

# Contents

<b>Abbreviations</b> . . . . .	vii
<b>Introduction</b> . . . . .	ix
<b>1 János Neumann's Early Years</b>	
1.1 A Jewish family in early twentieth century Budapest . . . . .	1
1.2 A young talent in Hungarian mathematics <i>belle époque</i> . . . . .	2
1.3 Lights and shadows. The von Neumann generation . . . . .	7
1.4 Student years in Germany . . . . .	13
<b>2 Von Neumann and the Mathematics of Göttingen</b>	
2.1 The Göttingen mathematicians . . . . .	19
2.2 Hilbert's mathematical optimism . . . . .	22
2.3 The problems of the foundations of mathematics and the axiomatic approach . . . . .	25
2.4 The axiomatization of quantum mechanics and functional spaces . . . . .	31
2.5 A crucial contribution to game theory . . . . .	39
<b>3 A Mathematician Between Past and Future</b>	
3.1 Continuity and evolution in von Neumann's thought . . . . .	49
3.2 Axiomatics and the twentieth century renewal of mathematical practice . . . . .	53
3.3 Von Neumann's conception of mathematics . . . . .	57
3.4 The language of mathematics and determinism . . . . .	60
3.5 The world as a strategic game: a mathematical idea of rationality . . . . .	67
<b>4 Von Neumann in the United States</b>	
4.1 Princeton and the American mathematical community in the 1930s . . . . .	75
4.2 A lucky migrant . . . . .	79
4.3 Scientific commitment during World War II . . . . .	82

4.4	From the Manhattan Project to the Atomic Energy Commission . . . . .	87
4.5	Scientific research and national security during the Cold War . . . .	91
4.6	Freedom and limitations in the development of science and technology . . . . .	96
4.7	Systems, information, control . . . . .	104
4.8	Von Neumann's final years: a very engaged expert and the time stealthily borrowed for the scientist's projects . . . . .	115
<b>5</b>	<b>Beyond Mathematics: von Neumann's Scientific Activity in the 1940s and 1950s</b>	
5.1	From rational economy to the axiomatization of economic behaviour . . . . .	121
5.2	The theory of games: a new mathematics for the social sciences . . . . .	128
5.3	Decisions, organization, operations research . . . . .	133
5.4	Engineering and mathematics: the project of an electronic calculator . . . . .	138
5.5	The use of computer in scientific research . . . . .	147
5.6	The brain-computer analogy . . . . .	154
	<b>Concluding Remarks:</b>	
	<b>von Neumann and Twentieth Century Science . . . . .</b>	<b>167</b>
	<b>Chronology . . . . .</b>	<b>173</b>
	<b>Bibliography</b>	
	Sources and scholarship on John von Neumann . . . . .	175
	John von Neumann's published works and archived papers . . . . .	176
	Works by von Neumann mentioned in the book . . . . .	177
	General bibliography . . . . .	181
	<b>Index of Names . . . . .</b>	<b>201</b>
