## Contents

### 7 Force Transfer in the Tire Contact Patch
- 7.1 Causes of the Camber Angle
- 7.2 General Influence of Camber Angle on Conventional Tires
- 7.3 Influence of the Camber Angle on the Maximum Lateral Force
- 7.4 Optimal Camber Angle
- 7.5 Summary

### 8 Influence of Force Transfer on the Planar Vehicle Motion
- 8.1 Parameter Variations for the Analysis
- 8.2 Driving Maneuvers and Benchmark Criteria
- 8.3 Analysis of the Driving Maneuver
- 8.4 Summary

### 9 Conclusion
- 9.1 How can the Control of Vehicle Dynamics be accomplished in an Optimal Fashion?
- 9.2 Which Influencing Variables should be actuated in order to enhance Vehicle Dynamics?
- 9.3 Which actuators for Influencing Variables should be improved to optimize Vehicle Dynamics?
- 9.4 Outlook
- 9.5 Main Contribution of this Thesis

### Appendix
- A Solving of the Optimization Approaches
  - A.1 The Solving Algorithm Sequential Quadratic Programming (SQP)
  - A.2 Starting Values for the Optimization
  - A.3 Control Guarantee - Optimization Robustness
  - A.4 Operation in Case of Discontinuous Road Friction Changes
  - A.5 Implementation
- B Used Parameters
  - B.1 Parameters of the Tire Force Model
  - B.2 PVM
  - B.3 MBVM
  - B.4 Optimization
- C Table of Names for Electronic Stability Control Systems
- Bibliography
