

Table of Contents

Contributors.....	ix
Introduction.....	xvii
<i>The Editors</i>	
Part I: Geoinformation Processing and Modelling.....	1
Earth Observations and Dynamic Mapping: Key Assets for Risk Management	3
<i>Alessandro Annoni, Massimo Craglia, Ad de Roo and Jesus San-Miguel</i>	
Spatial Information for Disaster Management Using Examples from Istanbul.....	23
<i>Orhan Altan and Gerhard Kemper</i>	
Rapid Population Maps for Crisis Response.....	39
<i>Gunter Zeug, Olaf Kranz and Sandra Eckert</i>	
Modeling of Spatiotemporal Distribution of Urban Population at High Resolution – Value for Risk Assessment and Emergency Management.....	53
<i>Sérgio Freire</i>	
A Framework for Defining a 3D Model in Support of Risk Management	69
<i>Serkan Kemec, Sisi Zlatanova and H. Sebnem Duzgun</i>	
DB4GeO, a 3D/4D Geodatabase and Its Application for the Analysis of Landslides.....	83
<i>Martin Breunig, Björn Schilberg, Andreas Thomsen, Paul Vincent Kuper, Markus Jahn and Edgar Butwilowski</i>	
GIS Procedure to Forecast and Manage Woodland Fires	103
<i>Antonio Condorelli and Giuseppe Mussumeci</i>	
Cartographic Support of Fire Engine Navigation to Operation Site	113
<i>Vít Voženilek and Lenka Zajíčková</i>	

Strategies for the Automatic Extraction of Water Bodies from TerraSAR-X/TanDEM-X data	129
<i>Thomas Hahmann, André Twele, Sandro Martinis and Manfred Buchroithner</i>	
GIS Techniques in the Evaluation of Pipeline Networks Seismic Hazard ...	143
<i>Michele Maugeri, Ernesto Motta, Giuseppe Mussumeci and Erminia Raciti</i>	
Towards a Quick Damage Detection System Based on Grid Computing.....	155
<i>Tuong-Thuy Vu and Masashi Matsuoka</i>	
GMES Services for Conflict Prevention and Mitigation: Supporting the DG RELEX in Mission Planning	171
<i>Olaf Kranz, Stefan Lang, Dirk Tiede, Gunter Zeug, Thomas Kemper, Mathilde Caspard and Stephen Clandillon</i>	
Part II: Geo-information Services	189
Mobilizing Multi-source Geospatial Information for EW and EM: Maximize Sharing, Enhance Flexibility, and Minimize Costs	191
<i>Mark Reichardt and Carl Reed</i>	
Metainformation in Crisis Management Architecture – Theoretical Approaches, INSPIRE Solution.....	209
<i>Tomáš Řezník</i>	
Collaborative Post-disaster Damage Mapping via Geo Web Services.....	221
<i>Laban Maiyo, Norman Kerle and Barend Köbben</i>	
Decision Support for Tsunami Early Warning in Indonesia: The Role of OGC Standards.....	233
<i>Ulrich Raape, Sven Teßmann, Andreas Wytzisk, Tilmann Steinmetz, Monika Wnuk, Manuel Hunold, Christian Strobl, Christoph Stasch, Alexander C. Walkowski, Oliver Meyer and Simon Jirka</i>	
A Service-Based Architecture for the Interoperability of Heterogeneous Sensor data: A Case Study on Early Warning.....	249
<i>Valentina Casola, Luca D'Onofrio, Giusy Di Lorenzo and Nicola Mazzocca</i>	

Development of a Coupled Geoinformation and Simulation System for Early Warning	265
<i>Eva Ortlieb, Wolfgang Reinhardt and Franz-Xaver Trauner</i>	
Multi-criteria Evaluation for Emergency Management in Spatial Data Infrastructures	273
<i>Matthias Müller, Lars Bernard and Rico Vogel</i>	
Field Tracking Tool: A Collaborative Framework from the Field to the Decision Makers	287
<i>Alessandro Annunziato, Simone Gadenz, Daniele A. Galliano, Roberto Guana and Francisco Igualada</i>	
Practical Experience with a Contextual Map Service	305
<i>Jiří Kozel and Radim Štampach</i>	
Part III: Advanced Cartographic Visualisation	317
Cartography and Geoinformation for Early Warning and Emergency Management	319
<i>David Fraser</i>	
Process Support and Adaptive Geovisualisation in Emergency Management	335
<i>Petr Kubiček, Tomáš Ludík, Eva Mulíčková, Jaroslav Ráček, and Gustav Šafr</i>	
Perceptions of Various Cartographic Representations Under Specific Conditions	349
<i>Zdeněk Stachoň, Čeněk Šašínska and Václav Talhofer</i>	
Research of Students' Cartographical Knowledge in Early Warning and Crisis Management	361
<i>Temenoujka Bandrova, Milan Konecny and Monika Rusnakova</i>	
Geovisual Analytics Tools for Communicating Emergency and Early Warning	379
<i>Mikael Jern, Monica Brezzi and Patrik Lundblad</i>	
Kernel Density Estimations for Visual Analysis of Emergency Response Data	395
<i>Jukka M. Krisp and Olga Špatenková</i>	

**Monitoring and Comparing: A Cartographic Web Application
for Real-time Visualization of Hydrological Data..... 409**
Christophe Lienert, Melanie Kunz, Rolf Weingartner and Lorenz Hurni

**Designing Map Keys for Crisis Management on the Regional
Operational and Informational Centre Level: Monitoring Transport
of Dangerous Goods via Contextual Visualisation..... 425**
Lucie Friedmannová

Index..... 439
