Vorbemerkung	1
Vorwort	3
Acknowledgments	9
Deutsche Zusammenfassung	13
1 Introduction: Learning as <i>actor-networked</i> activity	35
1.1 Interactions of heterogeneous elements in online and face-to-face encounters	35
1.2 Empirical setting: The Blended Learning course <i>e-Learning Training and Management</i>	41
2 Towards non-representational geographies of face-to-face and media-generated practices	45
2.1 Absolute, relative, and relational spaces	46
2.2 Relative spatial structures: Locational analysis	47
2.3 Context: Time-geography	49
2.4 Practice: Post-structuralist Hybrid Geographies and Non-Representational Theory.	55
2.5 Physical and media-generated relational spaces.	57
2.5.1 Geographies of overlapping face-to-face and media-generated social spaces	57
2.5.2 Towards relational geographies of face-to-face and media-generated practices	59

Contents

3 Towards a social use of collaborative technologies in online and face-to-face environments 61

3.1 Computer-Mediated Communication 61

3.2 Computer-Supported Cooperative Work 63

3.3 Electronic Learning. 65

3.4 From Computer Based Training to Mobile Learning 66

4 Actor-network circulation. 73

4.1 Actor Network Theory: History and conceptual base 73

4.2 Actor-network elements and spaces. 78

4.3 Dynamic classification of actor-networks 83

4.3.1 A Sociology of Translation: The failed domestication of scallops in St. Brieuc Bay. 83

4.3.2 Technological conception and adoption networks in Constructive Technology Assessment. 91

4.4 Hybrid geographies 96

4.5 Actor Network Theory as an analytical framework for analyzing interactions in physical and online environments . . . 100

4.6 Criticisms: Why stick to the ‘actor-network’?. 100

4.7 Legitimizing Actor Network ‘Theory’ pragmatically 104

5 Ethnography *blended* 107

5.1 Ethnography 108

5.1.1 Ethnography in Science and Technology Studies 110

5.1.2 Virtual ethnography. 114

5.1.3 Blended ethnography 117

5.2 Sampling 118

5.3 Participation and observation 119

5.4 Analysis of online interaction data 120

Contents

5.5	Questionnaire and interviews	120
5.6	Group discussion as small group chat	123
5.7	Theoretical coding	124
5.8	Computer-assisted qualitative data analysis with <i>Qualrus</i>	126
5.8.1	Qualrus vis-à-vis alternative qualitative software products	127
5.8.2	Data analysis with Qualrus	130
5.8.3	Approaching actor-network dynamics	131
5.9	Triangulation	132
6	The Blended Learning course: Tracing the actor-network . . .	135
6.1	Transforming <i>content</i>	137
6.2	Managing <i>time</i>	139
6.2.1	Course schedule	140
6.2.2	Personal time	141
6.2.3	Time zones	143
6.2.4	Cyclical time	143
6.3	<i>Participants</i> and distant others	144
6.3.1	Personality	144
6.3.2	Background.	152
6.3.3	Motivation	154
6.3.4	Distant others	155
6.3.5	Embodiment	156
6.3.6	The Group: Composition, conventions, and ties.	157
6.4	Access to <i>technology</i>	162
6.4.1	The Internet.	162
6.4.2	The cooperative learning environment	164
6.4.3	Technical objects	173
6.5	Active <i>place</i>	174
6.5.1	Countries of residence: Political and infrastructural environments	174
6.5.2	Place online.	175

Contents

6.5.3 Identity and association: Physical and cultural environments	177
6.5.4 Place face-to-face.	178
6.6 Summary: Actor-network element interrelations	181
7 Conclusion: Blending face-to-face and online spaces.	185
7.1 Co-presence face-to-face and online: A time-geographic revision	185
7.2 Fire spatial impulses: Face-to-face associations online	197
7.2.1 Place as actant and mutable mobile: A contribution to Actor Network Theory	197
7.2.2 Cyberplace and embodiment: A contribution to Hybrid Geographies	204
7.3 Private and third places: A pragmatic approach to the design of online interaction settings	206
8 References	211
9 Annex	237
9.1 Empirical data, collected face-to-face and online	237
9.1.1 Sample response to e-mail questionnaire on “e-Learning Training and Management”	237
9.1.2 Sample ethnographic interview (face-to-face data)	240
9.1.3 Sample pinboard posts	252
9.1.4 Sample chat.	253
9.2 Screenshots of data analysis with qualitative software Qualrus	268
