone-like / Pleomorphic Calcification Cases  
Malignancy Ratio of Powdery Calculation Cases  
Crushed Stone-like and Powdery / Cotton Ball-like Calcifications on the Mammogram  
Cluster Calcifications in Necrotic Malignant Tissue  
Classification of Crushed Stone-like Calcifications Produced by Malignant Processes  

Chapter 2  Group 1: One or Two Clusters of Crushed Stone-like Calcifications of the Mammogram Produced by Malignant Processes  

Group 1A: The Mammographic Finding Represents the Main Histological Finding  
The Long-term Outcome of Cases in Group 1A  
Group 1B: Contiguous and Extensive Disease on Histology  
The Long-term Outcome of Cases in Group 1B  

Chapter 3  Multiple Clusters of Crushed Stone-like Calcifications on the Mammogram Produced by Malignant Processes  

Group 2A: Multiple Foci on Histology with Intervening Normal Tissue  
Group 2B: Contiguous and Extensive Disease on Histology  

Chapter 4  Differential Diagnosis of Breast Diseases Producing Clustered, Discernible Calcifications  

Introduction  
Fibrocystic Change: Pathophysiology, Imaging, and Differential Diagnosis  
Explanatory Illustration of the Pathophysiological Process Leading to the Formation of Teacup-like Calcifications in Fibrocystic Change  
Comparative Mammographic–Histological Demonstration of the Sediment Resulting in Teacup-like Calcifications  
Comparative Galactographic–Subgross 3D Histological Demonstration of Fibrocystic Change  
Demonstration of the Bilateral, Extensive Fibrocystic Change with Calcifications  
Demonstration of the Three Types of Calcifications Occurring in Fibrocystic Change  
Involutional Type Calcifications: Pathophysiology, Imaging, and Differential Diagnosis  
Fibroadenoma  
Papilloma  

Chapter 5  The Prognostic Importance of Mammographic Tumor Features
