Table of Contents

Preface vii

1 Spoken and written English 1
  1.1 Meanings of the terms 'spoken' and 'written' English 2
  1.2 Analytical units for the spoken and written codes 9
  1.3 Previous research on code differences 14
  1.4 Summary 30

2 The structure of the noun phrase and the clause complex 31
  2.1 The noun phrase 31
    2.1.1 Determiners 33
    2.1.2 Premodification 34
    2.1.3 Postmodification 37
    2.1.4 Distributional differences of complexity of noun phrases 41
  2.2 The clause complex 43
    2.2.1 Coordination and subordination 43
    2.2.2 Distributional differences of complexity of clause complexes 46
  2.3 Summary 47

3 Complexity in language 49
  3.1 Definitions of complexity in language 49
    3.1.1 Cognitive complexity, semantic complexity, complexity of meaning, processing complexity and formal complexity – an overview 49
    3.1.1.1 Cognitive complexity 50
    3.1.1.2 Processing complexity 51
    3.1.1.3 Formal complexity 53
  3.2 Measuring formal complexity 57
    3.2.1 Complexity metrics 58
    3.2.2 Measuring complexity within noun phrases and clause complexes 68
  3.3 Summary 74
4 Pattern grammar and complexity  
4.1 'Open choice' versus 'idiom principle'  
4.2 Terminological diversity for preconstructed structures  
4.3 Patterns and complexity  
4.4 Summary  

5 Corpus data  
5.1 The British Component of the International Corpus of English (ICE-GB)  
5.2 Spoken and written data in ICE-GB  
5.3 Analysis of corpus data  

6 Complexity within nominal groups  
6.1 Noun phrases in spoken English  
6.2 Noun phrases in written English in comparison to spoken English  
6.3 Summary  

7 Complexity within clause complexes  
7.1 Clause complexes in spoken English  
7.2 Clause complexes in written English in comparison to spoken English  
7.3 Summary  

8 The use of patterns in spoken and written English  
8.1 Phrasal patterns  
8.2 Clausal patterns  
8.3 Comment clauses  
8.4 Summary  

9 Summary
