General introduction                                    1

1. Remarks regarding content                            1
2. Remarks regarding style and methodology              3

**PART I: RATIONALITY**

Introduction to Part I                                   9

1. Why rationality?                                      9
2. Methodological individualism                          11

Chapter 1: The economic conception of rationality        15

1. Economic rationality and its failures                 15
   1.1. The level of actions and the relation with their reasons  16
   1.1.1. Maximization                                      16
   1.1.2. Instrumentality                                   16
   1.1.3. Intentionality                                    19
   1.2. The level of the reasons themselves: beliefs        20
   1.2.1. Consistency                                       20
   1.2.2. Perfect rationality                               21
   1.3. The level of the reasons themselves: preferences    22
   1.3.1. Consistency                                       22
   1.3.2. Transitivity                                      23
   1.3.3. Completeness                                      23
   1.3.4. Continuity                                       23
   1.3.5. Exogeneity                                        24
   1.3.6. Egoism                                           25
       1.3.6.1. Self-regarding preferences                   26
       1.3.6.2. Other-regarding preferences                  29
       1.3.6.3. Reducing other-regarding preferences to egoism 30
       1.3.6.4. Process-regarding preferences                33
       1.3.6.5. Reducing process-regarding preferences to egoism 34
   1.3.7. Egocentrism                                      34
2. The role of economic rationality within the social sciences 37
Chapter 2: Alternative conceptions of rationality

1. Minimal rationality
   1.1. The level of actions and the relation with their reasons
      1.1.1. Maximization
      1.1.2. Instrumentality
      1.1.3. Intentionality
   1.2. The level of the reasons themselves: beliefs
      1.2.1. Consistency
      1.2.2. Perfect rationality
   1.3. The level of the reasons themselves: preferences
      1.3.1. Consistency
      1.3.2.Transitivity
      1.3.3. Completeness
      1.3.4. Continuity
      1.3.5. Exogeneity
      1.3.6. Egoism
      1.3.7. Egocentrism

2. Broad rationality
   2.1. The level of actions and the relation with their reasons
   2.2. The level of the reasons themselves: beliefs
   2.3. The level of the reasons themselves: preferences

3. Expressive rationality
   3.1. The level of actions and the relation with their reasons
      3.1.1. Non-instrumentality
      3.1.2. Intentionality
   3.2. The level of the reasons themselves: beliefs
   3.3. The level of the reasons themselves: preferences
      3.3.1. Consistency
      3.3.2. Transitivity
      3.3.3. Completeness
      3.3.4. Continuity
      3.3.5. Exogeneity
      3.3.6. Egoism
      3.3.7. Egocentrism

Conclusion of Part I

1. Schematic overview
2. The relation between different conceptions of rationality
Chapter 5: James Buchanan's theory of constitutional choice

1. Why study James Buchanan?
   1.1. Who is James Buchanan?
   1.2. Why study James Buchanan?
   1.3. Why not study another political economist or political philosopher?

2. Buchanan's intellectual background

3. Buchanan's theoretical assumptions
   3.1. Methodological individualism
   3.2. The Homo Economicus model
      3.2.1. Instrumentality
      3.2.2. Egoism
      3.2.3. Exogeneity

4. Normative implications of Buchanan's theoretical assumptions
   4.1. Normative implications of methodological individualism
      4.1.1. Buchanan's theory of constitutional choice
      4.1.2. Buchanan's view of the market
      4.1.3. Buchanan's view of the state
         4.1.3.1. Minimal protective and productive state
         4.1.3.2. Contractarianism
         4.1.3.3. Constitutional democracy
         4.1.3.4. Unanimity and near-unanimity
      4.1.4. Buchanan's proposals to downsize the state
   4.2. Normative implications of the Homo Economicus model
      4.2.1. Normative implications of instrumentality
      4.2.2. Normative implications of egoism
         4.2.2.1. Political failures
         4.2.2.2. The state as Leviathan
         4.2.2.3. The need for constitutional constraints on the state
      4.2.3. Normative implications of exogeneity

5. Criticizing and complementing Buchanan's theoretical assumptions
   5.1. Criticizing and complementing methodological individualism
   5.2. Criticizing and complementing the Homo Economicus model
      5.2.1. Criticizing and complementing instrumentality
      5.2.2. Criticizing and complementing egoism
      5.2.3. Criticizing and complementing exogeneity

6. Normative implications of criticizing and complementing Buchanan's theoretical assumptions
   6.1. Normative implications of criticizing and complementing methodological and normative individualism
   6.2. Normative implications of criticizing and complementing the Homo Economicus model
      6.2.1. Normative implications of criticizing and complementing instrumentality
## Contents

6.2.2. Normative implications of criticizing and complementing egoism 170
6.2.3. Normative implications of criticizing and complementing exogeneity 171

7. Conclusion 177
  7.1. Buchanan as an economist 177
  7.2. Buchanan as a political economist and a political philosopher 179
  7.3. Buchanan in search of a better society 180
  7.4. Summing things up 182

Chapter 6: The alternative of Samuel Bowles and Herbert Gintis 185

1. Why study Samuel Bowles and Herbert Gintis?
   1.1. Who are Samuel Bowles and Herbert Gintis? 185
   1.2. Why study Samuel Bowles and Herbert Gintis? 186

2. Bowles' and Gintis' intellectual background 187

3. Bowles' and Gintis' theoretical assumptions
   3.1. The motivational dichotomy 191
      3.1.1. Self-regarding preferences 192
      3.1.2. Other-regarding preferences 193
   3.2. Beyond the motivational dichotomy 194
      3.2.1. Reciprocity 194
      3.2.2. Strong reciprocity: definition 195
      3.2.3. Strong reciprocity: empirical evidence 196
   3.3. Standard accounts of the evolutionary origins of prosocial actions 197
      3.3.1. Kin selection 198
      3.3.2. Direct reciprocity 199
      3.3.3. Reciprocal altruism 199
      3.3.4. Indirect reciprocity 200
      3.3.5. Strong reciprocity as a maladaptive trait 201
   3.4. The evolutionary origins of strong reciprocity 202
      3.4.1. Cultural group selection 203
      3.4.2. Multilevel selection 205
      3.4.3. The role of norms and emotions 206
   3.5. Complementing Homo Economicus with Homo Reciprocans 209

4. Normative implications of Bowles' and Gintis' theoretical assumptions 211
   4.1. The institutional dichotomy 211
      4.1.1. Markets 212
      4.1.2. States 212
   4.2. Beyond the institutional dichotomy 213
      4.2.1. Egoistic preferences and their amendments 214
      4.2.2. Exogenous preferences and their amendments 216
   4.3. Normative implications at the level of the state 217
      4.3.1. Egoistic preferences and their amendments 219
      4.3.2. Exogenous preferences and their amendments 220
4.3.2.1. Crowding effects: definition 221
4.3.2.2. Crowding effects: evidence 221
4.3.2.3. Crowding effects: psychological mechanisms 222
4.3.2.4. Crowding effects: normative repercussions 223
4.3.2.5. Crowding effects: theoretical relevance 224
4.4. Normative implications at the level of the market 226
4.4.1. Egoistic preferences and their amendments 226
4.4.2. Exogenous preferences and their amendments 226
5. Conclusion
   5.1. Summing things up at the individual level 229
   5.2. Summing things up at the institutional level 230
   5.3. Bringing together the individual and the institutional level 232

**Conclusion of Part III** 235

1. Conclusions at the explanatory level 235
2. Conclusions at the normative level 238

**General conclusion** 241

1. Avoiding a pessimistic determinism 241
2. The value and limitations of this research project 245

**Bibliography** 247
