# List of Contents

**ACKNOWLEDGEMENTS**

**ABSTRACT**

**ZUSAMMENFASSUNG**

**CHAPTER 1: ABOUT THIS DOCUMENT**

1.1 Why this research 1
1.2 Structure 2
1.3 Interactive spreadsheet 3

**CHAPTER 2: OVERVIEW OF TODAY'S WATER PROBLEMS**

2.1 Multiple burdens of water poverty 4
2.2 Progress in water and sanitation coverage 4
2.3 Industrial use of water increases with country income 6
2.4 Population and water availability 6
2.5 Disparities in water supply and sanitation coverage 8
2.6 Unique features of the water sector 9
   2.6.1 Value chain of a water and sanitation utility 11
   2.6.2 Concept of social service 11
2.7 Governance and management 13
   2.7.1 Millennium Development Goals 13
   2.7.2 Integrated Water Resources Management 14

**CHAPTER 3: THE INTERNATIONAL WATER SECTOR STRUCTURE**

3.1 Private sector's role is expected to grow 16
3.2 The global need for investment is a driver for privatization 17
3.3 A handful of water players dominate the private market 20

**CHAPTER 4: THE CHALLENGE TO PUBLIC AND PRIVATE SECTORS**

4.1 The concept of public-private partnership 23
4.2 Delivery of services by the public sector 24
4.3 Expanding private sector role 25
4.4 Approaches to privatization 26
   4.4.1 Service and management contracts 28
CHAPTER 5: WORLD TOUR ON IMPACTS OF PRIVATE SECTOR PARTICIPATION

5.1 Western Europe
   5.1.1 Investment
   5.1.2 Urban Wastewater directive
   5.1.3 Water Framework Directive
   5.1.4 Degree of privatization
   5.1.5 Methods of financing
   5.1.6 Water consumption
   5.1.7 Metering and water losses
   5.1.8 Tariffs
   5.1.9 French model
   5.1.10 German model
   5.1.11 English model

5.2 Central and Eastern Europe
   5.2.1 Financing
   5.2.2 Unaccounted for water
   5.2.3 Tariffs

5.3 Sub-Saharan Africa
   5.3.1 Privatization contracts
   5.3.2 Performance indicators before and after privatization
   5.3.3 Water governance and finance

5.4 Middle East & North Africa
   5.4.1 Unaccounted for water
   5.4.2 Outlook
   5.4.3 Recent privatization contracts
   5.4.4 Desalination

5.5 Latin America
   5.5.1 Local private companies
   5.5.2 Tariffs
   5.5.3 Alternative service providers - the other private sector

5.6 North America
   5.6.1 U.S. experience in water privatization
5.6.2 Recent contracts in the U.S. 70
5.7 Asia and Pacific 71
5.7.1 Recent contracts 71
5.7.2 Local private companies 72
5.7.3 Water price differentials between vendors and utilities 73

CHAPTER 6: DEVELOPMENT OF THE KNOWLEDGE BASED DECISION SUPPORT SYSTEM 75

6.1 Decision making and problem solving 76
6.2 Decision Support Systems and multi-objective programming 76
6.3 Compromise and composite programming 77
6.4 Selection of alternatives 79
6.5 Selection of objectives 79
6.6 Performance indicators and benchmarking efforts 80
6.7 Selection of key performance indicators 81
6.8 Technical expertise 83
   6.8.1 Difference between water abstracted and water distributed 84
   6.8.2 Difference between water distributed and water consumed 85
   6.8.3 Wastewater treatment 85
6.9 Operating effectiveness 86
   6.9.1 Unaccounted for water 86
   6.9.2 Water complaints 87
   6.9.3 Complaints about sanitation service 87
   6.9.4 Water quality monitoring 88
6.10 Responsiveness to consumers 88
   6.10.1 Water coverage 89
   6.10.2 Sanitation coverage 89
   6.10.3 Continuity of service 89
   6.10.4 Number of water supply failures 90
   6.10.5 Delay in obtaining a connection 90
6.11 Economic efficiency 91
   6.11.1 Tariff affordability 91
   6.11.2 Operating revenues 92
   6.11.3 Collection period 92
   6.11.4 Working ratio 93
   6.11.5 Debt service ratio 93
6.12 Investment 94
   6.12.1 Investment 95
   6.12.2 Net fixed assets 95
   6.12.3 Indebtedness level 95
6.13 Managerial expertise
  6.13.1 Metering level
  6.13.2 Unit operating cost
  6.13.3 Staffing
  6.13.4 Labor costs
  6.13.5 Skills and education
  6.13.6 Labor regulations
  6.13.7 Absenteeism
  6.13.8 Training

6.14 Insulation from political intervention
  6.14.1 Political appointees
  6.14.2 Corruption
  6.14.3 Bureaucracy
  6.14.4 Licensing and permits
  6.14.5 Competitiveness
  6.14.6 Economic freedom
  6.14.7 Crime
  6.14.8 Capacity building

6.15 Knowledge management

6.16 Group structuring

6.17 Weighting and compensation factors
  6.17.1 Level 4
  6.17.2 Level 3
  6.17.3 Level 2 and Level 1

6.18 Transformation matrix

6.19 Results and conclusions

6.20 How to use the KB-DSS

CHAPTER 7: USE OF THE KB-DSS TO CASE STUDIES

7.1 Impact of a multi-municipal concession in Viana do Castelo
  7.1.1 Country and sector background
  7.1.2 One public company dominates the Portuguese water and sanitation sector
  7.1.3 AdP market strategies
  7.1.4 Towards an awaited opening of the sector
  7.1.5 Principal companies in Portuguese market
  7.1.6 Background on the Minho-Lima region
  7.1.7 Águas do Minho e Lima
  7.1.8 SMSBVC: The Water and Sanitation Municipalized Services of Viana do Castelo
  7.1.9 Knowledge Base
  7.1.10 Benchmarking and transformation

XXX
7.1.11 Results and conclusions 139
7.2 Water and electricity concession in Cape Verde 139
  7.2.1 Country and sector background 140
  7.2.2 Privatization of Electra 142
  7.2.3 Knowledge Base 145
  7.2.4 Benchmarking and transformation 145
  7.2.5 Results and conclusions 145

CHAPTER 8. THE WAY FORWARD 149

REFERENCES 151

APPENDIX A

Knowledge Base – SMSBVC in 1998 and 2004 161

APPENDIX B

Benchmarking and transformation of the KPIs – SMSBVC
in 1998 and 2004 165

APPENDIX C

Knowledge Base - Electra in Cape Verde in 1998 and 2003 167

APPENDIX D

Benchmarking and transformation of the KPIs – Cape Verde in
1998 and 2003 171
**List of Figures**
