Table of Contents

Computer Graphics Theory and Applications

Part I: Geometry and Modeling

Implicit Surface Reconstruction with Radial Basis Functions  ..........  5  
   Jun Yang, Zhengning Wang, Changqian Zhu, and Qiang Peng

A Discrete Approach to Compute Terrain Morphology ..................  13  
   Paola Magillo, Emanuele Danovaro, Leila De Floriani,  
   Laura Papaleo, and Maria Vitali

Procedural Natural Phenomena from Least-Cost Paths in a Weighted  
   Graph ...........................................................................  27  
   Ling Xu and David Mould

The Orthant Neighborhood Graph: A Decentralized Spatial Data  
   Structure for Dynamic Point Sets .......................................  41  
   Tobias Gernner and Thomas Strothotte

Part II: Animation and Simulation

Direct Volume Deformation ...................................................  59  
   Florian Schulze, Katja Bühler, and Markus Hadwiger

Part III: Interactive Environments

A Multi-resolution Mesh Representation for Deformable Objects in  
   Collaborative Virtual Environments .................................  75  
   Selcuk Sumengen, Mustafa Tolga Eren, Serhat Yesilyurt, and  
   Selim Balcisoy

Improved Meshless Deformation Techniques for Plausible Interactive  
   Soft Object Simulations ...................................................  88  
   Alex Henriques and Burkhard Wünsche

Computer Vision Theory and Applications

Part I: Image Formation and Processing

Objective Evaluation of Image Mosaics ....................................  107  
   Jani Boutellier, Olli Silvén, Marius Tico, and Lassi Korhonen
# Table of Contents

## Part II: Image Analysis

A Revisited Half-Quadratic Approach for Simultaneous Robust Fitting of Multiple Curves .................................................. Jean-Philippe Tarel, Pierre Charbonnier, and Sio-Song Ieng 121

## Part III: Image Understanding

A Dempster-Shafer Theory Based Combination of Classifiers for Hand Gesture Recognition .......................................................... Thomas Burger, Oya Aran, Alexandra Urankar, Alice Caplier, and Lale Akarun 137

Motion Feature Combination for Human Action Recognition in Video .................................................................................. Hongying Meng, Nick Pears, and Chris Bailey 151

Optimal Factor Analysis and Applications to Content-Based Image Retrieval ................................................................. Yuhua Zhu, Washington Mio, and Xiuwen Liu 164

Biased Manifold Embedding: Supervised Isomap for Person-Independent Head Pose Estimation .................................. Vineeth Balasubramanian and Sethuraman Panchanathan 177

## Part IV: Motion, Tracking and Stereo Vision

High Performance Model-Based Object Detection and Tracking ........ Alexander Ladikos, Selim Benhimane, and Nassir Navab 191

Local Structure to Solve the Correspondence Search Problem in a Monocular Pose Estimation Scenario ............................. Marco A. Chavarria and Gerald Sommer 205

Disparity Contours – An Efficient 2.5D Representation for Stereo Image Segmentation ....................................................... Wei Sun and Stephen P. Spackman 218

Video-Based Camera Tracking Using Rotation-Discriminative Template Matching ................................................................... David Marimon and Touradj Ebrahimi 232

Energy Association Filter for Online Data Association with Missing Data ................................................................................ El Abed Abir, Dubuisson Severine, and Béréziat Dominique 244
