# Table of Contents

Creating Brain-Like Intelligence .................................................. 1  
*Bernhard Sendhoff, Edgar Körner, and Olaf Sporns*

From Complex Networks to Intelligent Systems ............................. 15  
*Olaf Sporns*

Stochastic Dynamics in the Brain and Probabilistic Decision-Making ... 31  
*Gustavo Deco and Edmund T. Rolls*

Formal Tools for the Analysis of Brain-Like Structures and Dynamics ........................................... 51  
*Jürgen Jost*

Morphological Computation – Connecting Brain, Body, and Environment ........................................... 66  
*Rolf Pfeifer and Gabriel Gómez*

Trying to Grasp a Sketch of a Brain for Grasping ............................ 84  
*Helge Ritter, Robert Haschke, and Jochen J. Steil*

Learning Actions through Imitation and Exploration: Towards Humanoid Robots That Learn from Humans ........................................... 103  
*David B. Grimes and Rajesh P.N. Rao*

Towards Learning by Interacting .................................................. 139  
*Britta Wrede, Katharina J. Rohlfing, Marc Hanheide, and Gerhard Sagerer*

Planning and Moving in Dynamic Environments: A Statistical Machine Learning Approach ........................................... 151  
*Sethu Vijayakumar, Marc Toussaint, Giorgios Petkos, and Matthew Howard*

Towards Cognitive Robotics ...................................................... 192  
*Christian Goerick*

Approaches and Challenges for Cognitive Vision Systems .................... 215  
*Julian Eggert and Heiko Wersing*

Some Requirements for Human-Like Robots: Why the Recent Over-Emphasis on Embodiment Has Held Up Progress .................... 248  
*Aaron Sloman*

Co-evolution of Rewards and Meta-parameters in Embodied Evolution ...................................................... 278  
*Stefan Elfwing, Eiji Uchibe, and Kenji Doya*
Active Vision for Goal-Oriented Humanoid Robot Walking   303
   Mototaka Suzuki, Tommaso Gritti, and Dario Floreano

Cognitive Adequacy in Brain-Like Intelligence 314
   Christoph S. Herrmann and Frank W. Ohl

Basal Ganglia Models for Autonomous Behavior Learning 328
   Hiroshi Tsujino, Johane Takeuchi, and Osamu Shouno

Author Index 351
