

Table of Contents

Summary	VI
Zusammenfassung	VII
List of Abbreviations	VIII
Chapter 1: Introduction	1
1.1 General Introduction	2
1.2 Alcohol Dehydrogenases in Organic Synthesis	2
1.3 Cofactor Regeneration	4
1.4 Operational Windows of Electroenzymatic Processes	6
1.5 Evaluation of Promising Electroenzymatic Processes with Synthetic Potential	10
1.6 Parameters that Limit the Performance of Electroenzymatic Processes and Promising Developments in Reaction Engineering	14
1.7 Concluding Remarks and Future Prospects	15
1.8 Scope of the Thesis	16
Chapter 2: Process Intensification of <i>Thermus</i> sp. ATN1 Alcohol Dehydrogenase Production	17
Chapter 3: TADH, the Thermostable Alcohol Dehydrogenase from <i>Thermus</i> sp. ATN1: A Versatile New Biocatalyst for Organic Synthesis	37
Chapter 4: Development of a Semi-Continuous 3-Dimensional Electrochemical Cell for Electroenzymatic Processes	57

Chapter 5: Electroenzymatic Asymmetric Reduction of (<i>rac</i>)-3-Methylcyclohexanone to (1<i>S</i>,3<i>S</i>)-3-Methylcyclohexanol in Organic/Aqueous Media Catalyzed by a Thermophilic Alcohol Dehydrogenase	77
Chapter 6: Rational Design of a Hybrid Alcohol Dehydrogenase from <i>Thermus</i> sp ATN1 (TADH) to Broaden its Substrate Specificity and its Application to Electroenzymatic Synthesis	97
Chapter 7: Concluding Remarks and Outlook	113
References	121
Curriculum vitae	137
